Shakespeare wrote more than fifty parts for children, amounting to the first comprehensive portrait of childhood in the English theatre. Focusing mostly on boys, he put sons against fathers, servants against masters, innocence against experience, testing the notion of masculinity, manners, morals, and the limits of patriarchal power. He explored the nature of relationships and ideas about parenting in terms of nature and nurture, permissiveness and discipline, innocence and evil. He wrote about education, adolescent rebellion, delinquency, fostering, and child-killing, as well as the idea of the redemptive child who 'cures' diseased adult imaginations. 'Childness' - the essential nature of being a child - remains a vital critical issue for us today. In *Shakespeare and Child's-Play* Carol Rutter shows

how recent performances on stage and film have used the range of Shakespeare's insights in order to re-examine and re-think these issues in terms of today's society and culture.

Call Yourself Alive?

This path-breaking book reveals how Hollywood became "Hollywood" and what that meant for the politics of America and American film. Working-Class Hollywood tells the story of filmmaking in the first three decades of the twentieth century, a time when going to the movies could transform lives and when the cinema was a battleground for control of American consciousness. Steven Ross documents the rise of a working-class film movement that challenged the dominant political ideas of the day. Between 1907 and 1930, worker filmmakers repeatedly clashed with censors, movie industry leaders, and federal agencies over the kinds of images and subjects audiences would be allowed to see. The outcome of these battles was critical to our own times, for the victors got to shape the meaning of class in twentieth-century America. Surveying several hundred movies made by or about working men and women, Ross shows how filmmakers were far more concerned with class conflict during the silent era than at any subsequent time. Directors like Charlie Chaplin, D. W. Griffith, and William de Mille made movies that defended working people and chastised their enemies. Worker filmmakers went a step further and produced movies from *A Martyr to His Cause* (1911) to *The Gastonia*

Textile Strike (1929) that depicted a unified working class using strikes, unions, and socialism to transform a nation. J. Edgar Hoover considered these class-conscious productions so dangerous that he assigned secret agents to spy on worker filmmakers. Liberal and radical films declined in the 1920s as an emerging Hollywood studio system, pressured by censors and Wall Street investors, pushed American film in increasingly conservative directions. Appealing to people's dreams of luxury and upward mobility, studios produced lavish fantasy films that shifted popular attention away from the problems of the workplace and toward the pleasures of the new consumer society. While worker filmmakers were trying to heighten class consciousness, Hollywood producers were suggesting that class no longer mattered. Working-Class Hollywood shows how silent films helped shape the modern belief that we are a classless nation.

Vampire Loves

In this “evocative first novel,” an elderly woman looks back on the world of revolutionary Cuba as she recalls her intimate, secret love affair with Ernesto “Che” Guevara (Publishers Weekly). A young Cuban woman has been searching in vain for details of her birth mother. All she knows of her past is that her grandfather fled the turbulent Havana of the 1960s for Miami with her in tow, and that pinned to her sweater—possibly by her mother—were a few treasured lines of a Pablo Neruda poem. These facts remain her only tenuous links to her history, until

a mysterious parcel arrives in the mail. Inside the soft, worn box are layers of writings and photographs. Fitting these pieces together with insights she gleanes from several trips back to Havana, the daughter reconstructs a life of her mother, her youthful affair with the dashing, charismatic Che Guevara and the child she bore by the enigmatic rebel. *Loving Che* is a brilliant recapturing of revolutionary Cuba, the changing social mores, the hopes and disappointments, the excitement and terror of the times. It is also an erotic fantasy, a glimpse into the private life of a mythic public figure, and an exquisitely crafted meditation on memory, history, and storytelling. Finally, *Loving Che* is a triumphant unveiling of how the stories we tell about others ultimately become the story of ourselves. “A moving novel from a writer to watch.” —Publishers Weekly “Inventive and hypnotic . . . [An] artful and restless examination of the exile soul.” —Los Angeles Times “[Menendez] captures Cuba’s potential, its desperation and decay, and also its dark humor.” —The New York Times “The writing is consistently beautiful. Highly recommended.” —Library Journal

Among the most important contributions the National Park Service has made since its founding in 1916 has been the development of extraordinary museum technology and administration---national in scope and international in influence. This manual, a distillation of what many persons have learned about the day-to-day operations of museums, is meant to provide curatorial standards and serve as a reference for museum workers everywhere. This book was written by Ralph H. Lewis, an outstanding museum administrator and curator with many years of experience in the National Park Service. It is an outgrowth of an earlier (1941) volume entitled *Field Manual for Museums* by Ned J. Burns, a work that went out of print during World War II and is, even to this day, in demand by curators and museum managers. In this present manual, Mr. Lewis carries on a tradition of excellence in museum practice that can be traced back to the mid-1930's when Carl P. Russell set the basic pattern for museum work in the national parks. In

those early years most park museums could not afford or were too small to engage a full time professional museum staff. Dr. Russell set up centralized laboratories staffed by curators and preparators and provided the parks with exhibition and preservation expertise from this pool. The ordinary maintenance and operation of the museums were left to the superintendents who managed the parks, and to the archeologists, historians and naturalists who interpreted them.

Understanding Context

This edited volume provides a window on the many forces that structure and shape why women and girls participate in terrorism and militancy, as well as on how states have come to view, treat, and strategize against them. Females who carry out terrorist acts have historically been seen as mounting a challenge to the social order by violating conventional notions of gender and power, and their participation in such acts has tended to be viewed as being either as a passive victim or a feminist warrior. This volume seeks to move beyond these portrayals, to examine some of the structuring conditions that play a part in a girl or woman's decision to commit violence. Amidst the contextual factors informing her involvement, the volume seeks also to explore the political agency of the female terrorist or militant. Several of the articles are based on research where authors had direct contact with female terrorists or militants who committed acts of political violence, or with witnesses to such acts.
