Advanced Placement Human Geography, 2020 Edition

Originally published in 1978. At the time this book was published, new towns were cropping up as a matter of public policy in "advanced industrial countries," yet the United States abandoned this project and deemed new towns "inappropriate and impractical for the American situation." The purpose of this book is to inform planners and policy makers around the world about French new towns. It analyzes what French new towns tried to accomplish; the administrative, financial, and political reforms needed to secure implementation of the program; and the achievements of the new towns. The author's evaluation of French new towns is undertaken with an eye to international applicability. Chapter 1 examines the reasons for adopting a policy of new towns in France. Chapter 2 concerns the administrative structure by which new towns are built in France. Chapter 3 concentrates on major economic associations with new towns. Chapter 4 discusses the role of the private sector in the development of new towns. Chapter 5 examines the major accomplishment of the French new towns: the achievement of socially balanced communities. In the United States, new towns have been proposed as a means for integrating low-income families into suburbs that are otherwise closed to them. The French experience demonstrates that socially heterogeneous new communities can be developed, even within the framework of a market system, if a sufficiently high priority is placed on the effort.

Michael Kuby's 6th edition of Human Geography in Action is comprised of 14 stimulating, concept-based chapters. The text aims to develop geographic problem-solving skills that prove valuable to readers. Each chapter begins with an introduction to a concept, followed by a case study tying the concept into the real world and wraps up with an activity. These engaging activities featured throughout the text further its "Do Geography" approach. Human Geography in Action provides the opportunity to: use GIS to investigate ethnic distributions and culture regions, track the AIDS epidemic over space and time, model interstate migration flows, simulate India's demographic future, add new baseball franchises, animate past urban growth and assess future growth areas.

This AP* Human Geography companion is filled with vocab, activities and assignments that follow Rubenstein's Cultural Landscape Twelfth Edition+ for all 13 chapters. Its activities can be used as regular weekly assignments or reviews. They can be used on short notice if there is a sub, or be assigned as regular homework. All you need is the textbook. Teachers can copy at will, or use the book as a student consumable. The rationale for having a workbook like this is that as publishers began putting much of their extra content online, a niche for traditional classwork was opened. Also, whether the textbook itself is written in ink or electrons, many students still find it valuable to write and keep notes for themselves on paper, and portfolios still matter. The activities in this workbook challenge students to apply the concepts, give examples, diagram every chapter, and think things through. Find TTT on FB.
