## **International Trauma Life Support for Emergency Care Providers: Pearson New International Edition**

This outstanding text offers a comprehensive treatment of the principles of the mechanical behavior of materials. Appropriate for senior and graduate courses, it is distinguished by its focus on the relationship between macroscopic properties, material microstructure, and fundamental concepts of bonding and crystal structure. The current, second edition retains the original editions extensive coverage of nonmetallics while increasing coverage of ceramics, composites, and polymers that have emerged as structural materials in their own right and are now competitive with metals in many applications. It contains new case studies, includes solved example problems, and incorporates real-life examples. Because of the books extraordinary breadth and depth, adequate coverage of all of the material requires two full semesters of a typical three-credit course. Since most curricula do not have the luxury of allocating this amount of time to mechanical behavior of materials, the text has been designed so that material can be culled or deleted with ease. Instructors can select topics they wish to emphasize and are able to proceed at any level they consider appropriate.

## **Prehospital Care Pearls and Pitfalls**

### **Phtls: Prehospital Trauma Life Support**

The Essentials of Law Enforcement Emergency Response Public safety professionals and emergency responders today face greater threats than ever before in our history. The traditional role of law enforcement has vastly expanded to require extraordinarily broad-based emergency response capabilities. Law Enforcement Responder: Principles of Emergency Medicine, Rescue, and Force Protection prepares homeland security leaders, law enforcement officers, security professionals, and public safety officials for the wide range of emergency responses they must perform on a daily basis. Law Enforcement Responder explores the vast array of law enforcement demands for emergency responses including resuscitation, trauma, and illness, as well as the essential considerations for special populations such as children and the elderly. The textbook addresses all of the competency statements in the National EMS Education Standards at the Emergency Medical Responder level, as well as additional lifesaving content specific to law enforcement that far exceeds the core curriculum. Law Enforcement Responder accommodates the tremendous diversity in the modern law enforcement mission by providing current and expert emergency medicine content

in a highly adaptable format. Nationally recognized experts present key mission-specific topics, including police officer survival, tactical medicine, executive protection, active shooter response, canine first aid, military medicine, travel medicine, in-flight emergencies, ordnance ballistics, less lethal munitions, incarceration and prisoner care, fire-rescue and hazardous materials, and much more.

### **Principles of Ethics and Personal Leadership**

### **Advanced Emergency Care and Transportation of the Sick and Injured Premier Package with PreSEPT**

Acute Care Surgery is a comprehensive textbook covering the related fields of trauma, critical care, and emergency general surgery. The full spectrum of Acute Care Surgery is expertly addressed, with each chapter highlighting cutting-edge advances in the field and underscoring state-of-the-art management paradigms. In an effort to create the most definitive reference on Acute Care Surgery, an evidence-based approach is emphasized for all content included. Also, notable controversies are discussed in detail often accompanied by data-driven resolutions.

## **Emergency Medical Services**

## **Mechanical Behavior of Materials**

## **Fleisher & Ludwig's Textbook of Pediatric Emergency Medicine**

The Combat Medic of today is the most technically advanced ever produced by the United States Army. Such an advanced technician requires an advanced teaching and learning system. 68W Advanced Field Craft is the first textbook designed to prepare the Combat Medic for today's challenges in the field. The ability to save lives in war, conflicts, and humanitarian interventions requires a specific skill set. Today's Combat Medic must be an expert in emergency medical care, force health protection, limited primary care, evacuation, and warrior skills. 68W Advanced Field Craft combines complete medical content with dynamic features to support instructors and to prepare Combat Medics for their missions."

## **Nancy Caroline's Emergency Care in the Streets, Canadian**

## **Park's Textbook of Preventive and Social Medicine**

Product 15-2116JP

### **Acute Care Surgery**

Gateway is an academically rich five-level course designed to lead teenage students to success in school-leaving and university entrance exams and prepare them for university and the world of work.

