Business Horizons

The destructive earthquakes of Kocaeli and Duzce in Turkey exemplify the high seismic risk of the Mediterranean area, frequently shaken by earthquakes. This book summarises the results of a two-year project, which focussed on scenarios and actions for seismic prevention of damage, and involved geology, geophysics, and transportation engineering.

Global Strategic Management

Writing as Handwork

New Horizons in Medical Anthropology is a festschrift in honor of Charles Leslie whose influential career helped shape this subfield of anthropology. This collection of cutting-edge essays explores medical innovation and medical pluralism at the turn of the 21st century. The book accomplishes two things: it reflects recent research by medical anthropologists working in Asia who have been inspired by Charles Leslie's writing on such topics as medical pluralism and the early emergence of what has become a globalized biomedicine, the social relations of therapy management, and the relationship between the politics of the state and discourse about the health of populations, illness, and medicine. The book also takes up lesser known aspects of Leslie's work: his contribution as an editor and the role he played in carrying the field forward; his ethics as a medical anthropologist committed to humanism and sensitive to racism and eugenics; and the passion he inspired in his co-workers and students. Charles Leslie is a remarkable and influential social scientist. New Horizons in Medical Anthropology is a fitting tribute to a sensitive scholar whose theories and codes of practice provide an essential guide to future generations of medical anthropologists.

New horizons for the family

"A fresh approach to designing and managing channels for the long term, this book helps firms expand value for their customers and partners while buttressing their own bottom line."--Jacket.

Managing Customers for Profit

New Horizons

International business is undergoing continuous transformation as multinational firms and comparative management evolve in the changing global economy. To succeed in this challenging environment, firms need a well-developed capability for sound strategic decisions. This comprehensive work provides an applied and integrated strategic framework for developing capabilities that lead to global success. It is designed to help readers achieve three essential objectives. First, it provides intellectual and practical guidelines for readers to execute goals and strategies that lead to meaningful and productive results. The book is packed with frameworks, cases, anchoring exercises, techniques, and tools to help readers emerge with a completed business plan after the last chapter. Second, it focuses on strategy and how firms build competitive presence and advantages in a global context. A primary learning objective is to enable readers to understand and evaluate the major issues in strategy formulation and implementation in a global context. Third, it provides an accessible framework that will help guide readers in making strategic decisions that are sound and effective. It offers a unifying process that delineates the necessary steps in analyzing the readiness of a firm to do business abroad. In addition to core issues, each chapter presents frameworks, analytical tools, action-oriented items, and a real-world case - all designed to provide insights on the challenges imposed by globalization and technology on managers operating in a global context.

HR Focus

Most research on writing has been from the standpoint either of the system (alphabet, language etc) or the reader. Very little has examined the history of writing from the viewpoint of the producer of the handwritten script. .. This book examines Homo sapiens as a writer, without separating different kinds of scripts and documents in a particular era, and focuses on the physical aspects of scripts. There are five dimensions to this wide-ranging study: writing schools, where the art is acquired; the design of manuscripts; the different kinds of scripts used by writers; the postures assumed during writing and the movements it involves; and the personal characteristics of handwriting

Studies in the Linguistic Sciences

Includes entries on such topics as psychoanalysis, assertiveness training, neurotransmitters, and small-sample statistics.
