### Sturgeons and Paddlefish of North America

#### The Autocar

This book starts with the proposition that digital media invite play and indeed need to be played by their everyday users. Play is probably one of the most visible and powerful ways to appropriate the digital world. The diverse, emerging practices of digital media appear to be essentially playful: Users are involved and active, produce form and content, spread, exchange and consume it, take risks, are conscious of their own goals and the possibilities of achieving them, are skilled and know how to acquire more skills. They share a perspective of can-do, a curiosity of what happens next? Play can be observed in social, economic, political, artistic, educational and criminal contexts and endeavours. It is employed as a (counter) strategy, for tacit or open resistance, as a method and productive practice, and something people do for fun. The book aims to define a particular contemporary attitude, a playful approach to media. It identifies some common ground and key principles in this novel terrain. Instead of looking at play and how it branches into different disciplines like business and education, the phenomenon of play in digital media is approached unconstrained by disciplinary boundaries. The contributions in this book provide a glimpse of a playful technological revolution that is a joyful celebration of possibilities that new media afford. This book is not a practical guide on how to hack a system or to pirate music, but provides critical insights into the unintended, artistic, fun, subversive, and sometimes dodgy applications of digital media. Contributions

from Chris Crawford, Mathias Fuchs, Rilla Khaled, Sybille Lammes, Eva and Franco Mattes, Florian 'Floyd' Mueller, Michael Nitsche, Julian Oliver, and others cover and address topics such as reflective game design, identity and people's engagement in online media, conflicts and challenging opportunities for play, playing with cartographical interfaces, player-emergent production practices, the re-purposing of data, game creation as an educational approach, the ludification of society, the creation of meaning within and without play, the internalisation and subversion of roles through play, and the boundaries of play.

## **Cars & Parts**

A major new manifesto for a high-tech future free from work Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite. *Inventing the Future* is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. From the Trade Paperback edition.

Vintage camper trailers are a unique symbol of midcentury America that resonates with many people. This book introduces many of those people, along with the trailers they've lovingly maintained or restored. It includes hundreds of photographs of everything from fancy and comfortable trailers designed for glamping (glamorous camping), to trailers handed down through families across generations, and even entrepreneurs who have transformed their trailers into vending booths. Paul Lacitinola enjoys everything about vintage camper trailers, including rescuing, restoring, and rallying. In 2011, he began publishing the first U.S.-based magazine for collectors, restorers, and admirers of American-made camper trailers, *Vintage Camper Trailers*, which now has thousands of subscribers in more than a dozen different countries. He lives in Elverta, California.

### **The Vegetarian Myth**

In this fifth edition of A Cognitive Psychology of Mass Communication, author Richard Jackson Harris continues his

examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

Just a few years before the dawn of the digital age, Harvard psychologist Bert Kaplan set out to build the largest database of sociological information ever assembled. It was the mid-1950s, and social scientists were entranced by the human insights promised by Rorschach tests and other innovative scientific protocols. Kaplan, along with anthropologist A. I. Hallowell and a team of researchers, sought out a varied range of non-European subjects among remote and largely non-literate peoples around the globe. Recording their dreams, stories, and innermost thoughts in a vast database, Kaplan envisioned future researchers accessing the data through the cutting-edge Readex machine. Almost immediately, however, technological developments and the obsolescence of the theoretical framework rendered the project irrelevant, and eventually it was forgotten.

Modern North American sturgeons and paddlefish are the result of 100 million years of evolution. Once an integral part of aboriginal culture, their numbers were decimated by overfishing and habitat destruction during the past two centuries. This

book details the extensive science aimed at helping these remarkable species recover from the brink of extinction, and describes the historical, biological, and ecological importance of North American sturgeon and paddlefish. The text is enhanced by photographs and detailed line drawings. This comprehensive volume will be an invaluable resource for researchers, educators, and consultants, in academic and government settings, who work to further scientific understanding of these fishes. No other single compilation has documented current information in such detail.