### **Medical Response to Major Incidents and Disasters**

PAAMS, the International Conference on Practical Applications of Agents and Multi-Agent Systems is an evolution of the International Workshop on Practical Applications of Agents and Multi-Agent Systems. PAAMS is an international yearly tribune to present, to discuss, and to disseminate the latest developments and the most important outcomes related to real-world applications. It provides a unique opportunity to bring multi-disciplinary experts, academics and practitioners together to exchange their experience in the development of Agents and Multi-Agent Systems. This volume presents the papers that have been accepted for the 2009 edition. These articles capture the most innovative results and this year's

trends: Assisted Cognition, E-Commerce, Grid Computing, Human Modelling, Information Systems, Knowledge Management, Agent-Based Simulation, Software Development, Transports, Trust and Security. Each paper has been reviewed by three different reviewers, from an international committee composed of 64 members from 20 different countries. From the 92 submissions received, 35 were selected for full presentation at the conference, and 26 were accepted as posters.

### **Paramedic Practice Today**

Essentials of Plastic Surgery: Q&A Companion is the companion to Essentials of Plastic Surgery, Second Edition, which covers a wide variety of topics in aesthetic and reconstructive plastic surgery. As such, it is designed to test your knowledge of the source book, which may be helpful in the clinical setting and beyond. It presents both multiple choice questions and extended matching questions in single best answer format. The 1200 questions are carefully constructed to be practical and thorough, and are accompanied by detailed answers that help enhance understanding of both the right and wrong answers. Compact enough to fit in a lab coat pocket, its design and organization allow for quick and easy reading. The print book is accompanied by a complimentary eBook that can be accessed on smartphones and tablets. It is the go-to resource for all students of plastic surgery, whether residents in training or experienced practitioners.

## **SRB's Manual of Surgery**

Resource added for the Nursing-Associate Degree 105431, Practical Nursing 315431, and Nursing Assistant 305431 programs.

## **Textbook on First Aid and Emergency Nursing**

Medical, nursing, and physician assistant students should find the practical history and physical exam guidance in this book to be invaluable. As an introductory reference to primary-care patient encounters, the book is highly recommended. -- Yale Journal of Biology and Medicine Long heralded as a key guide for medical students, nurses, and physician assistants, Essentials of Clinical Examination Handbook, Seventh Edition is a concise yet comprehensive on-the-job reference for history-taking and physical exams that covers both standard exams and specialty-specific diagnostic approaches. Each chapter has been edited by several students and reviewed by faculty experts at the University of Toronto. This new edition includes updated and improved flow charts, mnemonics, illustrations, and clinical pearls, with a greater focus on evidence-based medicine across all topics.

## **12-Lead ECG: The Art of Interpretation**

This book, written by members of the core faculty responsible for European courses on Medical Response to Major Incidents (MRMI), is a practical guide for all medical staff on how to respond to a wide range of disaster scenarios. The entire spectrum of knowledge is covered, from command and coordination through to the management of individual casualties. Central importance is attached to the key component of decision making by explaining what needs to be done for patients in particular situations and the required order and timing of treatment measures. Simplified methods receive due attention, as it is often necessary for medical staff to administer primary treatment outside of their own specialty. This book will prove an invaluable aid to all who may be involved in the response to major accidents and disasters, including medical and nursing students, ambulance crew, and military personnel as well as medical specialists.

### **Resources for Optimal Care of the Injured Patient**

This brief, practical text covers all aspects of tactical emergency medicine—the practice of emergency medicine in the field, rather than at the hospital, during disasters, police or military conflicts, mass events, and community incidents. Key topics covered include hostage survival, insertion and extraction techniques, continuum of force, medical support, planning and triage, medical evaluation in the incident zone, care in custody, medical control of incident site, decontamination, community communication, and more. Boxed definitions, case scenarios, and

treatment algorithms are included. The concluding chapter presents "real world" scenarios to run tactical teams through and lists recommended training programs and continuing education.

### **Quantity Surveying Practice**

The Paramedic Association of Canada, together with the American Academy of Orthopaedic Surgeons and Jones & Bartlett Learning are proud to continue Dr. Nancy Caroline's legacy by publishing a new edition of the Emergency Care in the Streets, Canadian Edition! Dr. Caroline's work transformed EMS and the entire paramedic field. She created the first national standard curriculum for paramedic training in the United States. She also wrote the first paramedic textbook: Emergency Care in the Streets. Now, the Seventh Edition has been rewritten and revised by Canadian EMS experts specifically for Canadian paramedics, using the National Occupational Competency Profiles.

