Caterer and sleuth extraordinaire Goldy Schulz jumps from the frying pan into the fire as she tries to solve a puzzling murder that is much too close to home, in this latest entry in the New York Times bestselling series from "today's foremost practitioner of the culinary whodunit" (Entertainment Weekly) The Whole Enchilada Goldy Schulz knows her food is to die for, but she never expects one of her best friends to actually keel over when she's leaving a birthday party Goldy has catered. But what looks like a coronary turns out to be a generous serving of cold-blooded murder. And the clever culprit is just getting cooking. FrumSpeak examines the unique linguistic habits of Orthodox, native-born Americans. This book seeks to draw comparisons with parallel phenomena of Jewish linguistic creation including Yiddish and Ladino and reaches into the linguistic consciousness of the American Orthodox community to reveal how that community thinks, communicates, and educates. The Jewish religion molds the character of this community and determines how it works, builds a home life, celebrates, and educates children. By focusing on Jewish education, the community fosters an intimacy with the classic primary texts of Judaism. These texts are replete with memorable linguistic formulations, vivid imagery, and technical terminology, all of which govern the ways in which Orthodox Jews face the challenges of daily life. Orthodox children often gain academic exposure to sophisticated concepts years before they have to undertake the responsibilities of adulthood. With each new encounter a reference to rabbinic literature is drawn upon, and the classical terms become associated with tangible experience. The result is the English, Hebrew, Aramaic, and Yiddish amalgam that this book terms Yeshivish. Yeshivish grows increasingly prevalent as the American Orthodox community continues to grow into a strong, organized body responsible for its own education and welfare. FrumSpeak examines the origins of Yeshivish and attempts to determine its place in religious and linguistic thought. As a dictionary, FrumSpeak provides definitions for Yeshivish words and suggests an English equivalent for each. Every entry traces the etymology of the original word to the point at which the word enters the language. All definitions include a sentence drawn from actual experience, to exemplify each meaning and to distinguish it from others.

The Athena Project

From concert violinist Gerald Elias comes this debut set in the classical music world about the theft of a priceless violin. Daniel Jacobus is a blind, reclusive, crotchety violin teacher living in self-imposed exile in rural New England. He spends his time chain-smoking, listening to old LPs, and occasionally taking on new students, whom he berates in the hope that they will flee. Jacobus is drawn back into the world he left behind when he decides to attend The Grimsley Competition at Carnegie Hall. The young winner of this competition is granted the honor of playing the Piccolino Stradivarius, a uniquely dazzling three-quarter-size violin that has brought misfortune to all who possessed it over the centuries. But the violin is

stolen before the winner of the competition has a chance to play it, and Jacobus is the primary suspect. With the help of his friend and former musical partner, Nathaniel Williams, his new student, Yumi Shinagawa, and several quirky sidekicks, Jacobus sets out to prove his innocence and find the stolen Piccolino Strad. Will he be successful? The quest takes him through the halls of wealth and culture, across continents to Japan, and leads him to a murder. Devil's Trill gives the reader a peek into the world of classical music, with its backstabbing teachers and performers, venal patrons, and shady violin dealers. It is the remarkable beginning of a wonderful new series.

