International finance coach Ann Wilson is known as the Wealth Chef because of her ability to help people cook up monetary success. In this previously self-published book, Ann has laid out a step-by-step guide to creating financial freedom. In its pages, readers will find five recipes for wealth that helped Ann go from having nothing to becoming a multimillionaire. These recipes reveal the secrets to:

Simply put, she shows readers how to become financially savvy and build wealth starting immediately. They realize they can create financial freedom and live their dream life now, feeling empowered to throw away the old recipe for success: mix together one secure job with a lifelong portion of hard work and sacrifice to hopefully live the dream life after retirement. Why wait? With the practices and techniques Ann presents here they don't have to!

## **So You Think You Can Write?**

Talking about money sucks; but so does being broke. Do your eyes glaze over just thinking about the mumbo-jumbo of finance? Do you break out into hives at the thought of money? Well, sister, you are not alone. In *RICH BITCH*, money expert and financial journalist Nicole Lapin lays out a 12-Step Plan in which she shares her experiences, mistakes and all, of getting her own finances in order. No lecturing, just help from a friend. And even though money is typically an off-limits conversation, nothing is off-limits here. Lapin rethinks every piece of financial wisdom you've ever heard and puts her own fresh, modern, sassy spin on it. Sure, there are some hard-and-fast rules about finance, but when it comes to your money, the only person who can spend it is you. Should you invest in a 401(k)? Maybe not. Should you splurge on that morning latte? Likely yes. Instead of nickel-and-diming yourself, Nicole's advice focuses on investing in yourself so you don't have to stress over the little things. But in order to do that, you have to be able to speak the language of money. After all, money is a language like anything else, and the sooner you can join the conversation, the sooner you can live the life you want, *RICH BITCH* rehabs whatever bad habits you might have and provides a plan you can not only sustain, but thrive with. It's time to go after the rich life you deserve, and confident enough to call yourself a *RICH BITCH*.

Too many smart people let their finances happen to them in a haphazard fashion. When they want to buy something, they examine their checkbook balance, and if there is a sufficient amount to cover the purchase, a few bucks quickly slip away. If the checkbook is devoid of sufficient resources, they revert to Plan B: pull out the plastic money. All of this happens with little regard for the fact that the future is fraught with money-hungry obligations and opportunities. These misguided people have no idea why they are always broke. They may not even realize some of the ways they lose the money they make. As a result, they are destined to live in the proverbial "poorhouse," or at least well below their potential. It is a shame too, because it does not have to be that way. you need to control your money or it will

Drawing on his extensive knowledge of Western literature, history, and philosophy, the author considers what is meant by democracy, law, emotion, language, truth, and other abstract concepts in light of more than two millennia of Western civilization and discourse. New York Times Bestseller | Washington Post Bestseller The author of the blockbuster New York Times bestsellers, The Happiness Project and Happier at Home, tackles the critical question: How do we change? Gretchen Rubin's answer: through habits. Habits are the invisible architecture of everyday life. It takes work to make a habit, but once that habit is set, we can harness the energy of habits to build happier, stronger, more productive lives. So if habits are a key to change, then what we really need to know is: How do we change our habits? Better than Before answers that question. It presents a practical, concrete framework to allow readers to understand their habits—and to change them for good. Infused with

Rubin's compelling voice, rigorous research, and easy humor, and packed with vivid stories of lives transformed, *Better than Before* explains the (sometimes counter-intuitive) core principles of habit formation. Along the way, Rubin uses herself as guinea pig, tests her theories on family and friends, and answers readers' most pressing questions—oddly, questions that other writers and researchers tend to ignore:

- Why do I find it tough to create a habit for something I love to do?
- Sometimes I can change a habit overnight, and sometimes I can't change a habit, no matter how hard I try. Why?
- How quickly can I change a habit?
- What can I do to make sure I stick to a new habit?
- How can I help someone else change a habit?
- Why can I keep habits that benefit others, but can't make habits that are just for me?

Whether readers want to get more sleep, stop checking their devices, maintain a healthy weight, or finish an important project, habits make change possible. Reading just a few chapters of *Better Than Before* will make readers eager to start work on their own habits—even before they've finished the book.

In this accessible, prescriptive, and widely applicable manual, Google's first engineering director and current Innovation Agitator Emeritus provides critical advice for rethinking how we launch a new idea, product, or business, insights to help successfully beat the law of market failure: that most new products will fail, even if competently executed. Millions of people around the world are working to introduce new ideas. Some will turn out to be stunning successes and have a major impact on our world and our culture: The next Google, the next Polio vaccine, the next Harry Potter, the next Red Cross, the next Ford Mustang. Others successes will be smaller and more personal, but no less meaningful: A restaurant that becomes a neighborhood favorite, a biography that tells an important story, a local nonprofit that cares for abandoned pets. Simultaneously, other groups are working equally hard to develop new ideas that, when launched, will fail. Some will fail spectacularly and publicly: New Coke, the movie John Carter, the Ford Edsel. Others failures will be smaller and more private, but no less failure: A home-based business that never takes off, a children's book that neither publishers nor children have any interest in, a charity for a cause too few people care about. Most people believe that their venture will be successful. But the law of market failure tells us that up to 90 percent of most new products, services, businesses, and initiatives will fail soon after launch—regardless of how promising they sound, how much we commit to them, or how well we execute them. This is a hard fact to accept. Combining detailed case studies with personal insight drawn from his time at Google, his experience as an entrepreneur and consultant, and his lectures at
