Not Like a Native Speaker

Today, in a variety of post-conflict settings international advocates for women's rights have focused on bringing issues of sexual violence, discrimination and exclusion into peace-making processes. 'On the Frontlines' consider such policies and assess the extent to which they have had success in improving women's lives.

On the Frontlines

"The ready availability of donated sperm and eggs has made possible an entirely new form of family. Children of the same donor and their families, with the help of the internet, can now locate each other and make contact. Sometimes this network of families form meaningful connections that blossom into longstanding groups, and close friendships. This book is about unprecedented families that have grown up at the intersection of new reproductive technologies, social media and the human desire for belonging. Random Families asks: Do shared genes make you a family? What do couples do when they discover that their children shares half their DNA with a dozen or more other offspring from the same sperm donor? What do kids find in common with their donor siblings? What becomes of these chance networks once parents and donor siblings find one another? Based on over 350 interviews with children (ages 10-28) and their parents from all over the U.S., Random Families chronicles the chain of choices that couples and single mothers make from what donor to use to how to participate (or not) in donor sibling networks. Children reveal their understanding of a donor, the donor's spot on the family tree and the meaning of their donor siblings. Through rich first-person accounts of network membership, the book illustrates how these extraordinary relationships -- woven from bits of online information and shared genetic ties -- are transformed into new possibilities for kinship. Random Families offers down-to-earth stories from real families to highlight just how truly distinctive these contemporary new forms of family are." -- Publisher's description

A Manual of Pathological Anatomy, Volumes 1-2

Completely revised by new authors, this Fifth Edition presents 100 patient cases designed specifically to prepare students for clinical vignettes on the USMLE Step 1. Each case proceeds from chief complaint through diagnostic workup and treatment and includes buzzwords in history taking, physical examination, laboratory tests, imaging, and pathology. This edition's cases give greater emphasis to pathogenesis, epidemiology, differential diagnosis, management, and complications and include radiologic images, photographs, tables, and algorithms. A new two-page format encourages students to read the case presentation and formulate an initial diagnosis before turning the page for the answer. The book ends with twenty all-new board-format questions and answers.

No federal law in the United States requires that egg or sperm donors or recipients exchange any information with the offspring that result from the donation. Donors typically enter into contracts with fertility clinics or sperm banks which promise them anonymity. The parents may know the donor's hair color, height, IQ, college, and profession; they may even have heard the donor's voice. But they don't know the donor's name, medical history, or other information that might play a key role in a child's development. And, until recently, donor-conceived offspring typically didn't know that one of their biological parents was a donor. But the secrecy surrounding the use of donor eggs and sperm is changing. And as it does, increasing numbers of parents and donor-conceived offspring are searching for others who share the same biological heritage. When donors, recipients, and "donor kids" find each other, they create new forms of families that exist outside of the law. The New Kinship details how families are made and how bonds are created between families in the brave new world of reproductive technology. Naomi Cahn, a nationally-recognized expert on reproductive technology and the law, shows how these new kinship bonds dramatically exemplify the ongoing cultural change in how we think about family. The issues Cahn explores in this book will resonate with anyone—and everyone—who has struggled with questions of how to define themselves in connection with their own biological, legal, or social families.

I Have A Guardian Angel In Heaven I Call Him Dad

Whether or no, she, whom you are to forgive, if you can, did or did not belong to the Upper Ten Thousand of this our English

world, I am not prepared to say with any strength of affirmation. By blood she was connected with big people, -distantly connected with some very big people indeed, people who belonged to the Upper Ten Hundred if there be any such division; but of these very big relations she had known and seen little, and they had cared as little for her. Her grandfather, Squire Vavasor of Vavasor Hall, in Westmoreland, was a country gentleman, possessing some thousand a year at the outside, and he therefore never came up to London, and had no ambition to have himself numbered as one in any exclusive set. A hot-headed, ignorant, honest old gentleman, he lived ever at Vavasor Hall, declaring to any who would listen to him, that the country was going to the mischief, and congratulating himself that at any rate, in his county, parliamentary reform had been powerless to alter the old political arrangements. Alice Vavasor, whose offence against the world I am to tell you, and if possible to excuse, was the daughter of his younger son; and as her father, John Vavasor, had done nothing to raise the family name to eminence, Alice could not lay claim to any high position from her birth as a Vavasor

Juror's Handbook

Red Families v. Blue Families identifies a new family model geared for the post-industrial economy. Rooted in the urban middle class, the coasts and the "blue states" in the last three presidential elections, the Blue Family Paradigm emphasizes the importance of women's as well as men's workforce participation, egalitarian gender roles, and the delay of family formation until both parents are emotionally and financially ready. By contrast, the Red Family Paradigm--associated with the Bible Belt, the mountain west, and rural America--rejects these new family norms, viewing the change in moral and sexual values as a crisis. In this world, the prospect of teen childbirth is the necessary deterrent to premarital sex, marriage is a sacred undertaking between a man and a woman, and divorce is society's greatest moral challenge. Yet, the changing economy is rapidly eliminating the stable, blue collar jobs that have historically supported young families, and early marriage and childbearing derail the education needed to prosper. The result is that the areas of the country most committed to traditional values have the highest divorce and teen pregnancy rates, fueling greater calls to reinstall traditional values. Featuring the groundbreaking research first hailed in *The New Yorker*, this penetrating book will transform our understanding of contemporary American culture and law. The authors show how the Red-Blue divide goes much deeper than this value system conflict--the Red States have increasingly said "no" to Blue State legal norms, and, as a result, family law has been rent in two. The authors close with a consideration of where these different family systems still overlap, and suggest solutions that permit rebuilding support for both types of families in changing economic circumstances. Incorporating results from the 2008 election, *Red Families v. Blue Families* will reshape the debate surrounding the culture wars and the emergence of red and blue America.

