The Distribution of Prime Numbers: Large Sieves and Zero-density Theorems

This peer-reviewed volume contains selected papers from the First EAGLE International Conference on Information Technologies for Epigraphy and Cultural Heritage, held in Paris between September 29 and October 1, 2014. Here are assembled for the first time in a unique volume contributions regarding all aspects of Digital Epigraphy: Models, Vocabularies, Translations, User Engagements, Image Analysis, 3D methodologies, and ongoing projects at the cutting edge of digital humanities. The scope of this book is not limited to Greek and Latin epigraphy; it provides an overview of projects related to all epigraphic inquiry and its related communities. This approach intends to furnish the reader with the broadest

possible perspective of the discipline, while at the same time giving due attention to the specifics of unique issues.

Religion, Spirituality and Everyday Practice

This book contains the papers presented at the International Joint Conference on Mechanics, Design Engineering and Advanced Manufacturing (JCM 2018), held on 20-22 June 2018 in Cartagena, Spain. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and nautical, aeronautics and aerospace design and modeling. The book is divided into six main sections, reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work; they are also intended to stimulate new research directions, advanced applications of the methods discussed, and future interdisciplinary collaborations.

The current generation of young adults, at least in the Western world, has shown a marked tendency toward a preference for describing themselves as “spiritual” as contrasted to “religious.” This book seeks to examine the possible meanings and consequences associated with this contrast in terms of the similarities and differences that affect those who use these terms with respect to the everyday practices that they themselves employ or believe should follow from being self-defined as “religious” or “spiritual” – or not. The several chapters in this volume take up the religious-spiritual contrast specifically through investigations into practice: In what ways do people who claim to be “religious” or “spiritual” define these self-images as manifest in their own lives? How on a daily basis does a person who considers himself or herself “religious” or “spiritual” live out that self-image in specific ways that she or he can describe to others, even if not share with others? Are there ways that being “spiritual” can involve religion or ways that being “religious” can involve spirituality, and if so, how do these differ from concepts in prior eras (e.g., Ignatian spirituality, Orthodox spirituality, Anglican spirituality, etc.)? We also explore if there are institutions of spiritual practice to which those who term themselves “spiritual” turn, or if the difference implied by these terms may instead be between institutionalized and de-institutionalized expressions of practice, including but not limited to self-spiritualities.

The User in Focus

Chad Gamble, all-star pitcher for the Nationals, is one of the best players on-and off-the field. And right now, the notorious bad boy wants Bridget Rodgers. But with her lush curves and snappy comebacks, the feisty redhead is the kind of woman a man wants to settle down with and that's the last thing Chad needs. When the paparazzi catch them in a compromising position, Chad's manager issues an ultimatum: clean up his act or kiss his multi-million dollar contract goodbye. To save his career, his meddling publicist says he'll have to convince everyone Bridget isn't just his flavor of the week, but his girlfriend. Being blackmailed into a fake relationship with Chad Gamble isn't easy, especially when the sizzling physical attraction between them is undeniable. With a month to go on their arranged pretense, it's going to take every ounce of willpower they have not to fall into bed together or in love.

India, a Travel Guide

A sudden death, a never-mailed postcard, and a longburied secret set the stage for a luminous and heartbreakingly real novel about lost souls finding one another The Darby-Jones boardinghouse in Ruby Falls, New York, is home to Mona Jones and her daughter, Oneida, two loners and self-declared outcasts who have formed a perfectly insular family unit: the two of them and the three eclectic boarders living in their house. But their small, quiet life is upended when Arthur Rook shows up in the middle of a nervous breakdown, devastated by the death of his wife, carrying a pink shoe box containing all his wife's mementos and keepsakes, and holding a postcard from sixteen years ago, addressed to Mona but never sent. Slowly the contents of the box begin to fit together to tell a story—one of a powerful friendship, a lost love, and a secret that, if revealed, could change everything that Mona, Oneida, and Arthur know to be true. Or maybe the stories the box tells and

the truths it brings to life will teach everyone about love—how deeply it runs, how strong it makes us, and how even when all seems lost, how tightly it brings us together. With emotional accuracy and great energy, *This Must Be the Place* introduces memorable, charming characters that refuse to be forgotten.