Sport, Violence and Society

The New York Times bestselling author of Prime Cut serves up another tantalizing tale of culinary mystery and suspense--as chef turned sleuth Goldy Schulz goes on live television to prepare a meal to die for but discovers that murder is already on the menu. When Goldy Schulz is offered a temporary stint hosting a cooking show for PBS, she jumps at the chance. After all, she could use the money--not to mention the great exposure. Her catering business is in shambles, and publicizing her new venture as a personal chef will help get her back on track. Plus taping the shows at Colorado's posh Killdeer Ski Resort will be fun. A little cooking, a little chitchat. What could go wrong? The question Goldy should have asked is, what wouldn't go wrong--especially when she has to drive through a blizzard to do one of her shows live for a PBS telethon. To make matters worse, Goldy has an unpleasant duty to perform right after the show. She and her policeman husband, Tom, have agreed to sell a piece of Tom's treasured war memorabilia to help ease their financial woes. The buyer: Doug Portman, art critic, law enforcement wannabe--and, to her eternal embarrassment, Goldy's ex-boyfriend. Predictably, the live broadcast is riddled with culinary catastrophes--from the Chesapeake Crabcakes right down to the Ice-Capped Ginger Snaps. But the deadliest dish of all comes after the cameras go off, when an unexplainable skiing accident claims Doug Portman's life--and Goldy is the one who finds his crumpled body on the slopes. Even more shocking is what police find tucked away in Doug's BMW: a greeting card with a potentially deadly chemical inside. As the police try to determine if Doug's accident was really foul play, Goldy does a little investigating of her own--but finds more questions than answers. Was Doug, chairman of the state Parole Board, accepting bribes from potential parolees? Was he connected to the ex-con who's been telling Killdeer skiers that he's planning to poison a cop? And how did Goldy and Tom get mixed up in this mess? When a series of suspicious mishaps places Goldy's own life in jeopardy, she knows she must whip up her own crime-solving recipe, and fast--before a hearty dose of intrigue and a deadly dash of danger ends her cooking career once and for all. Winter sports can be dangerous, but can they also be deadly? "Cooking at the Top!," Goldy's new TV show, is broadcast from one of Colorado's poshest ski areas. Unfortunately, she finds whipping up delicacies at 11,000 feet as perilous as skiing steep runs. Then a telethon raising money for the widow of a tracker killed mysteriously ends in disaster. Goldy finds herself searching the icy slopes to find a killer with desperate secrets to hide---but this may be one time the tough-cookie caterer will not be able to schuss to safety! Included are Goldy's original recipes for mouthwatering Sonora Chicken Strudel, incomparable

Marmalade Mogul Muffins, and sinfully sumptuous Chocolate Coma Cookies. -->

Not Your Mother's Slow Cooker Cookbook

'An absorbing study of online propaganda and its threat to democracy' - Guardian, Book of the Day. This is a story about how the extreme became mainstream. It reveals how the truth became 'fake news', how fringe ideas spread, and how a candidate many dismissed as a joke was propelled to the presidency by the dark side of the internet. For several years, Andrew Marantz, a New Yorker staff writer, has been embedded with alt-right propagandists, who have become experts at using social media to advance their corrosive agenda. He also spent time with the social-media entrepreneurs who made this possible, through their naive and reckless ambition, by disrupting all of the traditional information systems. Join Marantz as some of the biggest brains in Silicon Valley teach him how to make content go viral; as he hangs out with the conspiracists, white supremacists and nihilist trolls using these ideas to make their memes, blogs and podcasts incredibly successful; and as he meets some of the people led down the rabbit hole of online radicalization. Antisocial is about how the unthinkable becomes thinkable, and then becomes reality. By telling the story of the people who hijacked the American conversation, Antisocial will help you understand the world they have created, in which we all now live.

Is violence an intrinsic component of contemporary sport? How does violence within sport reflect upon the attitudes of wider society? In this landmark study of violence in and around contemporary sport, Kevin Young offers the first comprehensive sociological analysis of an issue of central importance within sport studies. The book explores organized and spontaneous violence, both on the field and off, and calls for a much broader definition of 'sports-related violence', to include issues as diverse as criminal behaviour by players, abuse within sport and exploitative labor practices. Offering a sophisticated new theoretical framework for understanding violence in a sporting context, and including a wide range of case-studies and empirical data - from professional soccer in Europe to ice hockey in North America - the book establishes

a benchmark for the study of violence within sport and wider society. Through close examination of often contradictory trends, from anti-violence initiatives in professional sports leagues to the role of the media in encouraging hyper-aggression, the book throws new light on our understanding of the socially-embedded character of sport and its fundamental ties to history, culture, politics, social class, gender and the law.

