This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements. It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

Theory of Machines

Originally published in 1989. The pursuit of excellence is much discussed with reference to education, but the question remains, 'How can a school become excellent?' This book demonstrates that excellence depends on good management which, in turn, depends not only on a clear understanding of good management theory, but on the ability to translate theory into practice. The authors offer

profound insights into three crucial areas of leadership: culture, structure, and public accountability. Drawing on areas outside education, such as advertising and business, they discuss many innovations that are already current - flexitime, the vertical curriculum, mastery learning, community support - and depict ways in which these can be brought together into a total educational experience. More strikingly, however, they look ahead, examining the potential changes to our concept of schooling: for instance those brought about by the growth of information technology. This book emphasises that at the heart of outstanding schooling are visionary leadership, a clear sense of purpose, and creatively conceived and flexible support structures.

Slang is often seen as a lesser form of language, one that is simply not as meaningful or important as its 'regular' counterpart. Connie Eble refutes this notion as she reveals the sources, poetry, symbolism, and subtlety of informal slang expressions. In *Slang and Sociability*, Eble explores the words and phrases that American college students use casually among themselves. Based on more than

10,000 examples submitted by Eble's students at the University of North Carolina at Chapel Hill over the last twenty years, the book shows that slang is dynamic vocabulary that cannot be dismissed as deviant or marginal. Like more formal words and phrases, slang is created, modified, and transmitted by its users to serve their own purposes. In the case of college students, these purposes include cementing group identity and opposing authority. The book includes a glossary of the more than 1,000 slang words and phrases discussed in the text, as well as a list of the 40 most enduring terms since 1972. Examples from the glossary: group gropes -- encounter groups squirrel kisser -- environmentalist Goth -- student who dresses in black and listens to avant-garde music bad bongos -- situation in which things do not go well triangle -- person who is stupid or not up on the latest za -- pizza smoke -- to perform well dead soldier -- empty beer container toast -- in big trouble, the victim of misfortune parental units -- parents

In this Bolton Brothers book, first comes the baby...and maybe then comes marriage? He'd never expected to see Stella Caine again. After one wild night, she'd walked away—right after revealing that her father was the one man who could threaten the biggest business deal of Bobby Bolton's career. So Bobby left her alone. Until now. Now Stella is pregnant and staying in his condo. This is a complication that can be solved only one way: marriage. Bobby wants to do the right thing. Hell, he wants her—has never stopped wanting her. Surely he can convince her to say yes, even without those three little words....

Hauptbeschreibung Delivering humanitarian aid has become a complex issue in contemporary politics and practice. The expansion of the humanitarian field caused by an increasing number of humanitarian actors and international donors - such as the EU, the United States, and the United Nations - leads to new questions concerning complex coordination, legitimacy, and accountability. These changes in the humanitarian arena, the so-called "New Wars", and advances in international law confront humanitarian actors with additional challenges. In turn, such changes require a professionalization of aid in.
