This eBook has been formatted to the highest digital standards and adjusted for readability on all devices. Emile, or On Education is a treatise on the nature of education and on the nature of man. Jean-Jacques Rousseau considered it to be the "best and most important" of all his writings. Due to a section of the book entitled "Profession of Faith of the Savoyard Vicar", Emile was banned in Paris and Geneva and was publicly burned in 1762, the year of its first publication. During the French Revolution, Emile served as the inspiration for what became a new national system of education. The Social Contract, originally published as On the Social Contract; or, Principles of Political Rights, is a book in which

Rousseau theorized about the best way to establish a political community in the face of the problems of commercial society, which he had already identified in his *Discourse on Inequality* (1754). The Social Contract helped inspire political reforms or revolutions in Europe, especially in France. The Social Contract argued against the idea that monarchs were divinely empowered to legislate. Rousseau asserts that only the people, who are sovereign, have that all-powerful right.

Earl Jeffrey Richards' acclaimed translation is used nationwide in the most eminent colleges and universities in America, from Columbia to Stanford.

But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. First published in 1958, Chinua Achebe's stark, coolly ironic novel reshaped both African and world literature, and has sold over ten million copies in forty-five languages. Based on the 1761 edition, this translation strives for fidelity and retains Montesquieu's paragraphing. George R. Healy's Introduction discusses The Persian Letters as a kind of overture to the Enlightenment, a work of remarkable diversity designed more to explore a problem of great urgency for eighteenth century thought than to resolve it: that of discovering universals, or at least the pragmatic constants, amid the diversity of human culture and society, and of confronting the proposition that there are no values in human relationships except those imposed by force or agreed upon in self-interested conventions.

The colonial architecture of the nineteenth century has much to tell us of the history of colonialism and cultural exchange. Yet, these buildings can be read in many ways. Do they stand as witnesses to the rapacity and self-delusion of empire? Are they monuments to a world of lost glory and forgotten convictions? Do they reveal battles won by indigenous cultures and styles? Or do they simply represent an architectural style made absurdly incongruous in relocation? *Empire Building* is a study of how and why Western architecture was exported to the Middle East and how Islamic and Byzantine architectural ideas and styles impacted on the West. The book explores how far racial theory and political and religious agendas guided British architects (and how such ideas were resisted when applied), and how Eastern ideas came to influence the West, through writers such as Ruskin and buildings such as the Crystal Palace. Beautifully written and lavishly illustrated, *Empire Building* takes the reader on an extraordinary postcolonial journey, backwards and forwards, into

the heart and to the edge of empire.
