Consumer Midyear Buying Guide

The world of technology was pleased to announce the GoPro 4 Silver Camera. This new and innovative digital device is economic friendly and also consumer friendly. The camera is equipped with waterproof capability of up to 131' of water. Its mountable design ensures multipurpose uses; you could not have asked the minds behind this invention to give us something better than that. The camera's digital zoom has the ability to take the center portion of the high resolution sensor image to help enhance the capacity of the zoom; meaning that the existing data is not altered but merely showcased at a lower the resolution, thereby giving an illusion of an enlarged portrait. The GoPro 4 Silver Digital Camera also comes equipped with built-in Wi-Fi and Bluetooth and has the ability to take 12MP at a speed of 30 frames per second. This camera is the first ever created with touch screen capability.

Consumer Buying Guide 1995

Guide to 3D Photography is for the beginning 3D photographer, showing how to get started, how to process images on your computer or tablet, and how to view your 3D photographs. You can begin shooting 3D photos using one camera or two, or using integrated 3D cameras. This is a hands-on guide with step-by-step examples for shooting, processing and displaying your 3D images. This guide is intended for the novice to mid-skill level 3D enthusiast; this guide is not targeted at experienced 3D photographers. Anyone can shoot and process 3D - this book shows you how. Using free software that runs on Windows-based personal computers, or free or low-cost apps for iPad or Android tablets and smart phones, your stereo photographs can be turned into viewable 3D photos for display on your computer, displayed online or printed on paper or turned in to glasses free 3D prints (for a service fee). While 3D TVs and monitors provide the best viewing experience, you can get started with free or very low cost filtered glasses. You'll even learn how to create 3D photos that can be viewed without any glasses or special hardware. NOT RECOMMENDED for Black & White or gray scale e-readers as the 3D color photographs in the books can not be viewed - however the photos are available separately online. RECOMMENDED FOR COLOR E-READERS including color tablets and e-reader software on tablets, notebooks and desktop

Consumer Reports Home Computer Buying Guide

Since early 1989, a gem dealer I've known for years has been calling me every few weeks to brief me on mounting mayhem in Colombia's lucrative emerald market. The troubling gist of these calls is always this: There is a full-fledged turf war going on between that South American country's bustling drug and gem trades for control of its emerald export business. According to this dealer and several others, anywhere from two to four thousand emerald industry people, mostly miners and dealers, have been murdered since 1980. No doubt the gem sector, itself never gun shy, has retaliated in full and in kind. After all, the two groups have banded together in an intermittent alliance against a common enemy-Communist guerillas-with results the CIA would envy. I mention this bloodshed because of something the gem dealer

once said to me: "I bet you never think of what a gem has to go through to get to a jewelry store." He's right. I tend to think of colored stones as things of beauty, not objects of gruesome power struggles between mining kingpins and drug lords. Can you blame me, or anyone with insider knowledge, if a gem sheds any connection with its past once sculpted by a cutter into the glittering marvel we see in a jeweler's showcase? Like Odysseus listening to the sirens' song, we become victims of an aesthetics-induced amnesia.
