Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

Praised for its authoritative coverage, Global Political Economy places the study of international political economy (IPE) in its broadest theoretical context now updated to cover the continuing global economic crisis and regional relationships and impacts. This text not only helps students understand the fundamentals of how the global economy works but also encourages them to use theory to more fully grasp the connections between key issue areas like trade and development. Written by a leading IPE scholar, this text equally emphasizes theory and practice to provide a framework for analyzing current events and long-term developments in the global economy. New to the Seventh Edition Focuses on the ongoing global economic crisis and the continuing European sovereign debt crisis, along with other regional economic issues, including their implications for relationships in the global economy. Offers fuller and updated discussions of critical perspectives like feminism and environmentalism, and includes new material differentiating among the terms neomercantilism, realism, mercantilism, and economic nationalism. Updated, author-written Test Bank is provided to professors as an e-Resource on the book's Webpage.

Intermediate Accounting, 3e, by Spiceland/Sepe/Tomassini will gain support in traditional and technology-driven accounting departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts via CD-ROM. The revision of this text is based around a "Learning System." The revision of this "Learning System" was built on improving the clarity of the chapters, emphasizing more decision-making in order to prepare students for the changes taking place on the CPA exam, acknowledging the diversity of students and their learning styles by creating supplemental materials to assure the success of every student, and creating a consistent text and supplemental package for both students and instructor's giving us the best possible intermediate text on the market. Returning to the Third edition is the award winning "Coach" CD-ROM. The Coach CD-ROM is a multimedia product integrating audio and video clips, animated illustrations, cases, and alternative reading material that helps students comprehend some of the more difficult topics associated with intermediate accounting. Designed specifically for the Spiceland text, instructors and students will find these learning tools placed strategically throughout the text. This is the most comprehensive Learning System in Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied.

"Platform Scale explains the design of a family of emerging digital business models that enables today's startups to achieve rapid scale: the platform business model. The many manifestations of the platform business model - social media, the peer economy, cryptocurrencies, APIs and developer ecosystems, the Internet of things, crowdsourcing models, and many others - are becoming increasingly relevant. Yet, most new platform ideas fail because the business design and growth strategies involved in building platforms are not well understood. Platform scale is a builder's manual for anyone building a platform business today. It lays out a structured approach to designing and growing a platform business model and addresses the key factors that lead to the success and failure of these businesses."--back cover.

Architect of 'Operation Flood', the largest dairy development programme in the world, Dr Verghese Kurien has enabled India to become the largest milk producer in the world. A man with a rare vision, Dr Kurien has devoted a lifetime to realizing his dream - empowering the farmers of India. He has engineered the milk

cooperative movement in India. It was a sheer quirk of fate that landed him in Anand where a small group of farmers were forming a cooperative, Kaira District Cooperative Milk Producers' Union Limited (better known as Amul), to sell their milk. Intrigued by the integrity and commitment of their leader, Tribhuvandas Patel, Dr Kurien joined them. Since then there has been no looking back. The 'Anand pattern of cooperatives' were so successful that, at the request of the Government of India, he set up the National Dairy Development Board to replicate it across India. He also established the Gujarat Cooperative Milk Marketing Federation to market its products. In these memoirs, Dr Verghese Kurien, popularly known as the 'father of the white revolution', recounts, with customary candour, the story of his life and how he shaped the dairy industry. Profoundly inspiring, these memoirs help up comprehend the magnitude of his contributions and his multifaceted personality.

How to Get Government Contracts demystifies the process of how a company can enter the government market, win its first and subsequent contracts, and then grow itself into a multi-million-dollar government contractor within a couple of years. It offers an insider's view into the latest best practices that government contractors use to succeed in an increasingly competitive market, and it shows exactly how your company can apply these techniques to build a strong business. Many companies venture into the government market with a certain naiveté and pay a hefty price to find out that there is much more to winning a contract than writing last-minute proposals in response to publicly posted solicitations. To stop the bleeding of precious resources, they need to step back to learn how professionals win business in the federal arena. This book shows you how to find, for example, the best potential customers and opportunities for your company. It also explains the secret to winning consistently by conducting pre-proposal preparation (also called "capture") and practicing a disciplined, process-based approach to proposal development. This book provides a recipe for winning government contracts over and over again, the way seasoned government contractors do it. After reading this book, you will know exactly what to do to position your company to win a government proposal before a solicitation becomes public, including building customer relationships, gathering intelligence, developing a "win strategy," performing competitive analysis, selecting the best teammates, and developing a solution. As a result, you will apply professional

techniques to organizing your proposal effort, outlining a proposal document, and writing RFPs that persuade evaluators to award the contract to you.
