Mercedes-Benz 'Fintail' Models charts the development of the W110, W111 and W112 'Fintail' (or 'Heckflosse') series, the line that helped revive the Mercedes-Benz brand in the post-war years. With a unique combination of exceptional engineering and a timeless beauty, even the most basic of these vehicles has a charm that is difficult to find in the majority of cars today. After outlining the company's history, the book looks at the development of the first of the 'Fintail' models - the W111- and its launch at the 1959 Frankfurt Show. It also looks at the closely related 1.9 litre W110 and 3.0 litre W112 models, with the vehicles sold in the German, US and UK markets covered in detail. Relating the complete story of the Mercedes-Benz 'Fintail' models from the 1950s to 1970s, it provides an ideal resource for research before restoration, or for detailing existing show cars. Gives background to development, a full production history and comprehensive specification details for all models. Superbly illustrated with 357 colour

photographs including period and advertising images sourced from the Mercedes-Benz factory in Stuttgart.

Cradle Cruise

There are an estimated 600,000,000 passenger cars in the world, and that number is increasing every day. So too is Earth's supply of parking spaces. In some cities, parking lots cover more than one-third of the metropolitan footprint. It's official: we have paved paradise and put up a parking lot. In *ReThinking a Lot*, Eran Ben-Joseph shares a different vision for parking's future. Parking lots, he writes, are ripe for transformation. After all, their design and function has not been rethought since the 1950s. With this book, Ben-Joseph pushes the parking lot into the twenty-first century. Ben-Joseph shows that parking lots can be aesthetically pleasing, environmentally and architecturally responsible, and used for something other than car storage. He introduces us to some of the many alternative and nonparking purposes that parking lots have served -- from RV campgrounds to stages for "Shakespeare in the Parking Lot." He shows us parking lots that are lushly planted with trees and flowers and beautifully integrated with the rest of the built

environment. With purposeful design, Ben-Joseph argues, parking lots could be significant public places, contributing as much to their communities as great boulevards, parks, or plazas. For all the acreage they cover, parking lots have received scant attention. It's time to change that; it's time to rethink the lot.

The Rolls-Royce Merlin is considered by many to be the most outstanding liquid-cooled reciprocating piston engine of World War II. It powered the majority of Allied aircraft in Europe, including British and American designs. This book examines the origins of the engine's development from its predecessor, the Kestrel, through its single-stage conception to its two-speed, two-stage final form. Twenty-two Merlin powered aircraft are then examined in depth with examinations of development, design, construction and eventual operation. Wonderful design drawings by Lyndon Jones are themselves masterpieces. Included amongst the aircraft described in the book are the Avro Lancaster, Lincoln and York, the de Havilland Mosquito and Hornet, the Bristol Beaufighter II and IV, the Hawker Hurricane and Supermarine

Spitfire, the North American Mustang, the Handley Page Halifax, the Curtiss P40 Kittyhawk and the Vickers Wellington.

The Hillman Imp divides opinions perhaps more sharply than any other car in British motoring history. You either love it or hate it. The Rootes Group's answer to the BMC Mini, the Hillman Imp was built in a purpose-built factory in Linwood, Glasgow, and it was hoped that it represented the beginning of a new era for the Scottish motor industry. With the help of interviews with key members of the design team, and unprecedented research of official papers, the story of the design and development of this quirky little car is set against the complex commercial and political intrigue that surrounded it, making this book not just the story of a car but a fascinating insight into an industry in crisis.

The importance of conservation is growing each year, with increasing concerns

over the destruction of biodiversity and the rising awareness of ecosystem services generating new debates on the human-nature relationship. This compact overview integrates the process, theory and practice of conservation for a broad readership, from non-specialists to students and practitioners. Taking a global perspective, it uses examples from around the world to illustrate general themes and show how problems arise from the impact of societal trends on ecological communities. A significant practical component will be particularly valuable for environmental professionals, outlining the requirements for rigorous surveys, biodiversity valuation, the assessment of impact and its mitigation. Thoroughly revised and updated, this second edition reflects trends towards embracing multiple disciplines, considering the links between ecology and the social sciences and bringing conservation to the heart of sustainability and environmental policy.

