A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how about the fact that one of Andy Warhol's most enduring legacies involves Caroline Kennedy's moldy birthday cake

and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales, ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

Improve your iPad and iPhone workflows with automation! Version 1.1, updated 09/30/2020 Apple's Shortcuts app brings extensive automation capabilities to your iPhone or iPad, using a drag-and-drop, fill-in-the-blanks interface much like Automator on the Mac. It lets you perform sequences of tasks, including ones that span various apps, with just a tap or a voice command—or even automatically when certain conditions are met. Shortcuts can save you time and effort, help you accomplish previously complicated tasks, and let you customize your device to better meet your needs. And with iOS 14/iPadOS 14, Shortcuts has become even more powerful than before. But for all its utility, Shortcuts is not self-explanatory, so it can be challenging to figure out its quirks and create effective, time-saving automations. That's where Take Control of Shortcuts comes in. Written by automation expert Rosemary Orchard, this book opens the world of iOS/iPadOS automation to users at every level. With Rosemary's help, you'll learn how to:

- Navigate the Shortcuts app: Understand the user interface and terminology, then install and run your first shortcut.
- Run shortcuts: Discover seven different ways to run a shortcut, from tapping an icon to using Home automations and Siri.
- Build shortcuts: Start with simple, one-step shortcuts and work your way up to complex shortcuts with input, output, variables, conditionals, loops, and more. Debugging advice is also included.
- Install and sync shortcuts: Download and install shortcuts others have written, sync your shortcuts across your devices, and share them with other people. Then, to both illustrate the main principles you've learned and give you practical tools to get you started, Rosemary walks you step by step through the creation of 15 sample shortcuts, which you can also download and install using links in the book. Examples include:
  - Event templates
  - A daily overview
  - Converting and sharing images
  - Adding a song to a playlist
  - Logging expenses
  - Turning on lights automatically when you get home

The book also discusses how Shortcuts can use REST APIs to talk to various web services (with detailed examples), and complementary apps that work in conjunction with Shortcuts.

Whether you're completely new to automation or already have significant programming experience, you'll find plenty of useful information in this friendly, practical guide.
