American Artisan

Documents of the Senate of the State of New York

"This book provides the most recent technical information related to the computational models of the text mining process, discussing techniques within the realms of classification, association analysis, information extraction, and clustering. Offering an innovative approach to the utilization of textual information mining to maximize competitive advantage, it will provide libraries with the defining reference on this topic"--Provided by publisher.

A Compilation of Laws on Natural Resources and Indigenous Peoples' Rights: Indigenous peoples' rights

The Athenaeum

This manual provides guiding principles for the use of patent data in the context of S&T measurement, and recommendations for the compilation and interpretation of patent indicators in this context.

Discover new techniques for researching patents and trademarks! Patent and Trademark Information: Uses and Perspectives addresses an essential yet undervalued and often underused class of scientific and technical information. Library staff, information specialists, corporation heads and administrators, inventors, school faculty, scientists, engineers, and engineering, science and library students will gain valuable insight on historical research, practical applications, and the availability and accessibility of patenting authorities. This book focuses on methods for searching international patents and trademark information for patrons of the library using the Internet, databases, and other sources. This book contains tips and nuts-and-bolts advice from experienced librarians who either practice in patent and trademark depository libraries or are experts in researching patents for library patrons. Their advice will help you navigate decision points and search paths for locating patent and trademark information from state, federal, and international sources. Special features include tables and figures, as well as bibliographies that provide extensive resources for locating additional information. The first half of the book is dedicated to issues involving patents, including: disseminating enemy technical information during World War II basic novelty patent searching in seven steps using patent information for historical genealogical research esp@cenet®—Europe's network of patent databases regional patent systems—a challenge for the international searcher patent data for technology assessment—applications, patent databases, and retrieval methods The second half of Patent and Trademark Information guides you in searching out trademarks, company and owner names, and databases. An entire chapter is dedicated to searching for trademark and/or company names for each of the 50 states, Puerto Rico, and the District of Columbia. Another chapter investigates five free international Web-based patent sites.

This publication provides an overview of the importing process and contains general information about import requirements. This edition contains much new and revised material brought about because of changes in the law, particularly the Customs Modernization Act. The Customs modernization provisions has fundamentally altered the process by shifting to the importer the legal responsibility for declaring the value, classification, and rate of duty applicable to entered merchandise. Chapters cover entry of goods, informed compliance, invoices, assessment of duty, classification and value, marking, special requirements for alcoholic beverages, motor vehicles and boats, import quotas, fraud, and foreign trade zones. In addition to the material provided by the U. S. Customs Service, the private commercial publisher of this book has provided a bonus chapter on how to build a tax-free import-export business.