The Good Life

The late Anton Szandor LaVey, founder of the Church of Satan, may be the most notoriously familiar for his Satanic Bible, but *The Satanic Witch* best reflects the discoveries Anton made in his younger days working the carny shows and Mitt Camps. This is undiluted Gypsy lore regarding the forbidden knowledge of seduction and manipulation. *The Satanic Witch* is not designed for Barbie Dolls, but women cunning and crafty enough to employ the workable formulas within, which instantly surpass the entire catalogue of self-help tomes and New Age idiocies. The

Introduction — Peggy Nadramia, High Priestess of the Church of Satan, tells us how this book changed her life. The Afterword — Blanche Barton, Anton LaVey's biographer, Chairmistress of the Council of Nine, and mother of Satan Xerxes Carnacki LaVey, Anton's third child, informs us how The Satanic Witch came to pass and influence the behavior of so many women.

A Washington Post Notable Fiction Book for 2011 One of The Telegraph's Best Fiction Books 2011 Far from London's crime and pollution, Hanmouth's wealthier residents live in picturesque, heavily mortgaged cottages in the center of a town packed with artisanal cheese shops and antiques stores. They're reminded of the town's less desirable outskirts—with their grim, flimsy housing stock and chain stores—only when their neighbors have the presumption to claim also to live in Hanmouth. When an eight-year-old girl from the outer area goes missing, England's eyes suddenly turn toward the sleepy town with a curiosity as piercing and unblinking as the closed-circuit security cameras that line Hanmouth's idyllic streets. But somehow these cameras have missed the abduction of the girl, whose name is China. Is her blank-eyed hairdresser mother hiding her as part of a moneymaking hoax? Has she been abducted by one of the lurking perverts the townspeople imagine the cameras are protecting them from? Perhaps more cameras are needed? As it turns out, more than one resident of Hanmouth has a

secret hidden behind closed doors. There's Sam and Harry, the cheesemonger and aristocrat who lead the county's gay orgies. The quiet husband of postcolonial theorist Miranda (everyone agrees she's marvelous) keeps a male lover, while their daughter disembowels dolls she's named Child Pornography and Slightly Jewish. Moral crusader John Calvin's Neighborhood Watch has an unusual reason for holding its meetings in secret. And, of course, somewhere out there is the house where little China is hidden. With the dark hilarity and unflinching honesty of a modern-day Middlemarch, King of the Badgers demolishes the already fragile privacy of Hanmouth's inhabitants. These characters, exquisitely drawn and rawly human, proclaim Philip Hensher's status as an extraordinary chronicler of the domestic, and one of the world's most dazzling and ambitious novelists.

Trotsky for Beginners

This 2005 edition of *The Evolution and Extinction of the Dinosaurs* is a unique, comprehensive treatment of this fascinating group of organisms. It is a detailed survey of dinosaur origins, their diversity, and their eventual extinction. The book

can easily be used as a teaching textbook for a class, but it is also written as a series of readable, entertaining essays covering important and timely topics appealing to non-specialists and all dinosaur enthusiasts: birds as 'living dinosaurs', the new feathered dinosaurs from China, 'warm-bloodedness'. Along the way, the reader learns about dinosaur functional morphology, physiology, and systematics using cladistic methodology - in short, how professional paleontologists and dinosaur experts go about their work, and why they find it so rewarding. The book is spectacularly illustrated by John Sibbick, a world-famous illustrator of dinosaurs, commissioned exclusively for this book.

This text follows the rise and fall of Trotsky. Orator, military tactician, historian and a cultural theorist, Trotsky was finally brought down by inner party-functionalism, exiled and then executed by Stalin. He recognized that the Stalinist system in

Russia was merely a transitional state which could either move towards Socialism or revert to Capitalism. This text provides an introduction to Trotsky and his beliefs.

Merlin Power

In this bestselling novel, the author of *Bright Lights, Big City* unveils a story of love, family, conflicting desires, and catastrophic loss in a powerfully searing work of fiction. Clinging to a semiprecarious existence in TriBeCa, Corrine and Russell Calloway have survived a separation and are wonderstruck by young twins whose provenance is nothing less than miraculous. Several miles uptown and perched near the top of the Upper East Side's social register, Luke McGavock has postponed his accumulation of wealth in an attempt to recover the sense of purpose now lacking in a life that often gives him pause. But on a September morning, brightness falls horribly from the sky, and people worlds apart suddenly find themselves working side by side at the devastated site. Wise, surprising, and, ultimately, heart-stoppingly redemptive, *The Good Life* captures lives that allow us to see-through personal, social, and moral complexity—more clearly into the heart of things.

