Slaves of the Shah

Diatonic Arpeggios for Classical Guitar provides extended arpeggios for all chords over the full range of the guitar's tessitura. The fingerings provided for the left

hand present a wide variety of shifting possibilities: open-string, glide, free-finger and squeeze shifts. Right-hand fingerings demonstrate sequencing patterns that will improve control and dexterity when navigating the thorniest concert repertoire.

Journey To Enchantment

Editing is an invisible art where the very best work goes undetected. Editors strive to create books that are enlightening, seamless, and pleasurable to read, all while giving credit to the author. This makes it all the more difficult to truly understand the range of roles they inhabit while shepherding a project from concept to publication. In *What Editors Do*, Peter Ginna gathers essays from twenty-seven leading figures in book publishing about their work. Representing both large houses and small, and encompassing trade, textbook, academic, and children's publishing, the contributors make the case for why editing remains a vital function to writers—and readers—everywhere. Ironically for an industry built on words, there has been a scarcity of written guidance on how to actually approach the work of editing. This book will serve as a compendium of professional advice and will be a resource both for those entering the profession (or already in it) and for those outside publishing who seek an understanding of it. It sheds light on how editors acquire books, what constitutes a strong author-editor relationship, and the editor's vital role at each stage of the publishing process—a role that extends far

beyond marking up the author's text. This collection treats editing as both art and craft, and also as a career. It explores how editors balance passion against the economic realities of publishing. What Editors Do shows why, in the face of a rapidly changing publishing landscape, editors are more important than ever.

Enchanted: Erotic Bedtime Stories for Women

Alexei Romanov, heir to the Russian throne, is in deadly danger. It's 1916, the struggling Russian people are tired of war and are blaming their Romanov rulers for it, and some are secretly plotting to murder the young heir and his family. But nobody outside the palace knows that Alexei suffers from a terrible bleeding disease, hemophilia, which threatens to finish him off even before the family's enemies can. The only person able to help Alexei is the evil and powerful religious mystic Rasputin -- and now Rasputin is trying to kill him too! Desperate, Alexei flees through time to New York City in 2010, using a method taught to him by the mad monk himself. In New York, Alexei meets smart and sassy Varda Rosenberg, and discovers she is a distant cousin. Varda is working on a gene therapy cure for hemophilia, as the disease still runs in the family. When Alexei learns that history shows that his entire family will be assassinated in 1918, he and Varda travel back in time to the Russian Revolution, with Rasputin hot on their heels. Will they be able to rescue Alexei's family before it's too late? Staton Rabin lets Alexei tell his own riveting story in a rousing adventure with stunning surprises -- a movingly

authentic look at royalty and revolution in the days of the tsars.

In 1992, Lois Duncan, acclaimed author of fictional suspense novels, wrote a horror story she could never have imagined writing—a true account of the murder of her own daughter, Kaitlyn Arquette. Kait, 18, was shot to death as she drove home from a friend’s house on a Sunday evening in Albuquerque, New Mexico. Police closed the unsolved case as a “random shooting,” refusing to accept information that indicated otherwise, although it had all the earmarks of a professional hit. That first book, *WHO KILLED MY DAUGHTER?*, was Duncan’s desperate attempt to motivate informants and prevent the facts of Kait’s story from becoming buried. It turned out to accomplish much more than that. Duncan’s new book, *ONE TO THE WOLVES: ON THE TRAIL OF A KILLER*, is even more horrifying than its predecessor as new information poured in, the family ran for their lives, and their original suspicions turned out to be the tip of an iceberg so immense that Kait, herself, could not have known how dangerous the information was that she had been sitting on in order to protect a now-estranged boyfriend. Since Kait didn’t live to reveal it, her mother now does so in a book so intense and yet so painfully human that the reader will never forget it. All of the elements of a suspenseful mystery are here--intrigue, turns and twists, cover-ups, and page-turning action. The sobering fact is that, this time, the story isn’t fiction.