### **PHTLS Prehospital Trauma Life Support**

The Joint Royal Colleges Ambulance Liaison Committee guidelines are the essential resource for paramedics. The 2019 edition of the book has been brought up to date with the latest evidence and developments in clinical practice. JRCALC combines

expert advice with practical guidance to help paramedics in their challenging roles with the overall objective of improving patient care. Key updates are:

- \*Resuscitation and cardiac arrest. The pathophysiology of cardiac arrest, checklist use and pulseless electrical activity is discussed extensively within the context of every day out of hospital practice. A new guideline on tracheostomy and laryngectomy is included, alongside clinical skills photographs.
- \*Consent and patient confidentiality. The guideline is brought up to date with the Data Protection Act 2018 following the General Data Protection Regulations.
- \*Mental health presentation: crisis, distress and disordered behaviour. A reviewed guideline supports the clinician with practical help on the assessment and management of different mental health illnesses.
- \*Major, complex and high risk Incidents. A revision by the National Ambulance Resilience Unit covers poisons, rail incidents and police incapacitants.
- \*New medicines are included: Activated charcoal, duodote and morphine sulfate for end of life care.
- \*Other reviews and updates include: head injury, hyperventilation syndrome, stroke, respiratory illness in children and acute coronary syndrome.

### **7th International Conference on Practical Applications of Agents and Multi-Agent Systems (PAAMS'09)**

The foundation for EMS education was established in 1971 when the American

## Online Library 7th Edition Phtls Test Questions Answers

Academy of Orthopaedic Surgeons (AAOS) authored the first emergency medical technician textbook. Since then, the AAOS has set the gold standard for EMS training programs with the Orange Book Series. This Second Edition, based on Intermediate Emergency Care and Transportation of the Sick and Injured, raises the bar even higher with world-class medical content and innovative instructional resources that meet the diverse needs of today's educators and students. Based on the new National EMS Education Standards for Advanced Emergency Medical Technician, the Second Edition offers complete coverage of every competency statement with clarity and precision in a concise format that ensures student comprehension and encourages critical thinking. New cognitive and didactic material is presented, along with new skills and features, to create an innovative AEMT training solution. Topics including advanced pathophysiology, acid-base balance, fluids and electrolytes, intravenous therapy, intraosseous access, blood glucose monitoring, and administration of AEMT-level medications tailor this textbook to the new Advanced EMT level. Additional online skills allow this textbook to be customized for every AEMT training program's unique needs. Current, State-of-the-Art Medical Content Advanced Emergency Care and Transportation of the Sick and Injured, Second Edition incorporates up-to-date, evidence-based medical concepts to ensure that students are taught assessment and treatment modalities that will help patients in the field today. Advanced Pathophysiology Advanced Emergency Care and Transportation of the Sick and Injured, Second Edition provides a solid foundation in pathophysiology--one of the

key knowledge areas required to become a successful Advanced EMT. Patient Assessment This Second Edition teaches and reinforces the concept of Patient Assessment with a single, comprehensive chapter, ensuring that students understand patient assessment as a single, integrated process--the way that providers actually practice it in the field. Each medical and trauma chapter reinforces the patient assessment process by highlighting the unique aspects of the illness or injury. Clear Application to Real-World EMS Through evolving patient case studies in each chapter, the Second Edition offers students a genuine context for the application of the knowledge presented in the chapter. This approach makes it clear how all of the information will be used to help patients in the field.

### **Advanced Trauma Life Support**

Trauma patients present a unique challenge to anesthesiologists, since they require resource-intensive care, often complicated by pre-existing medical conditions. This fully revised new edition focuses on a broad spectrum of traumatic injuries and the procedures anesthesiologists perform to care for trauma patients perioperatively, surgically, and post-operatively. Special emphasis is given to assessment and treatment of co-existing disease, including surgical management of trauma patients with head, spine, orthopaedic, cardiac, and burn injuries. Topics such as training for trauma (including use of simulation) and hypothermia in trauma are also covered. Six brand new chapters address pre-hospital and ED

trauma management, imaging in trauma, surgical issues in head trauma and in abdominal trauma, anesthesia for oral and maxillofacial trauma, and prevention of injuries. The text is enhanced with numerous tables and 300 illustrations showcasing techniques of airway management, shock resuscitation, echocardiography and use of ultrasound for the performance of regional anesthesia in trauma.

