Many people in Great Britain and the United States can recall elderly relatives who remembered long stretches of verse learned at school decades earlier, yet most of us were never required to recite in class. *Heart Beats* is the first book to examine how poetry recitation came to assume a central place in past curricular programs, and to investigate when and why the once-mandatory exercise declined. Telling the story of a lost pedagogical practice and its wide-ranging effects on two sides of the Atlantic, Catherine Robson explores how recitation altered the ordinary people who committed poems to heart, and changed the worlds in which they lived. *Heart Beats* begins by investigating recitation's progress within British and American public educational systems over the course of the nineteenth and twentieth

centuries, and weighs the factors that influenced which poems were most frequently assigned. Robson then scrutinizes the recitational fortunes of three short works that were once classroom classics: Felicia Hemans's "Casabianca," Thomas Gray's "Elegy Written in a Country Churchyard," and Charles Wolfe's "Burial of Sir John Moore after Corunna." To conclude, the book considers W. E. Henley's "Invictus" and Rudyard Kipling's "If--," asking why the idea of the memorized poem arouses such different responses in the United States and Great Britain today. Focusing on vital connections between poems, individuals, and their communities, Heart Beats is an important study of the history and power of memorized poetry.

Seminar paper from the year 2014 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, Humboldt-University of Berlin (Institut für Anglistik & Amerikanistik), course: SE Verb Semantics, language: English, abstract: LOLspeak has established itself as a remarkably distinct form of online English language. The dialect used in memes with LOLcats has developed from being a Netspeak offspring slang used "to make amusing text for funny cat pictures" to a

language phenomenon with "regularities and patterns" that make it "a complex and systematic reimagining of the English language". It has transgressed its meme boundaries and manifested in commentary forums, the bible rewrite "LOLcat Bible Translation Project" - and has become the subject of a number of academic works. From a verb semantic point of view, LOLspeak jumps directly into the eye with its simplification and regularisation of verbs. The dialect in fact seems to be putting strong emphasis on the verb and its function amidst a sentence by shifting not only several grammatical components, but in this way also the aspect & situation type the verb and its correlating items in a sentence operate in. In doing so, it seems to be stressing the importance of the verb in this context as well as making aware of what in fact and in detail composes the aspect and situation type of a sentence. Is LOLspeak therefore a dialect of English that is worth appraising linguistically for its instructive & educational value - or is it a simple "language play" that rather bears the contrary effect and degenerates the English language with its shifting and breaking of linguistic rules?

This comprehensive, interdisciplinary handbook reviews the latest methods and technologies used in automated essay evaluation (AEE) methods and technologies. Highlights include the latest in the evaluation of performance-based writing assessments and recent advances in the teaching of writing, language testing, cognitive psychology, and computational linguistics. This greatly expanded follow-up to Automated Essay Scoring reflects the numerous advances that have taken place in the field since 2003 including automated essay scoring and diagnostic feedback. Each chapter features a common structure including an introduction and a conclusion. Ideas for diagnostic and evaluative feedback are sprinkled throughout the book. Highlights of the book's coverage include: The latest research on automated essay evaluation. Descriptions of the major scoring engines including the E-rater®, the Intelligent Essay Assessor, the Intellimetric™ Engine, c-rater™, and LightSIDE. Applications of the uses of the technology including a large

scale system used in West Virginia. A systematic framework for evaluating research and technological results. Descriptions of AEE methods that can be replicated for languages other than English as seen in the example from China. Chapters from key researchers in the field. The book opens with an introduction to AEEs and a review of the "best practices" of teaching writing along with tips on the use of automated analysis in the classroom. Next the book highlights the capabilities and applications of several scoring engines including the E-rater®, the Intelligent Essay Assessor, the Intellimetric™ engine, c-rater™, and LightSIDE. Here readers will find an actual application of the use of an AEE in West Virginia, psychometric issues related to AEEs such as validity, reliability, and scaling, and the use of automated scoring to detect reader drift, grammatical errors, discourse coherence quality, and the impact of human rating on AEEs. A review of the cognitive foundations underlying methods used in AEE is also provided. The book concludes with a comparison of the various AEE systems and speculation about the future of the field in light of current educational policy. Ideal for educators, professionals, curriculum specialists, and administrators responsible for developing writing programs or distance learning curricula, those who teach using AEE technologies, policy makers, and researchers in education, writing, psychometrics, cognitive psychology, and computational linguistics, this book also serves as a reference for graduate courses on automated essay evaluation taught in education, computer science, language, linguistics, and cognitive psychology.

Master's Thesis from the year 2020 in the subject English Language and Literature Studies - Linguistics, grade: 9 and 12, , course: Master of Arts in Linguistic Science, language: English, abstract: This study has analysed the grammatical errors pupils make when writing English Compositions. This study paper aimed at investigating the grammatical errors committed by grade 9 and 12 pupils in English compositions. The study had the overall goal of identifying the kind of grammatical rules the pupils break. These errors hinder learners from understanding the language and sometimes block or slow down communication. The objectives of the study were: 1. to discover types of grammatical errors that learners make when writing compositions and 2. to discuss rules that were broken for pupils to commit such errors. The research design was a mixed method design which involved both qualitative and quantitative methodologies. Its targeted population was twenty-five (25) teachers of English and one hundred (100) grade 9 and 12 pupils from five selected secondary schools. Random sampling technique was used to arrive at Pupils to be included in the sample. Data for this research was collected using semi-structured interviews and written composition scripts. The compositions were marked with the help of other language teachers. Data was analysed and presented thematically using tables, graphs and discussions of findings. Composition scripts from the pupils were analyzed by looking at the types of errors made. The findings of the research revealed that the common grammar errors

committed by secondary school pupils in Petauke District are: Verb tense, subject-verb agreement, pronoun, spellings, word order, and use of articles, double negative, preposition, and wrong word. It was also discovered that Pupils break grammar rules to make grammatical errors. The findings of this research may inform educators and language material developers about the grammatical errors pupils make and the rules they break to make such errors. The findings might also serve as guidance to teachers on how to assist learners to become better sentence writers. Ultimately, the project ends with conclusion and recommendations.

Examination Questions in English. Sixth Series, 1926-1930

The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is

medicine, through the regulations facing those wishing to self-administer cannabis or provide cannabis-based medicines, to the chemical structure of its many constituents and the rapidly growing group of synthetic cannabinoids that are currently being used for 'legal highs'. With each chapter written by a group of one or more internationally recognised subject experts, it provides academics and researchers with authoritative scientific material on the main pharmacological actions and their effects, as well as their pharmacokinetics, metabolism, and forensic detection. In addition it also examines the complex morphology, cultivation, harvesting, and processing of cannabis and the ways in which the plant's chemical composition can be controlled. As well as offering a raft of scientific information there is extensive coverage of cannabinoid-based medicines. Helping readers to identify and evaluate their benefits, chapters explore pharmacological actions and the effects that seem to underlie approved therapeutic uses, how they are currently used to treat certain disorders, and the ever-growing number of wide-ranging potential clinical applications. There is also coverage of both the legal and illegal sources of cannabis, including 'coffee shops' and 'cannabis dispensaries'. The complex issue of 'recreational cannabis' is also tackled. The sought-after and adverse psychological and non-psychological effects are described and discussions are included on how some adverse effects can be lessened by at least one constituent of cannabis, and that it might be possible to reduce the harm that cannabis does to some by changing current regulatory policies. The Handbook of Cannabis is a one-stop reference; essential reading for