Test Tube Families

The birth of the first test tube baby in 1978 focused attention on the sweeping advances in assisted reproductive technology (ART), which is now a multi-billion-dollar business in the United States. Sperm and eggs are bought and sold in a market that has few barriers to its skyrocketing growth. While ART has been an invaluable gift to thousands of people, creating new families, the use of someone else's genetic material raises complex legal and public policy issues that touch on technological anxiety, eugenics, reproductive autonomy, identity, and family structure. How should the use of gametic material be regulated? Should recipients be able to choose the "best" sperm and eggs? Should a child ever be able to discover the identity of her gamete donor? Who can claim parental rights? Naomi R. Cahn explores these issues and many more in Test Tube Families, noting that although such questions are fundamental to the new reproductive technologies, there are few definitive answers currently provided by the law, ethics, or cultural norms. As a new generation of "donor kids" comes of age, Cahn calls for better regulation of ART, exhorting legal and policy-making communities to cease applying piecemeal laws and instead create legislation that sustains the fertility industry while simultaneously protecting the interests of donors, recipients, and the children that result from successful transfers.

The Early Modern English Period

Seminar paper from the year 2006 in the subject English Language and Literature Studies - Linguistics, grade: 2,0, University of Duisburg-Essen, course: Aspects of the History of English, 13 entries in the bibliography, language: English, abstract: This work should give a short overview of the Early Modern English Period. It should give an idea how and when this period developed and which were the certain aspects of development. This will be followed by some examples of changes and developments in linguistics. These examples will be from the areas of phonology, morphology and vocabulary. During this period there were several groups of authors which should be regarded. Which famous and still-known authors were parts of which group? What was characteristic or special for each group or the period of time when it occurred? This will be followed by a short chapter about William Shakespeare who was an important person at that time and in his works one can also see linguistic changes.

The history of Asbury Park is a veritable roller coaster of challenge, triumph and change. In 1871, there was nothing but marshes and sand dunes between the sinful city of Long Branch and the holy haven of Ocean Grove, but for devout Methodist James Bradley, the deserted beachfront was a new Promised Land. Thus, the resort community Asbury Park was born as a wholesome entertainment and relaxation center for middle-class, white Protestant America. From bicycles and baby parades to brawlers and bootleggers, Bilby and Ziegler trace Asbury Park's cycles of transformation from peaceful resort to raucous amusement park, from empty boardwalk to modern, bustling center of business.

An English School Approach to the Globalization of Regional Orders

Although the era of European colonialism has long passed, misgivings about the inequality of the encounters between European and non-European languages persist in many parts of the postcolonial world. This unfinished state of affairs, this lingering historical experience of being caught among unequal languages, is the subject of Rey Chow's book. A diverse group of personae, never before assembled in a similar manner, make their appearances in the various chapters: the young mulatto happening upon a photograph about skin color in a popular magazine; the man from Martinique hearing himself named "Negro" in public in France; call center agents in India trained to Americanize their accents while speaking with customers; the Algerian Jewish philosopher reflecting on his relation to the French language; African intellectuals debating the pros and cons of using English for purposes of creative writing; the translator acting by turns as a traitor and as a mourner in the course of cross-cultural exchange; Cantonese-speaking writers of Chinese contemplating the politics of food consumption; radio drama workers straddling the forms of traditional storytelling and mediatized sound broadcast. In these riveting scenes of speaking and writing imbricated with race, pigmentation, and class demarcations, Chow suggests, postcolonial languaging becomes, de facto, an order of biopolitics. The native speaker, the fulcrum figure often accorded a transcendent status, is realigned here as the repository of illusory linguistic origins and unities. By inserting British and post-British Hong Kong (the city where she grew up) into the languaging controversies that tend to be pursued in Francophone (and occasionally Anglophone) deliberations, and by sketching the fraught situations faced by those coping with the specifics of using Chinese while negotiating with English, Chow not only redefines the geopolitical boundaries of postcolonial inquiry but also demonstrates how such inquiry must articulate historical experience to the habits, practices, affects, and imaginaries based in sounds and scripts.

Red Families v. Blue Families

What does it mean to have a child born through donor conception? Does it mean different things for heterosexual parents and lesbian parents? What is it like for the 'non-genetic' parent? How do grandparents feel about having a grandchild who is conceived with the help of an egg, sperm or embryo donor? Since 1991 more than 35,000 children have been born in the UK as a result of donor conception. This means that more and more families are facing the issue of incorporating 'relative strangers' into their families. In this path breaking book, the authors explore the lived reality of donor conception in families by using in-depth interviews with parents and grandparents of donor conceived children. With reproductive medical technologies becoming more accessible, assisted donor conception is raising new and important questions about family life. This book will provide compelling reading for all those interested in the family, kinship, gender and sexuality, new

reproductive technologies, and genetics.
