The gang is back! Taking place four years after the events of the first book, *The Hunt for Saturn* continues the saga of Vincent and his friends. The rebellion that started on Urtan has now spread throughout the entire galaxy, threatening to bring the Imperial Republic down to its knees once and for all. Follow the companions as they escape the madness of General Zeth and prepare for the biggest conflict of their lives. Once again, *Eternal Horizon* incorporates sci-fi, fantasy, and comic book elements to continue the "novel-encyclopedia" series with over 90 illustrations that include character profiles, starship diagrams, scenic chapter openers and other images that support the story.

"What is a person? Surprisingly little attention is given to this question in psychology. For much of the past century, psychology has tended to focus on the

systematic study of processes rather than on the persons who enact and embody them. In contrast to the reductionist picture of much mainstream theorizing, which construes persons as their mental lives, behaviours or neurophysiological particulars, *The Psychology of Personhood* presents persons as irreducibly embodied and socially situated beings. Placing the study of persons at the centre of psychology, this book presents novel insights on the typical, everyday actions and experiences of persons in relation to each other and to the broader society and culture. Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary, historical, cultural, developmental and everyday contexts"--

A New Quantum Scientific Method

Show biz memoir at its name-dropping, bridge-burning, profane best: the music

industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the

preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Parallel Computer Vision

Quantum theory forces us to consider the usual scientific method invalid in several ways. It even questions the basis of scientific logic: cause and effect. The current scientific method ignores individual experience and the different states of

awareness we go through in the sleep states of the brain. Phil Petersen, Ph.D., explores how to open science to study these states and better understand how the uncertainty of quantum theory applies to them and our waking state. He asserts that this helps us understand how to enable positive possibilities for our lives. The book will appeal to those who meditate or believe in the power of positive thinking as well as those who are open to questioning the very foundations of science. Readers will learn what history's greatest thinkers, including Francis Bacon, Stephen Hawking, Thomas Kuhn, Albert Einstein, and others, have said about the reality of the world in which we live. Discover an intriguing argument for reconsidering and replacing the scientific method to explore different realms of consciousness and enjoy spiritual awareness and healing with the insights in *A New Quantum Scientific Method*.

The Jet Ski Manual

Among the most important contributions the National Park Service has made since

its founding in 1916 has been the development of extraordinary museum technology and administration---national in scope and international in influence. This manual, a distillation of what many persons have learned about the day-to-day operations of museums, is meant to provide curatorial standards and serve as a reference for museum workers everywhere. This book was written by Ralph H. Lewis, an outstanding museum administrator and curator with many years of experience in the National Park Service. It is an outgrowth of an earlier (1941) volume entitled *Field Manual for Museums* by Ned J. Burns, a work that went out of print during World War II and is, even to this day, in demand by curators and museum managers. In this present manual, Mr. Lewis carries on a tradition of excellence in museum practice that can be traced back to the mid-1930's when Carl P. Russell set the basic pattern for museum work in the national parks. In those early years most park museums could not afford or were too small to engage a full time professional museum staff. Dr. Russell set up centralized laboratories staffed by curators and preparators and provided the parks with exhibition and preservation expertise from this pool. The ordinary maintenance and operation of the museums were left to the superintendents who managed the parks, and to the archeologists, historians and naturalists who interpreted them.
