The analysis and prediction of nonlinear behavior in electronic circuits has long been a topic of concern for analog circuit designers. The recent explosion of interest in portable electronics such as cellular telephones, cordless telephones and other applications has served to reinforce the importance of these issues. The need now often arises to predict and optimize the distortion performance of diverse electronic circuit configurations operating in the gigahertz frequency range, where nonlinear reactive effects often dominate. However, there have historically been few sources available from which design engineers could obtain information on analysis techniques suitable for tackling these important problems. I am sure that the analog circuit design community will thus welcome this work by Dr. Wambacq and Professor Sansen as a major contribution to the analog circuit design literature in the area of distortion analysis of electronic circuits. I am personally looking forward to having a copy readily available for reference when designing integrated circuits for communication systems.

Everyone likes to think they started the notebook. Sophie claims she stole the idea from two girls in her math class. Courtney still has a death grip on the theory that the notebook was her invention. Lindsey doesn't really care; she's just along for the ride. And Julia never knows what's going on anyway. What we do know is that we started the notebook in freshman year at Stuyvesant High School as a way to keep in contact when our conflicting schedules denied us one another's company. It allowed us to express ourselves and our views of the world in a tone of complete sarcasm, obscenity, and blind honesty. We've spent a significant portion of our adolescence trying to figure out who we are. The notebook is the closest we've come. We're just a group of normal girls with normal lives. Our notebook is meant to make you laugh and make you remember.

National Book Award Finalist: “This man’s ideas may be the most influential, not to say controversial, of the second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by

Here are more scathingly funny tales from the wild side! Laurie Notaro survived the debauched ride of her twenties and the bumpy road to matrimony. Now she's ready to take on the thirtysomething years . . . and almost middle age has never been more hilarious. Laurie is married, mortgaged, and now—miraculously—employed in the corporate world, discovering that bosses come in all shapes, sizes, and degrees of mental stability. After maxing out her last good credit card at Banana Republic, she's dressed for success and ready to face the jungle: surviving feral, six-foot-plus Gretchen ("Three Thousand Faces of Eve") before battling the overbearing, overstuffed (in way-too-small pants) new mom Suzzi, who ruthlessly cancels Laurie's newspaper column and learns that payback can be a bitch. Laurie also explores the backstabbing world of preschoolers at a Halloween party, the X-rated madness of a family trip to Disneyland, and the pressure from her QVC-addicted mother and the rest of the world to reproduce. But while losing more friends to babies than to booze, she realizes there's a plus side: at least for a couple of months she gets to be the thinner friend. *I Love Everybody (and Other Atrocious Lies)* is Laurie Notaro at her deliciously quirky best. Can a woman prone to what her loved ones might term "meltdowns" (she considers them "Opportunities to Enlighten") put a smile on her face and love everybody? Take a guess.

Initially dominated by simple renditions of East Coast architecture, Milwaukee developed from three pioneer settlements, those of Solomon Juneau, Byron Kilbourn, and George Walker—three hubs from which three villages radiated outward into one city. Following the Civil War, Milwaukee’s growth at the onset of the Industrial Era afforded the city a fanciful array of Victorian streetscapes. The 1890s followed with an era of ethnic architecture in which bold interpretations of German Renaissance Revival and Baroque designs paid homage to Milwaukee’s overwhelming German population. At the turn of the century, Milwaukee’s proximity to Chicago influenced the streetscape with classicized civic structures and skyscrapers designed by Chicago architects. World War I and the ensuing anti-German sentiment, as well as Prohibition, inevitably had adverse effects on “Brew City.” By the 1920s, Milwaukee’s architecture had assimilated to the national aesthetic, suburban development was on the rise, and architectural growth would soon be stunted by the Great Depression.
