The Art Of Shaving

A retelling of Cinderella using pop-ups, ribbons, and surprises.

Winning

Provides an in-depth account of the origins, evolution and success of what is arguably the most revered car in early motor racing history.

Brescia Bugatti

Wolseley was one of Britain's leading car manufacturers in vintage days. Its two early managers, Austin and Siddeley, became famous for their own makes of car and Wolseley made a fascinating assortment of products from sledges for Scott of the Antarctic to Count Schilowsky's two-wheel Gyrocar. Austin and Morris fought American firms for its ownership in the 1920s, Morris winning eventually in 1927. The name was used for upmarket versions of first the Morris and then BMC models of the 1950s, when the cars were widely used by the police.

A Guest at the Ludlow

Following the 1971 Bangladesh War, the Bangladesh government publicly designated the thousands of women raped by the Pakistani military and their local collaborators as birangonas, ("brave women"). Nayanika Mookherjee demonstrates that while this celebration of birangonas as heroes keeps them in the public memory, they exist in the public consciousness as what Mookherjee calls a spectral wound. Dominant representations of birangonas as dehumanized victims with disheveled hair, a vacant look, and rejected by their communities create this wound, the effects of which flatten the diversity of their experiences through which birangonas have lived with the violence of wartime rape. In critically examining the pervasiveness of the birangona construction, Mookherjee opens the possibility for a more politico-economic, ethical, and nuanced inquiry into the sexuality of war.

Revvng engines, smoking tires, and high speeds. Car racing enthusiasts and race drivers alike know the thrill of competition, the push to perform better, and the agonyâ€”and dangersâ€”of bad decisions. But driving faster and better involves more than just high horsepower and tightly tuned engines. Physicist and amateur racer Chuck Edmondson thoroughly discusses the physics underlying car racing and explains just what's going on during any race, why, and how a driver can improve control and ultimately win. The world of motorsports is rich with excitement and competitionâ€”and physics. Edmondson applies common mathematical theories to real-world racing situations to reveal the secrets behind successful fast driving. He explains such key concepts as how to tune your car and why it matters, how to calculate 0 to 60 mph times and quarter-mile times and why they are important, and where, when, why, and how to use kinematics in road racing. He wraps it up with insight into the impact and benefit of green technologies in racing. In each case, Edmondson's in-depth explanations and worked equations link the physics principles to qualitative racing advice. From selecting shifting points to load transfer in car control and beyond, *Fast Car Physics* is the ideal source to consult before buckling up and cinching down the belts on your racing harness.

A rigorously researched and definitive book - the first major re-appraisal of artist engineer Ettore Bugatti and his extraordinary cars to appear since 1963. He built only 7,800 cars between 1910 and 1939, but these are much sought-after today. This book charts the beginnings of the famous marque, the cars that brought it fame from the exquisite Type 35 to the massive Royale, only six of which were ever built, and chronicles the make's revival which began in Italy in 1988. Comprehensively illustrated with over 300 photographs, this book is a unique source of reference and winner of the Society of Automotive Historians' Cugnot Award.

Gilbert Seldes, the author of *The Stammering Century*, writes: This book is not a record of the major events in American history during the nineteenth century. It is concerned with minor movements, with the cults and manias of that period. Its personages are fanatics, and radicals, and mountebanks. Its intention is to connect these secondary movements and figures with the primary forces of the century, and to supply a back-ground in American history for the Prohibitionists and the Pentecostals; the diet-faddists and the dealers in mail-order Personality; the play censors and the Fundamentalists; the free-lovers and eugenists; the cranks and possibly the saints. Sects, cults, manias, movements, fads, religious excitements, and the relation of each of these to the others and to the orderly progress of America are the subject. The subject is of course as timely at the beginning of the twenty-first century as when the book first appeared in 1928. Seldes's fascinated and often sympathetic accounts of dreamers, rogues, frauds, sectarians, madmen, and geniuses from Jonathan Edwards to the messianic murderer Matthias have established *The Stammering Century* not only as a lasting contribution to American history but as a classic in its own right.

Drawing Cutting Edge Anatomy

A guide to straight razor shaving. The object of this little book is to furnish clear and full information about the art of shaving. There are few men who do not experience more or less difficulty in shaving themselves with the straight razor, and many who, after a few unsuccessful attempts, give it up in despair and go to the barber shop. We believe most of these would much prefer to shave themselves if only they could do as well as a barber. The advantages, indeed, seem to be wholly with the man who shaves himself. In the first place the shaving is done in the privacy of his own room. He has his own razor, cup, soap, brush and towels, which can be kept scrupulously clean and sanitary, thus avoiding the constant danger of infection. There is no long wait for the call of "next". After the first cost of the outfit there is nothing to pay, either for services or "tips." Thus in point of time, money and health the man who shaves himself is a decided gainer. "These early years of the 21st century have seen a resurgence in the use of the straight razor, the dreaded "cut-throat". Where once lathering up in front of a mirror with a brush of badger was seen as something "old guys do", appreciation of the straight razor shave has come full circle. Almost universally known to give a far better shave than the modern cassette style safety razors, and resharpenable to boot, the straight is seen by many not just as a nostalgic piece of personal grooming equipment, but as an integral part of the daily morning ritual. This book, first penned in 1905 by an unknown writer for an obscure correspondence course company in the United States, has finally found its place. It has found itself to be the Great Manifesto of the Shaving Renaissance. Get back to basics, learn the manly art of shaving.

Ultimate Spider-Man Vol. 19

Drawing together case studies from all over Europe, this text explores the relationship between the overall idea of the landscape architecture for a site and the design of details. Examining concept sketches and design development drawings in relation to the details of the design, the book offers a more profound understanding of decision making through all stages of the design process. The book includes the study of the choice of materials and techniques of construction, and explores the cultural and symbolic significance of such choices, as well as questions of environmental sustainability. With projects analyzed and evaluated here that have won international acclaim, or have been awarded national prizes, European Landscape Architecture is a core book in the study and understanding of the subject.

“All my life I had one dream and that was to be in the movies.” He was the Golden Boy of the Golden Age. A prince of the silver screen. Dashing and debonair, Tony Curtis arrived on the scene in a blaze of bright lights and celluloid. His good looks, smooth charm, and natural talent earned him fame, women, and adulation—Elvis copied his look and the Beatles put him on their Sgt. Pepper album cover. But the Hollywood life of his dreams brought both invincible highs and debilitating lows. Now, in his captivating, no-holds-barred autobiography, Tony Curtis shares the agony and ecstasy of a private life in the public eye. No simple tell-all, American Prince chronicles Hollywood during its heyday. Curtis revisits his immense body of work—including the unforgettable classics Houdini, Spartacus, and Some Like It Hot—and regales readers with stories of his associations with Frank Sinatra, Laurence Olivier, director Billy Wilder, and film industry heavyweight Lew Wasserman, as well as paramours Natalie Wood and Marilyn Monroe, among others. As forthright as he is enthralling, Tony Curtis offers intimate glimpses into his succession of failed marriages (and the one that has endured), his destructive drug addiction, and his passion as a painter. Written with humor and grace, American Prince is a testament to the power of living the life of one’s dreams. From the Hardcover edition.
