Linkage Inc's Best Practices in Leadership Development Handbook

In this explosive series from New York Times bestseller Harold Coyle and noted military author Barrett Tillman, a new type of war is being fought by private paramilitary companies at the beck and call of the highest bidder. With its military and intelligence agencies spread thin, the United States constantly calls upon the services of these organizations--and Strategic Solutions, Inc. is among the best. After a few bloody and unprofitable contracts, SSI is faced with a financial crisis. Forced to take contracts from less than reputable clients, the upper management and field agents find themselves in a labor dispute. When the Israeli government offers SSI an opportunity to help Druze militias in southern Lebanon fend off encroachment by Hezbollah, they know it's a fragile situation. If the truth were known, the international outcry against Israel would be deafening. Forced to work with a government whose ultimate motives are unclear, SSI takes the job and descends into a shadowy no-man's-land of tangled alliances and hostilities. Meanwhile, Hezbollah elements are planning their most audacious strike yet, assembling teams to detonate suitcase nukes in contested areas of Lebanon, hoping to destabilize the entire country. Caught between two elements of an age-old conflict, the battles the SSI fights may be a diversion. Globalization has jarred the traditional role and competitiveness of small- and medium-sized enterprises. This masterful volume comprises leading scholars, policy makers and business leaders who have new insights and strategies for SMEs creating opportunities rather than being victims of globalization. The result is a breakthrough in our understanding of entrepreneurship in the global context. David B. Audretsch, Indiana University, Bloomington, US and WHU, Germany Small and medium-sized enterprises (SMEs) often have difficulty competing in the global economy unless they collaborate with domestic or foreign partners or with public sector organizations. This book addresses the resource leverage and innovation challenges that increased global trade represents for SMEs. In doing so, it explores how SMEs can become more competitive at home and in foreign markets as stand-alone firms or as members of supplier and customer networks. SMEs

are turning increasingly to innovation as a source of competitive advantage in order to protect their home markets and participate in expanding foreign markets. The contributors to this volume leading experts in entrepreneurship, innovation, and international business provide in-depth coverage of the most compelling issues facing SMEs. These include: innovation as a competitive strategy, network dynamics, ways to leverage technology, internationalization, and the role of the public sector in helping SMEs to overcome resource deficiencies. This comprehensive look at SMEs in the global marketplace will be of great interest to academics who study entrepreneurship, innovation, or international business, officials from public sector agencies with responsibility for helping SMEs to internationalize and become more innovative, and senior executives of SMEs or executives of larger companies who are considering collaboration with SMEs.

In Prometheus's Child, the first in an explosive series from New York Times bestseller Harold Coyle and noted military author Barrett Tillman, a new type of war is being fought by private paramilitary companies at the beck and call of the highest bidder. With the military and intelligence agencies spread thin, the United States is constantly calling upon the services of these organizations--and Strategic Solutions Inc. is among the best. What begins as a relatively simply military-training mission in Chad turns into a high-stakes game of nuclear brinkmanship as the men and women of Security Solutions, Inc. stumble across a plot to extract and ship yellowcake—the base fuel for a nuclear weapon—to any number of countries hostile to the US. The in-country force tracks the operation to a supposedly abandoned remote mine in the desert. They strike, but a convoy carrying the yellowcake shipment escapes their trap. With time running out, the SSI teams must pull together like they never have before to find a ship in international waters and recover its deadly cargo—by any means necessary.