I wanted to compute 80th term of the Fibonacci series. I wrote the rampant recursive function, `int fib(int n){ return (1==n || 2==n) ? 1 : fib(n-1) + fib(n-2); }` and waited for the result. I wait... and wait... and wait... With an 8GB RAM and an Intel i5 CPU, why is it taking so long? I terminated the process and tried computing the 40th term. It took about a second. I put a check and was shocked to find that the above recursive function was called 204,668,309 times while computing the 40th term. More than 200 million times? Is it reporting function calls or scam of some government? The Dynamic Programming solution computes 100th Fibonacci term in less than fraction of a second, with a single function call, taking linear time and constant extra memory. A recursive solution, usually, neither pass all test cases in a coding competition, nor does it impress the interviewer in an interview of company like Google, Microsoft, etc. The most difficult questions asked in competitions and interviews, are from dynamic programming. This book takes Dynamic Programming head-on. It first explain the concepts with simple examples and then deep dives into complex DP problems.

This book focuses on the human aspects of wearable technologies and game design, which are often neglected. It shows how user centered practices can optimize wearable experience, thus improving user acceptance, satisfaction and engagement towards novel wearable gadgets. It describes both research and best practices in the applications of human factors and ergonomics to sensors, wearable technologies and game design innovations, as well as results obtained upon

integration of the wearability principles identified by various researchers for aesthetics, affordance, comfort, contextual-awareness, customization, ease of use, ergonomics, intuitiveness, obtrusiveness, information overload, privacy, reliability, responsiveness, satisfaction, subtlety, user friendliness and wearability. The book is based on the AHFE 2018 Conference on Human Factors and Wearable Technologies and the AHFE 2018 Conference on Human Factors in Game Design and Virtual Environments , held on July 21-25, 2018 in Orlando, Florida, and addresses professionals, researchers, and students dealing with the human aspects of wearable, smart and/or interactive technologies and game design research.

With vivid photography and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of

Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolize the formless world of pure knowledge and perfection.

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

It has become widely accepted among musicologists that medieval music is most profitably studied from interdisciplinary perspectives that situate it within broad cultural contexts. The origins of this consensus lie in a decisive reorientation of the field that began approximately four decades ago. For much of the twentieth century, research on medieval music had focused on the discovery and evaluation of musical and theoretical sources. The 1970s and 1980s, by contrast, witnessed calls for broader methodologies and more fully contextual approaches that in turn anticipated the emergence of the so-called 'New Musicology'. The fifteen essays in the present collection explore three interrelated areas of inquiry that proved particularly significant: the liturgy, sources (musical and archival), and musical symbolism. In so doing, these essays not only acknowledge past achievements but also illustrate how this broad, interdisciplinary approach remains a source for scholarly innovation.

In this six-session small group Bible study (DVD/digital video sold separately), Andy Stanley challenges us to stop flirting with disaster and establish personal guardrails. Guardrails. They're everywhere, but they don't really get much attention until somebody hits one. And then, more often than not, it is a lifesaver. Ever wonder what it would be like to have guardrails in other areas of your life—areas where culture baits you to the edge of disaster and then chastises you when you step across the line? Your friendships. Your finances. Your marriage. Maybe your greatest regret could have been avoided if you had established guardrails. In this six-session video-based small group bible study, Andy Stanley challenges us to stop flirting with disaster and establish some personal guardrails. Sessions include: Direct and Protect (20:00) Why Can't We Be Friends? (18:30) Flee Baby Flee! (21:30) Me and the Mrs. (15:00) The Consumption Assumption (19:00) Once and for All (17:30) Designed for use with the Guardrails Video Study (sold separately).

