Family and Civilization is the magnum opus of Carle Zimmerman, a distinguished sociologist who taught for many years at Harvard University. In this unjustly forgotten work Zimmerman demonstrates the close and causal connections between the rise and fall of different types of families and the rise and fall of civilizations, particularly ancient Greece and Rome, medieval and modern Europe, and the United States. Zimmerman traces the evolution of family structure from tribes and clans to extended and large nuclear families to the small nuclear families and broken families of today. And he shows the consequences of each structure for the bearing and rearing of children; for religion, law, and everyday life; and for the fate of civilization itself. Originally published in 1947, this compelling analysis predicted many of today's cultural and social controversies and trends, including youth violence and depression, abortion and homosexuality, the demographic collapse of Europe and of the West more generally, and the displacement of peoples. This new edition, part of ISI Books' Background series, has been edited and abridged by cultural commentator James Kurth of Swarthmore College and includes essays on the text by Kurth, Allan Carlson, and Bryce Christensen.

Gene Control offers a current description of how gene expression is controlled in eukaryotes, reviewing and summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's *Gene Regulation: A Eukaryotic Perspective*, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists and clinicians interested in how genes are regulated in health and disease.

Oaxaca is known for many things—its indigenous groups, archaeological sites, crafts, and textiles—but not for mental health care. When one talks with Oaxacans about mental health, most say it's a taboo topic and that people there think you "have to be crazy to go to a psychologist." Yet throughout Oaxaca are signs advertising the services of psicólogos; there are prominent conferences of mental health professionals; and self-help groups like Neurotics Anonymous thrive, where participants rise to say, "Hola, mi nombre es Raquel, y soy neurótica." How does one explain the recent growth of Euroamerican-style therapies in the region? Author Whitney L. Duncan analyzes this phenomenon of "psy-globalization" and develops a rich ethnography of its effects on Oaxacans' understandings of themselves and their emotions, ultimately showing how globalizing forms of care are transformative for and transformed by the local context. She also delves into the mental health impacts of migration from Mexico to the United States, both for migrants who return and for the family members they leave behind. This book is a recipient of the Norman L. and Roselea J. Goldberg Prize from Vanderbilt University Press for the best book in the area of medicine.

They are the stories of her father: stories of travel, of poverty and of faith in God through every season in life. In her first book, *God Signs & Dad Stories*, Christian author Paula Pettis memorializes the memory of her late dad, Russell Pettis, through collected stories of his life. The first section of the book chronicles Russell's upbringing in Wisconsin during the Great Depression, when poverty was prevalent but family love abounding, as well as his time spent sailing in the Merchant Marines during World War II and later in other branches. Paula presents a touching tribute to her father in the second half of the book, recalling the months spent caring for her aging parent in hospital ICUs and through countless doctor visits. Yet through prayer, support from loved ones and unexplainable signs from God, she created treasured moments with her earthly father that celebrated her Heavenly Father.