Don of the Dead

Like other fictional characters, female sleuths may live in the past or the future. They may represent current times with some level of reality or shape their settings to suit an agenda. There are audiences for both realism and escapism in the mystery novel. It is interesting, however, to compare the fictional world of the mystery sleuth with the world in which readers live. Of course, mystery readers do not share one simplistic world. They live in urban, suburban, and rural areas, as do the female heroines in the books they read. They may choose a book because it has a familiar background or because it takes them to places they long to visit. Readers may be rich or poor; young or old; conservative or liberal. So are the heroines. What incredible choices there are today in mystery series! This three-volume encyclopedia of women characters in the mystery novel is like a gigantic menu. Like a menu, the descriptions of the items that are provided are subjective. Volume 3 of Mystery Women as currently updated adds an additional 42 sleuths to the 500 plus who were covered in the initial Volume 3. These are more recently discovered sleuths who were introduced during the period from January 1, 1990 to December 31, 1999. This more than doubles the number of sleuths introduced in the 1980s (298 of whom were covered in Volume 2) and easily exceeded the 347 series (and some outstanding individuals) described in Volume 1, which covered a 130-year period from 1860-1979. It also includes updates on those individuals covered in the first edition; changes in status, short reviews of books published since the first edition through December 31, 2008.

Now she wants to move the location to the Gold Gulch Spa just a scant two days before tying the knot to her doctor fiancé. Then Doc Finn, beloved local physician and the best friend of Goldy's godfather, Jack, is killed when his car tumbles into a ravine. At least that's what appears to have happened. But Jack thinks Doc was murdered because of the research he was doing at the spa—allegations that are confirmed when Jack himself is attacked. So Goldy dons chef's whites and goes undercover at the spa, where coffee is outlawed in favor of calming smoothies, and the fruit cocktail doesn't include fresh fruit. Add in the obstreperous owner, who years ago tried to sabotage Goldy's fledgling business, and she's got her hands full. Above all, there seems to be a clever killer on the spa grounds, watching her every move. After what befell Jack, Goldy knows that she might be next. Catering weddings, and cooking low-fat food, could be killing her—literally.

From gifted new writer Tasha Alexander comes a stunning novel of historical suspense set in Victorian England, meticulously researched and with a twisty plot that involves stolen antiquities, betrayal, and murder. And Only to Deceive For Emily, accepting the proposal of Philip, the Viscount Ashton, was an easy way to escape her overbearing mother, who was set on a grand society match. So when Emily's dashing husband died on safari soon after their wedding, she felt little grief. After all, she barely knew him. Now, nearly two years later, she discovers that Philip was a far different man from the one she had married so cavalierly. His journals reveal him to have been a gentleman scholar and antiquities collector who, to her surprise, was deeply in love with his wife. Emily becomes fascinated with this new image of her dead husband and she immerses herself in all things ancient and begins to study Greek. Emily's intellectual pursuits and her desire to learn more about Philip take her to the quiet corridors of the British Museum, one of her husband's favorite places. There, amid priceless ancient statues, she uncovers a dark, dangerous secret involving stolen artifacts from the Greco-Roman galleries. And to complicate matters, she's juggling two very prominent and wealthy suitors, one of whose intentions may go beyond the marrying kind. As she sets out to solve the crime, her search leads to more surprises about Philip and causes her to question the role in Victorian society to which she, as a woman, is relegated.

Phosphoinositides play a major role in cellular signaling and membrane organization. During the last three decades we have learned that enzymes turning over phosphoinositides control vital physiological processes and are involved in the initiation and progression of cancer, inflammation, neurodegenerative, cardiovascular, metabolic disease and more. In two volumes, this book elucidates the crucial mechanisms that control the dynamics of phosphoinositide conversion. Starting out from phosphatidylinositol, a chain of lipid kinases collaborates to generate the oncogenic lipid phosphatidylinositol(3,4,5)-trisphosphate. For every phosphate group added, there are specific lipid kinases - and phosphatases to remove it. Additionally, phospholipases can cleave off the inositol head group and generate poly-phosphoinositols, which act as soluble signals in the cytosol. Volume I untangles the web of these enzymes and their products, and relates them to function in health and disease. Phosphoinositide 3-kinases and 3-phosphatases have received

a special focus in volume I, and recent therapeutic developments in human disease are presented along with a historical perspective illustrating the impressive progress in the field.
