Beautiful Disaster

The New York Times bestselling, darkly funny memoir of a young New Yorker's daring dual life—advertising art director by day, glitter-dripping drag queen and nightclub beauty-pageant hopeful by night—was a smash literary debut for Josh Kilmer-Purcell, now known for his popular Planet Green television series The Fabulous Beekman Boys. His story begins here—before the homemade goat milk soaps and hand-gathered honeys, before his memoir of the city mouse's move to the country, The Bucolic Plague—in *I Am Not Myself These Days*, with “plenty of dishy anecdotes and moments of tragi-camp delight” (Washington Post).

The War on Freedom

The War On FreedomThe 9/11 ConspiraciesWere the U.S. invasions of Afghanistan and Iraq planned long before the tragedies of September 11, 2001? Why did many WTC survivors mention bombs? Why did normal security measures consistently fail that day? Why has no one in government been fired or even reprimanded for failure to anticipate and prevent the attacks? For that matter, who was truly behind the strikes? Who and where is Osama bin Laden? “You might not expect unfettered passion on the topic of seaweed, but Shetterly is such a great storyteller that you find yourself following along eagerly.” —Mark Kurlansky “Seaweed is ancient and basic, a testament to the tenacious beginnings of life on earth,” writes Susan Hand Shetterly in this elegant, fascinating book. “Why wouldn’t seaweeds be a protean life source for the lives that have evolved since?” On a planet facing environmental change and diminishing natural resources, seaweed is increasingly important as a source of food and as a fundamental part of our global ecosystem. In Seaweed Chronicles, Shetterly takes readers deep into the world of this essential organism by providing an immersive, often poetic look at life on the rugged shores of her beloved Gulf of Maine, where the growth and harvesting of seaweed is becoming a major industry. While examining the life cycle of seaweed and its place in the environment, she tells the stories of the men and women who farm and harvest it—and who are fighting to protect this critical species against forces both natural and man-made. Ideal for readers of such books as *The Hidden Life of Trees* and *How to Read Water*, *Seaweed Chronicles* is a deeply informative look at a little understood and too often unappreciated part of our habitat.

An undeniable aura surrounds the name of Georg Trakl, a poet of intense inner vision and originality whose work stands alongside that of Yeats, Valery, and T. S. Eliot. The distinctive tone of Trakl's work--especially admired by his patron Ludwig Wittgenstein--is autumnal and melancholy. Trakl was writing at a time of spiritual and social disintegration on the eve of the First World War, when personal values and perceptions tended to be subsumed in a more generalized anguish and exaltation.

'Antibacterial Surfaces' covers the advances being made in the design of antibacterial surfaces, which have the ability to either prevent the initial attachment of bacterial cells, or kill any cells that come into contact with these surfaces. This book discusses the mechanisms associated with the attachment of bacteria to surfaces and the main strategies currently being employed to control the initial attachment processes. These strategies are expanded upon in the subsequent chapters, where the definition and description of antibacterial surfaces are clarified, as are the mechanisms that come into play when determining the effectiveness of an antibacterial surface. Subsequent chapters discuss a number of naturally occurring antibacterial surfaces, the methods currently being used for producing synthetic antibacterial surfaces, and the current and potential applications of such materials. This book will be of great interest to people who work with materials that need to remain free of bacterial films, from designing safer biomedical implants to the production of self-cleaning materials where the prevention of biofilm formation has significant economic advantages.
