A long-awaited new edition of the seminal text on the spiritual system that is a convergence of Gnosticism and Haitian voodoo, The Voudon Gnostic Workbook is a singular sacred work that is comprehensive in scope -- from "how to be a lucky Hoodoo" to how magick and voodoo intersect energetically, to esoteric time travel. Complete with charts and graphs and instructive interdimensional physics, The Voudon Gnostic Workbook is an "object of desire" among students of the occult. Weiser's long-anticipated republication of this rare text will be an event in the annals of esoteric publishing, as the book itself is somewhat of an "unholy grail." There are listservers devoted to it and much discussion of the mysteries held within its pages. While The Voudon Gnostic Workbook has remained a controversial book considered important for masters of metaphysics, it recently came into popular culture and renewed popularity when Grant Morrison revealed it had been the inspiration for his cult comics The Invisibles, using the cribbed time travel from Bertiaux' s masterwork. Voodoo is not an evil religion and is much misunderstood. It derives from the Dahomean Gods called the "Loa." Esoteric voodoo is actually a highly practical procedure for leading us into making contact with the deepest levels of our being and most ancient modes of consciousness. Michael Bertiaux's Voudon Gnostic Workbook is the most comprehensive and illuminating contemporary book on the subject. Launched out of a correspondence course and series of classes for students and followers of Voudon Gnosticism and the OTO, this seminal text is at once one of the most mysterious and magnificent of all esoteric books.

The push for STEM or STEAM—Science, Technology, Engineering, Art, and Math—has

flooded the education world over the past decade. As school subjects are presented in a more integrated fashion and computer technology is as common in the classroom as a blackboard and chalk, there may be no better forum to bring STEAM and integrated instruction than the computer classroom laboratory environment. This book was written after ten years of classroom experience teaching academic concepts while demonstrating the necessary computer skills students need to succeed on the high school and college levels. Moreover, these skills will remain with students well after they have finished their academic careers. The exercises chosen for this book were selected to compliment academic courses (with an attempt to have some fun in other areas). Technology Across the Curriculum is an integrated approach to learning computer skills as well as reinforcing academic subjects that range from science, math, art, history, English skills, economics, ethics, and political science. The idea behind this book is to broaden students' academic knowledge and skills while honing their computer aptitude. Above all, many of the computer skills and academic subjects covered in this book will not only compliment other courses, but will stay with students long after they have graduated and entered adulthood. This book was written with the classroom in mind and an instructor, but it was also written with the independent learner in mind as well. The step-by-step instructions with screenshots and examples will help any learner complete all the tasks within this book.

"Preachers must understand the teaching techniques of parable and hyperbole, not to mention having a good background in systematic theology, in order to understand what the Bible's writers really meant. But our responsibility is also to reduce the complexities of Bible study to such simplicities that our many listeners, ranging from busy young professional people to aging men and women of failing health to youngsters facing a variety of new temptations, can take away a saving word." (from the Preface) E. Carver McGriff provides the tools preachers need for their daunting task with some of the most timely and thought-provoking research on the lectionary texts ever made available. Included for each scriptural lesson in the lectionary are: - A listing of the applicable Revised Common, Roman Catholic, and Episcopal lectionary texts. - A description of the Psalm of the day. - A prayer for the day. - Commentary that is more than academic exegesis -- McGriff brings to the forefront those points in the lessons that relate most poignantly to our contemporary reality. - Suggested sermon titles for each of the three texts for each Sunday. - Themes and suggested directions for preaching on each text. - Several additional illustrations to enliven your preaching. "Known in the Indianapolis community as a preacher with extraordinary gifts, it is no surprise at all that this work by Carver McGriff brings remarkable insights to those who look for integrity in their preaching. Carver looks at the texts with a freshness that is sure to stimulate the thought process. Careful use of these suggestions will bring serendipities to preacher and congregation." George H. Tooze Senior Minister, First Baptist Church Indianapolis, Indiana One of America's premiere preachers, E. Carver McGriff returned home after earning two Purple Hearts during World War II to earn a degree in business administration from Butler University. Following a career as a

salesman and business owner, McGriff entered Garrett Theological Seminary, where he was voted Best Preacher by the faculty and graduated with distinction. During his 26-year ministry at St. Luke's Methodist Church in Indianapolis, McGriff spearheaded his congregation's remarkable growth in membership from 900 to 4,400, with average Sunday attendance increasing from 300 to over 1,850. McGriff received an honorary degree from the University of Indianapolis and the Outstanding Alumnus award from Butler University and was voted the Distinguished Alumnus of the year by Christian Theological Seminary. McGriff was also honored in 1993 by the Governor of Indiana with the "Sagamore of the Wabash." His sermons have been distributed nationwide by the United Methodist Publishing House.