His Heart Her Soul

Great CIOs consistently exceed key stakeholders' expectations and maximize the business value delivered through their company's technology. What's their secret? Sure, IT professionals need technological smarts, plus an understanding of their company's goals and the competitive landscape. But the best of them possess a far more potent ability: they forge good working relationships with everyone involved in an IT-enabled project, whether it's introducing new hardware or implementing a major business transformation. In *The CIO Edge*, the authors draw on Korn/Ferry International's extensive empirical data on leadership competencies as well as Gartner's research on IT trends and the CIO role. They prove that, for IT leaders, mastering seven essential skills yields big results. This new book lays out the people-to-people leadership competencies that the highest-performing CIOs have in common—including the ability to inspire others, connect with a diverse array of stakeholders, value others' ideas, and manifest caring in their relationships. The authors then explain how to cultivate each defining competency. Learn these skills, and you'll get more work done through others' enabling you to successfully execute more IT projects, generate better results for your company, and concentrate your efforts where they'll exert the most impact. The payoff? As the authors show, you'll work smarter, not harder—and get promoted far faster than your peers.

One to the Wolves

Ebony Triggs and her sister have accepted their birthright to be the magnificent ones, protectors of the innocent. They have been working on improving their magickal powers with the help of close friends the Pierce family. Ebony and Eliza have been working hard, with one common goal in mind, destroying the demon that killed their parents sixteen years ago. Will they ever find him and succeed at destroying him or will fighting evil become a daily occurrence for the sisters? Entering her senior year of high school, Ebony already has more than most teens on her plate, but when things continue to change in her life she must rely on her immortal friends, the Pierce

This volume documents the evolution and impact of one of the most enduring sources and symbols of sectarian conflict in Ireland - Protestant millennialism. The volume explores new sources and offers new conclusions, setting a new research agenda and emphasizing the vitality of religious discourse in Irish studies.

Delicious Sh*t My Recipes

Fifty years ago-on April 26, 1956-the freighter Ideal X steamed from Berth 26 in Port Newark, New Jersey. Flying the flag of the Pan-Atlantic Steamship Company,

she set out for Houston with an unusual cargo: 58 trailer trucks lashed to her top deck. But they weren't trucks—they were steel containers removed from their running gear, waiting to be lifted onto empty truck beds when Ideal X reached Texas. She docked safely, and a revolution was launched—not only in shipping, but in the way the world trades. Today, the more than 200 million containers shipped every year are the lifeblood of the new global economy. They sit stacked on thousands of box boats that grow more massive every year. In this fascinating book, transportation expert Brian Cudahy provides a vivid, fast-paced account of the container-ship revolution—from the maiden voyage of the Ideal X to the entrepreneurial vision and technological breakthroughs that make it possible to ship more goods more cheaply than ever before. Cudahy tells this complex story easily, starting with Malcom McLean, Pan-Atlantic's owner who first thought about loading his trucks on board. His line grew into the container giant Sea-Land Services, and Cudahy charts its dramatic evolution into Maersk Sealand, the largest container line in the world. Along the way, he provides a concise, colorful history of world shipping—from freighter types to the fortunes of steamship lines—and explores the spectacular growth of global trade fueled by the mammoth ships and new seaborne lifelines connecting Asia, Europe, and the Americas. Masterful maritime history, *Box Boats* shows how fleets of these ungainly ships make the modern world possible—with both positive and negative effects. It's also a tale of an historic home port, New York, where old piers lie silent while 40-foot steel boxes of toys and televisions come ashore by the thousands, across the bay in New Jersey.

This book provides up-to-date knowledge on all aspects of the multidisciplinary approach to pulmonary rehabilitation that is essential in order to achieve optimal results. It will be an ideal resource especially for pulmonologists in training, but will also be of value for physiotherapists, other health care professionals, and technicians. Detailed information is presented on the diverse program components in pulmonary rehabilitation, with clear explanation of the roles of the nutritionist, psychologist, occupational therapist, respiratory nurse, and physical activity coach. Guidance is provided on identification of candidates for pulmonary rehabilitation and on all aspects of assessment, including exercise capacity, muscle function, and physical activity. Patient-centered, economic, and other outcomes are examined, with separate discussion of combined outcome assessment. Furthermore, due consideration is given to organizational aspects of pulmonary rehabilitation and to rehabilitation in specific scenarios, e.g., thoracic oncology and surgery, transplantation, and the ICU. The authors are internationally recognized experts selected for their expertise in the topics they discuss.

The Curse of the Romanovs

Stormy has had visions of random people all her life, but she's never told anyone.