### **The IOC Manual of Sports Injuries**

This exciting new edition of the best-selling and beloved teacher's companion looks at the everyday behaviour issues facing teachers working in today's classrooms. Describing real situations and dilemmas, Bill Rogers provides theoretically sound strategies and best practices to support you in meeting the challenges of the job, as well as building up a rapport with both students and colleagues to enable positive and productive learning environments. Written jargon-free in Bill's accessible and empathetic voice it includes in-depth strategies, practical examples, case studies and pragmatic hints and tips to put in to practice. This will make for informative and inspiring reading to all those involved in educating our children and young people. The new edition has been revised and updated and now also includes access to an interactive website packed with a host of extra material to take you further. Visit <https://study.sagepub.com/rogers4e> to access: Videos of Bill demonstrating his behaviour strategies in real classroom settings

Podcasts where Bill explains his ideas and ethos in more detail as well as answering teachers' FAQs Extra reading material for even more support on difficult subjects Behaviour Management Tool Templates to use with students in the everyday classroom Role-play scenario cards to help understand and prepare for challenging situations “We often think of behaviour management in terms of dealing with challenging behaviour, but Dr Rogers begins by looking at classroom organisation and whole-class strategies. Alongside the theory, he provides examples that create a much deeper understanding of exactly what works and what doesn't.” - Special magazine BILL ROGERS IN THE UK! Dr Bill Rogers will be lecturing in the UK and for schools, authorities and universities this autumn 2017, mid-September to mid-December. For details of events, or to book Bill in to do training for your organization, please contact Lora Rogers at [lrrogers07@gmail.com](mailto:lrrogers07@gmail.com) See his website for further information <http://www.billrogers.com.au>

### **JRCALC Clinical Guidelines 2019**

Principles Of Ethics And Personal Leadership (PEPL) Provides EMS And Mobile Healthcare (MHC) Practitioners At All Levels With The Knowledge And Skills They Need To Effectively Interact With Patients And Their Families, Other Medical Personnel, Co-Workers, Supervisors, And The Community. The Course Provides Students With A Deeper Understanding Of The Basic Principles Of Ethical Leadership And Service To Patients, As Well As An Awareness Of The Leadership

Challenges Facing Today's EMS And MHC Practitioners. This Course Assists Students In Identifying Their Personal Responsibility And Accountability For Ethical Decision Making And For The Exercise Of Ethical Servant Leadership For Themselves, Their Patients, And Their Profession. Many Communities Are Exploring New Models For Delivering Medical Care To Improve Patient Outcomes And Reduce Costs. Through Course Presentations, Discussions, And Learning Activities, This Interactive Course Offers Essential Foundational Training That Advances The Professional Development Of Participants. Students Successfully Completing The PEPL Course Will Be Eligible For Continuing Education Credits.

### **Workbook for Emergency Care**

The Special Operations Forces Medical Handbook is a comprehensive reference designed for combat and special forces medics in the field, it is also a must-have reference for any military or emergency response medical personnel, particularly in hostile environments. Developed as a primary medical information resource and field guide for the Special Operations Command (SOCOM). As a grid-down medical reference for the doomsday prepper it can't be beaten. Defines the standard of health care delivery under adverse and general field conditions. Organized according to symptoms, organ systems, specialty areas, operational environments and procedures. Emphasizes acute care in all its forms (including gynecology, general medicine, dentistry, poisonings, infestations, parasitic infections, acute

infections, hyper- and hypothermia, high altitude, aerospace, dive medicine, and sanitation.). DO NO HARM, DO KNOW HARM The following medical texts should be in the preps of every serious off-grid survivor: Ranger Medic Handbook Special Operations Medical Handbook STP 31-18D34-SM-TG A MOS 18D Special Forces Medical Sergeant PART A: Skill Levels 3 and 4 STP 31-18D34-SM-TG B MOS 18D Special Forces Medical Sergeant PART B: Skill Levels 3 and 4

