with a liquid solution, either alcohol or Betadine. and low blood sugar in people with diabetes.

Dental Cavity Risk Quiz - Delta Dental

If you take your blood sugar before you eat breakfast in the morning (and you haven't eaten in 8 hours), see your doctor if your blood sugar is over 100 mg/dL, which may indicate pre-diabetes. However, this reading could be artificially high if you had a big dinner or a lot of alcohol the night before.

Senior Health: Tips for Successful Aging

Cavity Risk Assessment Quiz. Tooth decay, or dental caries, is caused by bacteria that live in the sticky material known as plaque that builds up on your teeth. When you eat, the bacteria in plaque use the sugars in your food to produce acids that eat away at the tooth enamel. Enamel is the protective outer surface of the tooth.