Rain has been around for a long time. As the Alpha wolf shifter of a pack he has seen a lot of crap, but when that crap turns into a storm he had to walk away from the packs only home in Texas. When he finally comes back he meets Stormy. Stormy really likes Rain, but can she trust him when push comes to shove? Rain doesn't know if he can get over his past to be with Stormy, but he has to save her when the other shoe hits the fan. Can he do it and maybe find love along the way?

Writing about Reading

My name is Antoinette McCarvey. I'm a good girl. Ask anyone at church, school, or work. They would all agree. Except things have been happening around me lately. Things that make me think maybe I've miscalculated my life completely. Something's wrong. All of my life I've been told how beautiful, smart, talented, and wonderful I am. I even go to church every time the doors are open for crying out loud! But the truth, well, I'm afraid the truth is a little harder to swallow, and a lot harder to stomach. My good has been looking a little rough around the edges. I'm starting to crack under the pressure of being the image of goodness Mama

believes I am. Nobody is that good. That's why I'm here, in the police station, getting ready to confess to a couple of murders. This is what happens when good gives birth to crazy.

Blood on the Water

As her New York Times bestselling novels always remind us, Anne Perry is a matchless guide to both the splendor and the shame of the British Empire at the height of its influence. In her twentieth William Monk mystery, she brings us to London's grand Mayfair mansions, where the arrogant masters of the Western world hold sway—and to the teeming Thames waterfront, where one summer afternoon, Monk witnesses the horrifying explosion of the pleasure boat Princess Mary, which sends to their deaths nearly two hundred merrymakers. The tragedy is no accident. As commander of the River Police, Monk should handle the case, but the investigation is turned over to the commissioner of the Metropolitan Police. An Egyptian man is swiftly caught, tried, and sentenced to die. But almost as quickly, Monk presents evidence that Habib Beshara, though a nasty piece of work, was elsewhere at the time of the blast. The investigation, now in complete disarray, is hastily turned over to Monk. Is the crime connected with the soon-to-be-opened Suez Canal, which will enormously benefit wealthy British shipping companies? Or did all of those innocent people drown to ensure the death of just one? How did the bomber board the ship, and how did he manage to escape? Is he an anarchist or a

madman? Backed up by his astute wife, Hester, and his old reliable friend Oliver Rathbone, Monk vows to find answers—but instead finds himself treading the dangerous waters of international intrigue, his questions politely turned aside by a formidable array of the powerful and privileged. Events twist and turn like the Thames itself, leading to the shattering moment when Monk realizes, perhaps too late, that he is the next target. Praise for Anne Perry and her William Monk novels *Blood on the Water* “[An] unfailingly rewarding series.”—The New York Times Book Review “Riveting . . . one of Perry’s most engrossing books.”—The Washington Times “Tension-filled . . . intricate and densely plotted . . . Victorian London comes alive.”—BookPage *Blind Justice* “Ranks among the best . . . Perry has written. Her courtroom scenes have the realism of Scott Turow.”—Huntington News *A Sunless Sea* “Anne Perry’s Victorian mysteries are marvels.”—The New York Times Book Review *Acceptable Loss* “Masterful storytelling and moving dialogue.”—The Star-Ledger *Execution Dock* “[An] engrossing page-turner . . . There’s no one better at using words to paint a scene and then fill it with sounds and smells than Anne Perry.”—The Boston Globe *Dark Assassin* “Brilliant . . . a page-turning thriller . . . blending compelling plotting with superbly realized human emotion and exquisite period detail.”—Jeffery Deaver, author of *Edge* *The Shifting Tide* “The mysterious and dangerous waterfront world of London’s ‘longest street,’ the Thames, comes to life.”—South Florida Sun-Sentinel

The Lives of the Lord Chancellors and Keepers of the Great Seal of Ireland

This book explores the growing tension between the requirements of employers for a flexible work force and the ability of parents and communities to nurture their children and provide for their health, welfare, and education. Global competition and the spread of information technology are forcing businesses to engage in

rapid, worldwide production changes, customized marketing, and just-in-time delivery. They are reorganizing work around decentralized management, work differentiation, and short-term and part-time employment. Increasingly, workers must be able to move across firms and even across types of work, as jobs get redefined. But there is a stiff price being paid for this labor market flexibility. It separates workers from the social institutions--family, long-term jobs, and stable communities--that sustained economic expansions in the past and supported the growth and development of the next generation. This is exacerbated by the continuing movement of women into paid work, which puts a greater strain on the family's ability to care for and rear children. Unless government fosters the development of new, integrative institutions to support the new world of work, the author argues, the conditions required for long-term economic growth and social stability will be threatened. He concludes by laying out a framework for creating such institutions.

