## **Focus on Farming**

Every day I watch my farm burn. Day after day, the sky is a relentless, empty blue. As our land dries up, all my hopes have turned to vapour, lost in that wide, blue yonder. And so begins Doug Avery's story of emotional resilience in the face of what at times seemed a hopeless situation. The South Island farmer suffered terribly during eight years of drought. His farm was depleted and so was he, to the point of severe depression. The Resilient Farmer is Doug's powerful example of how to get life back on track. With candour and wisdom, he tells his story of turning desperation into determination, embracing risk, navigating change and, on top of everything, enduring monumental earthquakes. An inspiring tale of how one

man overcame heartbreaking adversity to live a fruitful life and help others.

### **Bobcat Fifty Years**

In this volume Stanley P. Young completes his series of monographs on the major predatory mammals of North America. As in his earlier works, *The Wolves of North America*; *The Puma, Mysterious American Cat*; and *The Clever Coyote*, Mr. Young writes with the authority of a field biologist who has studied his subjects for more than a quarter of a century in the intimacy of their own habitat, from coast to coast and from the northern limits of their range in Alaska and Canada to the deserts of Mexico. Mr. Young, now Director of Bird and Mammal Laboratories in the Branch of Wildlife Research of the U.S. Fish and Wildlife Service, began his career as a biologist in the old Bureau of Biological Survey when much of the activity of that agency hinged around the control of predatory animals. In this and in later capacities he has probably handled, weighed, measured, and studied more specimens, alive and dead, of the bobcat in its many races than any other scientist. In addition to his own wide experiences he has drawn upon the wealth of records and field observations of farmers, stockmen, trappers, predator hunters,

state and federal biologists, and wildlife technicians in the files of the U.S. Fish and Wildlife Service. The book is a complete scientific study of the subject from every angle, interestingly spiced with anecdotes from the author's own rich personal experience. How big is a "big" bobcat? How serious is bobcat predation on game animals? How can a small bobcat pull down and kill a deer five times its own weight? What are the habits and habitat of the bobcat? What are the ranges of its various scientifically recognized races? All of these questions and many more are answered in the pages of this generously illustrated book.

This book provides a clear understanding of the nuts and bolts of valuation approaches for business investments, including market, income and asset-based methods. It reviews tools that arbitrators may employ to reach their final compensation assessment on a principled basis. The book and its many practical recommendations explore the decision making processes entailed in three central aspects of the arbitrator and its role: and its advance planning to enhance understanding of expert valuation evidence; and its identification of and its apples-to-oranges and its miscomparisons; and its recognition of the true comparability between the business at issue and other examples offered in the expert evidence. The presentation focuses not only on the legal standards applicable to the valuation (full or adequate compensation, reparations, restitution, actual loss, fair

market value, fair or reasonably equivalent value, lost profits, etc.), but also on the informed judgment and reasonableness that must enter into the process of weighing the facts of each case and determining its aggregate significance. The book considers common valuation methods like discounted cash flows, adjusted present values, capitalized cash flows, adjusted book values and comparable sales and transactions. Additionally, it addresses means for arbitrators to assess expert valuation evidence in complex business investment disputes. andquot;Best book 2008 of the OGEMID awards!andquot;

### **Foodborne Parasites**

Why givers - not takers or matchers - win big. Perfect for anyone who enjoyed QUIET or THINKING FAST AND SLOW. The motivations behind today's most successful leaders and entrepreneurs come to a simple yet decisive explanation: there are people who give, people who take, people who match, and people who fake. Our world is filled with these givers, takers, matchers and fakers. Amazingly, those who succeed (not only personally but for their clients and companies) don't take or match. They give. (Although they're not necessarily philanthropic.) GIVE AND TAKE presents the fascinating secrets to givers' success. The results are unequivocal: givers gain big. Jack Welch, Richard Branson, Jon Huntsman Sr. - all of them are givers. In a world in which so many takers such as Bernard Madoff and Raj Rajaratnam have ruined lives and reputations, this book will reassure readers that the real power lies in becoming a giver. Since the vast majority of people aren't born givers, Grant not only presents the case for why givers win, he also offers their hidden strategies for winning.

joined over the years by Bobcat excavators and trenchers, utility trucks and more. Bobcat Fifty Years chronicles the changes and innovations that have kept the company at the forefront of the nation's compact machinery makers--from the invention of the Bob-Tach quick-change attachment system to the introduction of the Big Bob, the Mini-Bob, and the M-700, the first hydrostatic loader of its size. Here, again and again, is evidence of why Fortune Magazine named the Bobcat one of "America's best"--one of the 100 American-made products that represent the best of their kind, anywhere in the world.

illustrates the impetus given to (and the limitations placed upon) discovery and invention by pastoral, agricultural, feudal, capitalist, and socialist systems, and conversely the ways in which science has altered economic, social, and political beliefs and practices. In this first volume Bernal discusses the nature and method of science before describing its emergence in the Stone Age, its full formation by the Greeks and its continuing growth (probably influenced from China) under Christendom and Islam in the Middle Ages. Andrew Brown, Bernal's biographer, with a nice sense of paradox, has said of him, he 'was steeped in history, in part because he was always thinking about the future.' He goes on to say, 'Science in History is an encyclopaedic, yet individual and colourful account of the emergence of science from pre-historic times. There is detailed coverage of the scientific revolution of the Enlightenment, the Industrial Age and the first two-thirds of the twentieth century. . . The writing flows and is devoid of the tortured idioms that mar so many academic histories of science. After reading it, it is easy to agree with C. P. Snow's orotund observation that Bernal was the last man to know science. Faber Finds are reissuing the illustrated four volume edition first published by Penguin in 1969. The four volumes are: Volume 1: The Emergence of Science, Volume 2: The Scientific and Industrial Revolutions, Volume 3: The Natural Sciences in Our Time, Volume 4: The Social Sciences: Conclusion. 'This stupendous work . . . is a magnificent synoptic view of the rise of science and its impact on society which leaves the reader awe-struck by Professor Bernal's encyclopaedic knowledge and historical sweep.' Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.
