If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand—no prior programming experience required. Once you've mastered the basics of programming, you'll create Python programs that effortlessly perform useful and impressive feats of automation to: -Search for text in a file or across multiple files -Create, update, move, and rename files and folders -Search the Web and download online content -Update and format data in Excel spreadsheets of any size -Split, merge, watermark, and encrypt PDFs -Send reminder emails and text notifications -Fill out online forms Step-by-step instructions walk you through each program, and practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python*. Note: The programs in this book are written to run on Python 3.

CorelDraw 2019 Training Book

----- CorelDraw is introduced from the beginning, step by step, with lots of exercises. Easy learning by doing! Using this graphics program is almost playful, because this book is not a collection of material, but a training book, proven and developed from numerous computer

courses.----- Printed in full color.
With many pictures and illustrations.

----- From the content:
----- - Drawing tools: pen, brush,
eraser, spray can, polyline -----
Tools such as grids and guides for precise drawing
----- - Set colors and fillings, fill
patterns ----- - Effects for graphics
such as extruding, wrapping, fading, etc.
----- - Install pictures and clip art .
----- - Quantity text and graphic
text ----- - Create business cards,
leaflets, brochures, graphics -----

With lots of exercises, the material is explained step by step, to be understood on your PC.

----- Of course, a lot can be looked
up on the Internet today, but beginners usually do not know what is possible with a graphics program and therefore do not
even come up with the idea of looking for it, here the book takes the reader by the hand and shows exercise for exercise
the possibilities and drawing techniques.

----- After completing your
studies, you can not only draw private DVD stickers or birthday invitations, but also design professional applications, e.g.
company logos or advertising posters, for the latter our Built-Up Volume is recommended as an addition.

----- We have three books on
almost every version of CorelDRAW: a training book for the CorelDRAW graphics drawing program, a training book for the
Corel Photo-Paint photo program (for photo editing) included in the CorelDRAW Suite, and a Built-Up Volume for both with
more sophisticated exercises and techniques.

CiA Revision Series ECDL/ICDL Advanced AM4 Spreadsheets

Excel is the most popular and widely used productivity software in all business environments, and it is an irreplaceable companion in ordinary work as in the analysis of large amounts of complex data. Nevertheless, the majority of users knows and uses only a very limited number of features, often in an elementary way. This workbook shows in practice the use of a wide variety of formulas, functions and features (like pivot tables, macros or the Solver add-in) that allow to effectively and professionally work with Excel. The workbook starts with the basics and gets progressively to deal with very complex cases. It is a valuable support for college students, professionals and managers who want to learn the basics or to improve the knowledge of Excel up to an advanced level. In the dedicated web area, all the initial and solved files are available to carry out the exercises and check the solutions. Over 40 exercises are commented, to highlight the basic concepts and clarify the most complex ones. The authors are all lecturers for the course of Computer skills for economics at Università Bocconi in Milan: Massimo Ballerini, Alberto Clerici, Chiara Debernardi, Davide Del Corno, Maurizio De Pra, Gianluca Salviotti and Marco Sampietro.