It's said that decisions are made in the details. And yet, we make hundreds, even thousands of decisions daily. So how do Christians process all those details and come up with answers that please God? In *Decision-Making by the Book*, author, lecturer, and radio personality, Haddon W. Robinson, takes his usual clear-eyed, not-a-word-wasted approach, to help you make decisions according to biblical

principles—every time.

With the bravura storytelling and pungent authenticity of detail she brought to her acclaimed Lymond Chronicles, Dorothy Dunnett, grande dame of the historical novel, presents The House of Niccolò series. The time is the 15th century, when intrepid merchants became the new knighthood of Europe. Among them, none is bolder or more cunning than Nicholas vander Poele of Bruges, the good-natured dyer's apprentice who schemes and swashbuckles his way to the helm of a mercantile empire. In 1461, Nicholas is in Florence. Backed by none other than Cosimo de' Medici, he will sail the Black Sea to Trebizond, last outpost of Byzantium, and the last jewel missing from the crown of the Ottoman Empire. But trouble lies ahead. Nicholas's stepdaughter--at the tender age of thirteen--has

eloped with his rival in trade: a Machiavellian Genoese who races ahead of Nicholas, sowing disaster at every port. And time is of the essence: Trebizond may fall to the Turks at any moment. Crackling with wit, breathtakingly paced, *The Spring of the Ram* is a pyrotechnic blend of scholarship and narrative shimmering with the scents, sounds, colors, and combustible emotions of the 15th century.

This unique text shows students and professionals how geographic information systems (GIS) can guide decision making about complex community and environmental problems. The authors' step-by-step introduction to GIS-based decision analysis methods and techniques covers important urban and regional issues (land, transportation, and water resource management) and decision processes (planning, improvement programming, and implementation). Real-world case studies demonstrate how GIS-based decision support works in a variety of

contexts, with a special focus on community and regional sustainability management. Ideal for course use, the book reinforces key concepts with end-of-chapter review questions; illustrations include 18 color plates.

The Safavid dynasty represented the pinnacle of Iran's power and influence in its early modern history. The evidence of this - the creation of a nation state, military expansion and success, economic dynamism and the exquisite art and architecture of the period is well-known. What is less understood is the extent to which the Safavid success depended on an elite originating from outside Iran: the slaves of Caucasian descent and the Armenian merchants of Isfahan. This book describes how these elites, following their conversion to Islam, helped to transform Isfahan's urban, artistic and social landscape.

The Spring of the Ram

Many books that challenge religious belief from a skeptical point of view take a combative tone that is almost guaranteed to alienate believers or they present complex philosophical or scientific arguments that fail to reach the average reader. This is undoubtedly an ineffective way of encouraging people to develop critical thinking about religion. This unique approach to skepticism presents fifty commonly heard reasons people often give for believing in a God and then raises legitimate questions regarding these reasons, showing in each case that there is much room for doubt. Whether you're a believer, a complete skeptic, or somewhere in between, you'll find this review of traditional and more recent arguments for the existence of God refreshing, approachable, and enlightening. From religion as the foundation of morality to the authority of sacred books, the compelling religious testimony of influential people, near-death experiences, arguments from Intelligent Design, and much more, Harrison respectfully describes each rationale for belief and then politely shows the deficiencies that any good skeptic would point out. As a journalist who has traveled widely and interviewed many highly accomplished people, quite a number of whom are believers, the author appreciates the variety of belief and the ways in which people seek to make religion compatible with scientific thought. Nonetheless, he shows that, despite the prevalence of belief in God or religious belief in intelligent people, in the end there are no unassailable reasons for believing in a God. For skeptics looking for

appealing ways to approach their believing friends or believers who are not afraid to consider a skeptical challenge, this book makes for very stimulating reading.

Puritanism was an intensely eschatological movement. From the beginnings of the movement, Puritan writers developed eschatological interests in distinct contexts

and often for conflicting purposes. Their reformist agenda emphasized their eschatological hopes. In a series of readings of texts by John Foxe, James Usser, George Gillespie, John Rogers, John Milton and John Bunyan, this book provides an interdisciplinary exploration of Puritan thinking about the last things.
