This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be

summarized in one word, it would be "collaboration." Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

Experience one of the first novels from New York Times bestselling author Ted Dekker. “[Heaven’s Wager is] genuinely exciting . . . fast paced . . . spine-tingling . . .” —Publishers Weekly A thriller unlike any you have ever read. A love strong enough to bring a tremor to your bones. A sacrifice powerful enough to make heaven weep. At the close of World War II, a shell-shocked soldier, Jan Jovic, was forced to inflict a game of life and death on a peaceful Bosnian community. In a few short hours, this young man was confronted by more love—and hate—than most experience in a lifetime. Years later, Jan has become a world-renown writer with widespread influence in the United States, his past buried deep in his memory. Until the most inopportune time, the game Jan witnessed comes back to haunt him . . . and unwittingly leads him to a beautiful but broken woman caught in an underworld of crime. He must now defeat an evil rarely seen. But there is a price. One that even this war-scarred soldier can't imagine. “Well, well, guess what I’ve found. A fiction writer with a rare knack for a compelling story, an expansive reservoir of clever ideas, and a unique dry wit that makes me laugh.” —Frank Peretti, New York Times bestselling author “Rarely does a novel grip a reader’s heart and soul the way Heaven’s Wager does. Dekker is among a very small number of writers who have mastered the challenge of blending sound theology with knock-your-socks-off storytelling.” —Robert Liparulo, novelist and contributing editor of New Man magazine

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
