Whether the issue is building, managing, or evaluating the reference collection, this practical guide should make the process easier. The first section covers all the basic elements: identifying users and determining their needs; selection criteria; tools for selection and review; budget allocations; and online reference services. The second section provides the building blocks themselves: an annotated list of approximately 300 sources, presented in four categories. The first is a core list for all school levels. The remaining three list basic reference sources for elementary, intermediate, and

high school levels.
