### **About Financial Accounting**

A step-by-step, practical guide on how to purchase your first investment property, written in easy-to-understand, conversational language that explains complex concepts simply. Most people believe that property is a great investment, but that in order to get into property you need money, contacts and experience. When you only see the barriers to entry, you tend to give up before you even try. Property investment expert Laurens Boel believes that with the right knowledge anyone can make money in property, regardless of the resources available to them. Financial Freedom Through Property is filled with practical tips, insider secrets and case studies. It explains the risks and rewards of property investing, how to make the right offer on property deals, raise capital, contract the right team, negotiate win-win scenarios, utilise innovative PropTech, find discounted properties and enjoy positive cash flows from day one. It also tells the story of how the author became one of the top property investors in South Africa – after being retrenched and going broke. Financial Freedom Through Property is an inspirational book for those who want to create a better financial future for themselves. You don't need to be a property mogul to make money on the property market – all you need is the willingness and the time to learn how to do it.

## **Accountants' Handbook, 1992 Supplement**

Mastering Financial Accounting Essentials is a text for people who need to use accounting information in their everyday jobs. They need to be able to understand the language and the law in order to talk to accountants and clients in an intellectual manner. Part One of the book uses an extended scenario to present the basics of financial accounting. McCrary creates a new business from scratch. By the end of the scenario (and the end of Part 1), readers will have reinvented double-entry book keeping. Along the way, readers can delve as deeply as they wish to learn more about inventory valuation methods (for example, LIFO verse FIFO) and the timing of erosion of the productive assets (for example, straight line depreciation verses double declining balance). As before, McCrary will emphasize a general understanding of the process and the reports. Part Two will use financial statements. Using the extended scenario above, McCrary shows how internal managers calculate ratios and trends to evaluate business efficiency. McCrary shows how bankers will review the statements to determine solvency.