"So many of the children in this classroom are Ho-Chunk, and it brings history alive to them and makes it clear to the rest of us too that this isn't just Natives riding on horseback. There are still Natives in our society today, and we're working together and living side by side. So we need to learn about their ways as well." --Amy Laundrie, former Lake Delton Elementary School fourth grade teacher An essential title for the upper elementary classroom, "Native People of Wisconsin" fills the need for accurate and authentic teaching materials about Wisconsin's Indian Nations. Based on her research for her award-winning title for adults, "Indian Nations of Wisconsin: Histories of Endurance and Survival," author Patty Loew has tailored this book specifically for young readers. "Native People of Wisconsin" tells the stories of the twelve Native Nations in Wisconsin, including the Native people's incredible resilience despite rapid change and the impact of European arrivals on Native culture. Young readers will become familiar with the unique cultural traditions, tribal history, and life today for each nation. Complete with maps, illustrations, and a detailed glossary of terms, this highly anticipated new edition includes two new chapters on the Brothertown Indian Nation and urban Indians, as well as updates on each tribe's current history and new profiles of outstanding young people from every nation.

## **Vintage Camper Trailer Rallies**

This guide contains information and learning activities for teaching elementary and secondary school students about federal-Indian relations, treaty rights, and tribal sovereignty in Wisconsin. The guide was developed to meet provisions of the 1989 Wisconsin Act 31 that required social studies curriculum to include instruction on treaty rights and tribal sovereignty. The first three sections are self-contained teaching sections for elementary, middle, and high school students that begin with a brief overview of Wisconsin Indian cultures, political structures, and relationships to the environment. Each section includes nine learning activities that address the nature of the federal-Indian relationship up to the end of the treaty-making era, examine reservations established for Wisconsin Indians and the status of nonreservation Indians, consider the relationship of acculturation to treaty rights, and explore the reaffirmation of treaty rights and the status of Wisconsin Indian peoples today. Each lesson consists of objectives, concepts, fundamentals, treaties, procedures, and a list of additional resources. The fourth section of the guide provides fundamental materials for each learning activity including pretests, maps, primary source materials such as treaty journals and manuscripts, and information on tribal life; the federal-Indian relationship; Indian gaming and economic development; and other matters concerning American Indian tribes in Wisconsin. The fifth section includes the 29 treaties that were negotiated between the Indians of Wisconsin and the United States government, 1795-1856. Appendices include a glossary, a list of Wisconsin Native American Tribal and Intertribal Offices, and a bibliography. (LP)

4-H Stories from the Heart presents inspirational and heartfelt stories by 4-Hers, volunteers, and staff that will inspire, amuse, and bring back fond memories. For more than a century, the 4-H movement has touched the lives of millions of people, one experience at a time. You will read how over 60,000,000 people have learned to step up and lead in a complex and changing world. Don Floyd, President and CEO, National 4-H Council Reading these 4-H stories will warm your heart, help clear your head, remind you why we extend our hands to serve, and yes, provide you with healthy, wholesome laughter! These stories resonate and capture the essence of 4-H. Lisa Lauxman, Division Director, 4-H Youth Development, NIFA USDA This is an amazing collection of stories from all across the country. Some of the stories may sound familiar, while others will be new and unique. But all of these stories will touch your heart. Earl McAlexander, President, National Association of Extension 4-H Agents In a little over a century, 4-H has evolved from a program primarily designed for training rural youth in new agricultural technologies to the worlds largest youth development program. The 4-H experience creates amazing tales best told by those who lived them. 4-H Stories from the Heart offers a wide variety of stories by current and former 4-Hers, volunteers, and professionals; some as young as six years old and others eighty plus! The

stories are sometimes funny, sometimes poignant, and often inspiring, but they all come from the heart. Learn how a teacher from a poor Mississippi school district leveraged a \$1,000 4-H grant to enable her students to change their world. Chuckle over Horse Vandal Strikes at the County Fair, Banned from the Barn, and Manure Happens. Discover how a dead chicken helped win a poultry contest, and why a new 4-H agent told his 4-Hers to steal canes from old folks. 4-H Stories from the Heart is a project of the National Association of Extension 4-H Agents. Proceeds will be used to create an endowment for the National 4-H Hall of Fame that recognizes and celebrates those who have made a significant impact on 4-H from local to national levels.

## **The Sailor's Word-book**

The McDonaldization of Society is George Ritzer's seminal work of critical sociology that links classical sociological theory to many aspects of contemporary life in a globalized world--Max Weber's rationalization thesis updated and applied to the late 20th and early 21st century. Where Weber focused on bureaucracies as the "iron cages" of rationalization in his time, the central premise of McDonaldization is that the fast food restaurant has become the model for the rationalization process today. The book examines ways in which fast food businesses have created a system of operation based on efficiency, calculability, predictability, and control; and how the same principles have been applied to other settings and contexts as diverse as motel chains, "big box" stores, churches, child care centers, college rankings, health care providers, political participation, and most recently, the Internet.