Feeling limited by circumstances, substances, or behaviors often leads to the simple, yet profound question, "Is this all there is?" This question is an opportunity to rediscover one's truth and live life more fully and authentically. Spirit Recovery Medicine Bag offers readers a path to finding their personal answer to this question in an engaging two-part format. In Part One, readers will join Lee McCormick as he reflects on his personal journey of recovery and transformation—a journey that initiated him into a life of helping others recover their own sense of self and purpose. Part Two is a medicine bag of healing practices designed to guide readers in developing self-awareness and awakening their sense of power—specifically the power of choice rooted in personal values and commitment to living those values. Covering a variety of topics addressing

spirituality, awareness, and consciousness, the authors pose questions for reflection and self-investigation along the way. Spirit Recovery Medicine Bag is not a negation of Twelve-Step recovery, but a tool for expanding awareness and increasing involvement regardless of the path one is walking. In Twelve-Step language, it builds on Step 12's direction to practice these principles in all one's affairs. The authors believe that the inner journey to one's truth and the creative expression of that truth make for a good definition of spirituality, and they offer readers a very real message of the possibility of living "happy, joyous, and free" through spirit recovery.

The Audi quattro is a design landmark. When the car first appeared in 1980 it caused a sensation. Audi's obsession with technical innovation resulted in a turbocharged four-wheel-drive machine that revolutionized rallying and took road car handling and grip to a new level. The quattro won on its rally debut, and went on to win four world titles. The quattro's rallying career ended in 1986 with the banning of Group B, although road car production continued, and more than 11,000 cars were built in total. This beautifully designed book tells the full road car and competition story.

Engineering Mathematics Through Applications

Until Expectations May You Part Giddy with excitement and burning with love's fire, engaged couples are filled with desires and expectations! Wonder and eager anticipation propel them forward. Then comes the marriage and if they take the wrong approach, those unrealized expectations and unmet wants can turn a life-giving covenant relationship into a dead-end contractual agreement. Suddenly your marriage has no love, joy, or peace. In this marriage-makeover DVD and study guide from Northpoint Resources, Andy Stanley's three key teachings help you transform your expectations and examine the "I's" of marriage: "Keeping My 'I' On You," "Putting Your 'I' Out," and "It Takes Three." Broken into six DVD sessions with discussion questions, this is one lesson your marriage won't survive without. Until Expectations Do Us Part Standing at the altar we all had a picture of what our marriage would look like. The problem is this picture of marriage ends up as expectations that we unload on our spouse. The weight of these expectations will rob your marriage of love and joy. As a spouse you never feel like you measure up and you never feel like you are good enough. So what are you to do with your expectations? You can't deny them because most expectations started out as God-given desires. In this six-session companion study guide to the DVD, Andy Stanley explains that you must instead learn to transform your expectations and look to God if you are to experience marriage as it was designed. This study guide is complete with a leader's guide and six lessons including conversation-starting exercises, discussion questions and application steps. Story Behind the Book Andy Stanley is the senior pastor of three North Point Ministries campuses, with a cumulative congregation of more than twenty thousand. As couples voiced their various marital struggles to him, the common root problem became undeniably clear. The "me" syndrome, or the "I" effect, was tearing apart husbands and wives who were once head-over-heels in love. To help

couples step back from their immediate circumstances and realize the bigger picture, he preached a series called "iMarriage." This DVD and study guide will empower couples everywhere to transform their marriages into the one God intends for them.

The ways of magic are revealed in nature . . . The secrets are written in meandering streams and drifting clouds, whispered by the roaring ocean and cooling breeze, echoed through caves and rocks and forests. When you draw a heart in the sand, call on the four winds for assistance, or ask the rain to wash away a bad habit, you are practicing earth magic. By working in harmony with nature, we can transform ourselves, our lives, and our world. This tried-and-true guide offers more than one hundred spells, rites, and simple rituals you can perform using the powerful energy of the earth. Scott Cunningham was a greatly respected teacher and one of the most influential members of the modern Craft movement. A practitioner of elemental magic for twenty years, he wrote more than fifty books, including the seminal *Wicca: A Guide for the Solitary Practitioner*.