### **Classroom Behaviour**

Give your AEMT students the print and digital tools needed to build a solid, knowledgeable foundation with world-class medical content. Cutting-edge online resources expand upon and reinforce this foundation, creating world-class AEMTs. Instructors and students alike will appreciate the administrative ease of PreSEPT, a new online management resource to schedule, evaluate, and track clinical and field rotation data. The Advanced Emergency Care and Transportation of the Sick and Injured Premier Package with PreSEPT includes: \*Advanced Emergency Care and Transportation of the Sick and Injured, Second Edition (print) \*Advanced Emergency Care and Transportation of the Sick and Injured, Second Edition Student Workbook (print) \*Course Management Tools (Course Manager) - a complete online classroom \*Practice Activities - additional interactivities to reinforce concepts and engage students \*Assessment (TestPrep) - a dynamic resource to simulate certification exams \*Interactive Course Lectures - a safe

environment for students to learn at their own pace \*PreSEPT - The online EMS program management tool that enables program administrators, preceptors, and students to schedule externship experiences, track patient encounters and procedures and conduct evaluations Note: In order to access digital resources, a student must be enrolled in a course where the instructor is using the Navigate platform. Note: In order to access PreSEPT, a student must be enrolled in a course where the instructor can provide a Course ID number.

ROM is available for certified PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Elsevier is proud to announce Prehospital Trauma Life Support (PHTLS) Online Continuing Education, the latest addition to NAEMT's worldwide PHTLS educational content. PHTLS Online Continuing Education includes videos, animations, and interactive exercises, along with reading assignments that direct you to the related content in the PHTLS 7th Edition book. Plus, online feedback is provided for self-assessment questions in each module, allowing you to measure your comprehension. A post-test at the end of the final module will check your retention of the online content. Visit at <http://phtls.centrelearn.com> to earn 8 hours of CECBEMS continuing education credit by successfully completing all modules of PHTLS Online Continuing Education. Please note: NO PHTLS CARD WILL BE ISSUED. PHTLS Hybrid courses are available only through the NAEMT. Visit the Education section of the NAEMT website [www.naemt.org](http://www.naemt.org) for more information. This is a Pageburst digital textbook; Provides CEUs for First Responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to support the profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing education program authored and administered by the

## Online Library 7th Edition Phtls Test Questions Answers

PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent approach for every body system helps you easily reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 4 brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy. Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine

the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions in each chapter challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course. Updated Companion DVD includes 9 new narrations and 20 fully re-shot demonstrations and subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese (Mandarin)).

### **Advanced Emergency Care and Transportation of the Sick and Injured**

### **Davis Advantage Basic Nursing**

Limmer EMT-P, Southern Maine Technical College ISBN: 013254380X

## **Tactical Medicine Essentials**

### **Law Enforcement Responder**

Medical support for special weapons and tactics (SWAT) units is different from civilian EMS in many ways. A tactical medical provider (TMP) is charged with providing life-saving care to downed SWAT officers and taking measures to defend against criminal suspects. Mastery of these skills requires extensive, specialized tactical emergency medical services (TEMS) training and experience in the tactical environment. Designed for EMS and medical professionals of all levels of training, Tactical Medicine Essentials provides the foundation needed to create world-class TMPs. Written by an experienced team of authors from diverse backgrounds, this text covers the essential curriculum of tactical medicine, including tactical patient assessment, expedient extrication and evacuation, and self-defense skills.

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

### **Special Operations Forces Medical Handbook**

Text only. This product does NOT include a Resource Central Access Code Card. To purchase the text with a Resource Central Access Code Card, please use ISBN: 0-13-281811-6 For more than 30 years, International Trauma Life Support has been at the forefront of trauma education at all levels of emergency care worldwide. This practical, hands-on training offers a complete reference covering all skills necessary for rapid assessment, resuscitation, stabilization, and transportation of the trauma patient. Updated with new photos and the latest approaches to the care of the trauma patient, this seventh edition conforms to the most recent AHA/ILCOR guidelines for artificial ventilation and CPR.

### **68W Advanced Field Craft: Combat Medic Skills**

Before the 1st edition of the Textbook of Pediatric Emergency Medicine published, there was no official pediatric emergency medicine subspecialty in either pediatrics or emergency medicine. This book defined many of the treatments, testing modalities procedural techniques and approaches to care for the ill and injured child. As such, it was written with both the pediatrician and the emergency physician in mind. The Textbook of Pediatric Emergency Medicine, has an entirely new editorial board and templated chapters focusing on evidence-based diagnosis and management of pediatric patients in the ED. The book's content has been rewritten to eliminate and eliminate redundancy, creating succinct sections that pertain to patient care in the ED. Templated chapters include: Clinical

Outcomes/Goals of Therapy Current Evidence Clinical Considerations Clinical Recognition: Triage Initial Assessment Management/Diagnostic Testing Clinical indications for discharge or admission, including parental instructions References In the ED, nurses and physicians work closely as a paired team, thus this edition reflects that partnership and offers content tailored to it. Online ancillaries, found in the bundled eBook, include Learning Links for nursing considerations and clinical pathways that outline the key steps to take when managing critically ill patients.