## **4-H Stories from the Heart**

## **Le Deuxième Sexe**

Part memoir, nutritional primer, and political manifesto, this controversial examination exposes the destructive history of agriculture—causing the devastation of prairies and forests, driving countless species extinct, altering the climate, and destroying the topsoil—and asserts that, in order to save the planet, food must come from within living communities. In order for this to happen, the argument champions eating locally and sustainably and encourages those with the resources to grow their own food. Further examining the question of what to eat from the perspective of both human and

environmental health, the account goes beyond health choices and discusses potential moral issues from eating—or not eating—animals. Through the deeply personal narrative of someone who practiced veganism for 20 years, this unique exploration also discusses alternatives to industrial farming, reveals the risks of a vegan diet, and explains why animals belong on ecologically sound farms.

This book explores the various options for creating an expandable room in a recreational vehicle. It is fairly heavy on structural theory but also includes actuation methods, alignment solutions, seals, latching and and a proposed electrical diagram.

## **Winnebago Nation**

In Winnebago Nation, popular critic James B. Twitchell takes a light-hearted look at the culture and industry behind the yearning to spend the night in one's car. For the young the roadtrip is a coming-of-age ceremony; for those later in life it is the realization of a lifelong desire to be spontaneous, nomadic, and free. Informed by his own experiences on the road, Twitchell recounts the RV's origins and evolution over the twentieth century; its rise, fall, and rebirth as a cultural icon; its growing mechanical complexity as it evolved from an estate wagon to a converted bus to a mobile home; and its role in bolstering and challenging conceptions of American identity. Mechanical yet dreamy, independent yet needful, solitary yet clubby, adventurous yet homebound, life in a mobile home is a distillation of the American character and an important embodiment of American exceptionalism, (Richie Rich and Hobo Hank spend time in essentially the same rig at the same

campground, albeit for different reasons and in different levels of comfort.) The frontier may be tapped out but we still yearn for the exploratory life. Twitchell concludes with his thoughts on the future of RV communities and the possibility of mobile cities becoming a real part of the American landscape.

## **Database of Dreams**

From origin stories to contemporary struggles over treaty rights and sovereignty issues, *Indian Nations of Wisconsin* explores Wisconsin's rich Native tradition. This unique volume—based on the historical perspectives of the state's Native peoples—includes compact tribal histories of the Ojibwe, Potawatomi, Oneida, Menominee, Mohican, Ho-Chunk, and Brothertown Indians. Author Patty Loew focuses on oral tradition—stories, songs, the recorded words of Indian treaty negotiators, and interviews—along with other untapped Native sources, such as tribal newspapers, to present a distinctly different view of history. Lavishly illustrated with maps and photographs, *Indian Nations of Wisconsin* is indispensable to anyone interested in the region's history and its Native peoples. The first edition of *Indian Nations of Wisconsin: Histories of Endurance and Renewal*, won the Wisconsin Library Association's 2002 Outstanding Book Award.

*API Design for C++* provides a comprehensive discussion of Application Programming Interface (API) development, from initial design through implementation, testing, documentation, release, versioning, maintenance, and deprecation. It is the only book that teaches the strategies of C++ API development, including interface design, versioning, scripting, and plug-in extensibility. Drawing from the author's experience on large scale, collaborative software projects, the text offers practical techniques of API design that produce robust code for the long term. It presents patterns and practices that provide real value to individual developers as well as organizations. *API Design for C++* explores often overlooked issues, both technical and non-technical, contributing to successful design decisions that product high quality, robust, and long-lived APIs. It focuses on various API styles and patterns that will allow you to produce elegant and durable libraries. A discussion on testing strategies concentrates on automated API testing techniques rather than attempting to include end-user application testing techniques such as GUI testing, system testing, or manual testing. Each concept is illustrated with extensive C++ code examples, and fully functional examples and working source code for experimentation are available online. This book will be helpful to new programmers who understand the fundamentals of C++ and who want to advance their design skills,

as well as to senior engineers and software architects seeking to gain new expertise to complement their existing talents. Three specific groups of readers are targeted: practicing software engineers and architects, technical managers, and students and educators. The only book that teaches the strategies of C++ API development, including design, versioning, documentation, testing, scripting, and extensibility. Extensive code examples illustrate each concept, with fully functional examples and working source code for experimentation available online. Covers various API styles and patterns with a focus on practical and efficient designs for large-scale long-term projects.