The term "Cradle Cruise" refers to the enlistment of a US Navy recruit who was less than eighteen years of age when joining, a period that extended to his 21st

birthday. When Lon Dawson, a kid from Chicago's north side, joined the navy in the spring of 1941, little did he know that war was just around the corner. When the Japanese attacked Pearl Harbor later that year, he had to grow up, and fast. *Cradle Cruise* is an account of Lon Dawson's experiences during WWII and his observations as a US Navy Bluejacket. Dawson is the author of "The Jennie Hodggers Story," "A Promise Kept," and editor of the upcoming "Culinary Campaign: A History of Military Cuisine."

Anthropologists claim to have made mankind aware of its own prehistory and its importance to human self-understanding. Yet, anthropologists seem hardly to have discovered their own discipline's prehistory or to have realized its importance. William Y. Adams attempts to rectify this myopic self-awareness by applying anthropology's own tools on itself and uncovering the discipline's debt to earlier thinkers. Like most anthropologists, Adams had previously accepted the premise

that anthropology's intellectual roots go back no further than the moral philosophy of the Enlightenment, or perhaps at the earliest to the humanism of the Renaissance. In this volume, Adams recognizes that many good ideas were anticipated in antiquity and that these ideas have had a lasting influence on anthropological models in particular. He has chosen five philosophical currents whose influence has been, and is, very widespread, particularly in North American anthropology: progressivism, primitivism, natural law, German idealism, and "Indianology". He argues that the influences of these currents in North American anthropology occur in a unique combination that is not found in the anthropologies of other countries. Without neglecting the anthropologies of other countries, this work serves as the basis for the explanation of the true historical and philosophical underpinnings of anthropology and its goals.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and

adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

The Philosophical Roots of Anthropology

Books about homosexuality and religion have traditionally attempted to reconcile "sin" with a modern understanding of sexuality. Andrew Harvey's *The Essential Gay Mystics*, however, is predicated on the assumption that sin and sex don't need to be reconciled and that gay sexuality is innately spiritual. Excerpting passages from 60 gay and lesbian writers--covering 20 centuries and at least a dozen traditions including classical Greek, Native American, Sufic, and Christian-- Harvey explores a variety of religious and sexual experiences. His extensive research, empathetic perspective, and compelling grasp of spirituality make this book not only unique,

but also vital to an understanding of contemporary theology and religion.

"On our first day of school, Robert and I stood at the designated stop at Hevers Avenue with our mothers, and that's when we met for the very first time. We were five years old." So began a lifelong friendship that fourteen years later would result in the formation of The Cure, a quintessential post-punk band whose albums—such as *Three Imaginary Boys*, *Pornography*, and *Kiss Me, Kiss Me, Kiss Me*—remain among the best-loved and most influential of all time. As two of the first punks in the provincial English town of Crawley, Lol Tolhurst and Robert Smith didn't have it easy. Outsiders from the start, theirs was a friendship based initially on proximity and a shared love of music, from the punk that was raging in nearby London to the groundbreaking experimentation of David Bowie's "Berlin Trilogy." First known as The Easy Cure, they began playing in pubs and soon developed their own unique

style and approach to songwriting, resulting in timeless songs that sparked a deep sense of identification and empathy in listeners, songs like "Boys Don't Cry," "Just Like Heaven," and "Why Can't I Be You?," spearheading a new subculture dubbed "Goth" by the press. The music of The Cure was not only accessible but also deeply subversive, challenging conventional notions of pop music and gender roles while inspiring a generation of devoted fans and a revolution in style. Cured is not only the first insider account of the early days of the band, it is a revealing look at the artistic evolution of the enigmatic Robert Smith, the iconic lead singer, songwriter, and innovative guitarist at the heart of The Cure. A deeply rebellious, sensitive, tough, and often surprisingly "normal" young man, Smith was from the start destined for stardom, a fearless non-conformist and provocateur who soon found his own musical language through which to express his considerable and unique talent. But there was also a dark side to The Cure's intense and bewildering success. Tolhurst, on drums and keyboards, was nursing a growing alcoholism that would destroy his place in The Cure and nearly end his life. Cured tells the harrowing and unforgettable story of his crash-and-burn, recovery, and rebirth. Intensely lyrical and evocative, gripping and unforgettable, Cured is the definitive story of a singular band whose legacy endures many decades hence, told from the point of view of a participant and eyewitness who was there when it happened-and even before it all began.