### **Tactical Emergency Medicine**

Welcome to the most comprehensive resource on 12-Lead ECG interpretation! This all-encompassing, four-color text, updated to the new Second Edition, is designed to make you a fully advanced interpreter of ECGs. Whether you are paramedic, nurse, nurse practitioner, physician assistant, medical student, or physician wanting to learn or brush up on your knowledge of electrocardiography, this book will meet your needs. 12-Lead ECG: The Art of Interpretation, Second Edition takes the complex subject of electrocardiography and presents it in a simple, innovative, 3-level approach. Level 1 provides basic information for those with minimal experience interpreting ECGs. Level 2 provides intermediate information for those with a basic understanding of the principles of electrocardiography. Level 3 provides advanced information for those with some mastery of the subject. The entire text is written in a friendly, easy-to-read tone. Additionally, the text contains

real-life, full-size ECG strips that are integrated throughout the text and analyzed in conjunction with the concepts they illustrate.

### **Essentials of Clinical Examination Handbook**

Get the tools you need to succeed! With its conversational, easy-to-read style, Volume 2 of Paramedic Practice Today: Above and Beyond simplifies topics and helps you master National Standard Curriculum objectives and meet the new National Education Standards. It also includes a companion DVD-ROM with step-by-step videos demonstrating key skills in the textbook, along with medical animations and video lectures. Because this book corresponds to the National Registry of EMTs National EMS Practice Analysis, it provides you with the best possible preparation for the National Registry exam. A JB Course Manager resource is available to accompany this title. JB Course Manager is an easy-to-use and fully hosted online learning platform. For additional information, or to make your request, contact your Account Specialist or visit <http://go.jblearning.com/JBCM>.

### **Gateway B2+ Student Book**

This text addresses many of the questions which occur when medical professionals of various disciplines interact and have different plans and interventions, each with

its own valid scientific and/or experience-based rationale: Questions involving tourniquet placement, ideal fluids and volumes for resuscitation, VTE prophylaxis and many other management considerations. Straightforward decisions in the patient with a single diagnosis often conflict when applied to the neurologically injured polytrauma patients. Neurotrauma Management for the Severely Injured Polytrauma Patient answers as many of these questions as possible based on the current literature, vast experience with severe neurotrauma in the current conflicts in Afghanistan and Iraq, and the experience of trauma experts across the globe as well as proposes areas for future study where answers are currently less clear.

### **Trauma Anesthesia**

Prehospital Care Pearls and Pitfalls, is a unique, stimulating, and easy-to-read way, provide practical information applicable to the prehospital setting and help the prehospital emergency care provider be prepared to manage the myriad of emergency and non-emergency situations that he or she will be called upon to assist.

### **Heartsaver First Aid CPR AED Student Workbook (Japanese)**

Created in collaboration with the Medical Commission of the International Olympic

Committee, this new manual distills the latest advances in sports medicine into clinically relevant, practical guidance on treating sports injuries. Ideal for primary care physicians, ER physicians, physical therapists, athletic trainers, nurse practitioners, and physician assistants, the book embraces a problem-oriented approach to guide the reader through assessment and management of the most common injuries and disorders. Over 500 full-color illustrations augment the text, showing readers detailed views of the techniques, procedures and other clinically-relevant information being described.

### **Essentials of Plastic Surgery**

This book covers the whole range of skills and knowledge that modern quantity surveyors require to perform their work efficiently and effectively. The text has been thoroughly revised and substantially extended to enhance its value to the reader. All the basic skills of the quantity surveyor in construction procurement, contract administration and cost control and management are dealt with in sufficient detail to meet the needs of students. The newly developing areas of project management and value management are examined and illustrated in a practical way.

### **Neurotrauma Management for the Severely Injured Polytrauma**

## **Patient**

As the required textbook for NAEMTUs worldwide prehospital trauma life support courses, this is the definitive resource for learning basic and advanced prehospital trauma skills and concepts. Now revised and expanded to cover all aspects of military prehospital trauma with 12 new chapters, this edition is tailored expressly for the military.
