## Delirium

Concurrency describes any potential time overlap in a set of activities. Its most onerous complexities have been tackled mostly by parallel programmers trying to speed up their applications by harnessing the power of multiple computers (processors, or cores) tied together. Other programmers have mostly remained content with the relative simplicity and ever-increasing speeds of standard sequential (non-parallel) computers, and the rest of us with one-step-at-a-time approaches. But those days are ending: Typical processor speeds have leveled off, and now even laptops and phones are picking up the slack by integrating multiple processors and graphics coprocessors. In the human realm, as communication of all sorts becomes faster and more ubiquitous, we have ever more services (by computers and people) at our disposal, their decentralized nature implying concurrency. How can we humans plan for, and keep track of, all this available concurrency with our "one track" minds? Can these concurrent plans scale up to exploit ever larger collections of processors and/or services? This text uses simple analogies, examples, and thought experiments to explain basic concepts in concurrency to a broad audience, and to devise an intuitive "elementary particle of activity." A new graphical representation called ScalPL (Scalable Planning Language) is then introduced for building even complex concurrent activities of all kinds from those elemental activities, one mind-sized bite at a time. For programmers, structured and object-oriented programming are extended into the concurrent realm, and performance techniques are explored. For the more serious student, axiomatic semantics and proof techniques are covered. As the world becomes flatter, communication speeds increase, organizations become decentralized, and processors become ubiquitous, Scalable Planning will help you master the trend toward increased concurrency which is here to stay.

## Economics in One Lesson

"Tell me a story, Daddy," was the favorite way to fight boredom as we traveled

when our three daughters were young. Those stories became the basis of the stories in this book. Spend a summer with Pat and Mike as they explore a haunted house, dig for buried treasure, solve a robbery, explore their grandparents farm., and have several other exciting adventures. Each of the ten chapters is a complete story. After authoring several books, the girls requested I write down the stories of Pat and Mike. This book is a result of that request.

This book links the theory of finance to the decisions related to various aspects of the financial management of an organisation. In order to provide the reader with a better understanding of the concept of finance, a theoretical guide to related terminology is included here. The case studies brought together require students to look deep into the concepts of finance in order to solve the problems and issues

they present. The case studies here focus on important concepts of finance which help students to relate the concept with decision-making processes.

Building up your strategic network is a key component of getting ahead in business. It's not enough to have the skills. You must network with others who can help you get ahead. Juliette C. Mayers, president and CEO of Inspiration Zone LLC, gives you practical advice on how to build your personal brand and strategic networking plan in her new book *The Guide to Strategic Networking: Dream. Plan. Create. Achieve.* Mayers expands upon the principles shared in her first book to include help on how to develop an action plan. Here, she offers a mix of advice and encouragement in order to inspire you to make your dreams come true. Mayers uses examples of her own career, including how she became president of a firm specializing in multicultural consulting, brand management, and thought leadership. She also draws from her leadership experience at GE Capital, Bank of Boston, The Ad Club Foundation, and Blue Cross Blue Shield of MA. Also included are action-oriented "Making It Real" exercises to help you develop your own written strategic networking plan. Get in touch with those who can help you succeed at business and in your career-from using social media effectively to understanding the importance of attending networking events, Mayers lays out an easy roadmap for you to follow.

Curt Flewelling's mission is to ignite a spark in every American to follow God's call to greatness. Now is the time. Join him in Reshaping America!

## **The Adventures of Pat and Mike**

#1 New York Times Bestseller "SignificantThe book is both instructive and surprisingly moving." —The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's

exceptionally effective culture, which he describes as “an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency.” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what he’s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book’s hundreds of practical lessons, which are built around his cornerstones of “radical truth” and “radical transparency,” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, *Principles* also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they’re seeking to achieve. Here, from a man who has been called both “the Steve Jobs of investing” and “the philosopher king of the financial universe” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you’ll find in the conventional business press.

He does his best to protect Marcia but when the kidnapper strikes again, Marcia decides enough is enough and circumstances force her to hatch a daring plan that will end in either her death – or freedom.

## **Reshaping America**

Strategic non-action is a powerful yet under-rated method of influencing worldly affairs. In cultures where action is favoured over inaction, like in the West, direct action is considered a virtue while inaction is little more than laziness or cowardice. Let us be more subtle and nuanced in our understanding. There is a time for both action and inaction. Non-action gives access to a deeper intuitive awareness than that gained through action, since knowledge that comes through action is obscured by situation-specific reactions. Non-action is an aspect of going with the flow, not resisting the larger forces that govern a world of which you are a small part. It acknowledges that events are governed by the laws of Nature, and it is often best to simply allow those laws to operate and play out in their own time, in their own way. Non-action can help us towards our goals by encouraging patience

and taking the long-view. Humanistic Psychology says that it is within our reach to create the life we want for ourselves. As we think and believe, so we create our world. This is indeed true, but only up to a point. We can transform our lives in goal fulfilling ways, but the transformation is relatively slow, its progress measured in months and years.

The personal is not only political, it's also economic and sexual: as a society, we're encouraged to view economics as objective science far removed from us—when in reality it has concrete and far-reaching effects on our everyday lives. In *Screwnomics*, Rickey Gard Diamond shares personal stories, cartoons, and easy-to-understand economic definitions in her quest to explain the unspoken assumptions of 300 years of EconoMansplaining—the economic theory that women should always work for less, or better for free. It unpacks economic definitions, turns a men-only history on its head, and highlights female experiences and solutions. Encouraging female readers to think about their own economic memoir and confront our system's hyper-masculine identity. In the past fifty years, the US has witnessed a major shift in economic theory, and yet few women can identify or talk about its influence in their own lives. Accessible and inspiring, *Screwnomics* offers female readers hope for a better, more inclusive future—and the tools to make that hope a reality.

### **Principles of Economics**

Life is created by a series of events. If you can find some way to pull 20 extra minutes out of your life, you'd better use them wisely. Where will you discover this time, and when you find this time, how will you use it? Just 20 minutes a day will convert into a powerful 121 hours a year. That is a huge piece of time that you can use to gain new capacities and expand. The advantage is seen when we make a day by day decision and submit those 20 minutes to something beneficial. You can awaken 20 minutes before, take 20 minutes from lunch, after work, or just before bed - the decision is totally up to you. Just do it! Remove all excuses and distractions. Imagine if you just use 20 minutes a day to create a spark for your business. That small spark can turn into a major flame! How do you create this spark for your business? It's through promotion. Promotion isn't something that ought to be done randomly, just when you think you have sufficient energy to do it. Honestly, as an entrepreneur who's always busy, you're never going to have room schedule-wise. Consequently, you need to make time for what's important. This implies doing something intentional each and every day. Before you think you don't have room schedule-wise to do that, reconsider. Showcasing doesn't need to be hours of your day. Instead, it's something you can do in as little time as 20 minutes a day.

### **The Guide to Strategic Networking**

This book, entitled "How to Fly like an Eagle," is a motivational book written by the author in French, Spanish, and English to help people learn the techniques and to get the skills to help them to fly to the top like that bird of prey which is the eagle. In this book, the readers will learn how to overcome obstacles and to cultivate the fruit of persistence which is an essential factor in the process of transformation of desire into its monetary equivalent. The basis of persistence is the power of will. When this power and desire combine correctly, they form an irresistible combination, the perfect one to help you overcome your failures. There are four

simple steps which lead to the habit of persistence. This does not require a large amount of intelligence or a special education, but time and minimal effort. The four steps are as follows: 1- A target set backed by a burning desire to achieve it. 2- A definite plan, expressed in continuous action. 3- A closed mind to any negative influence (including negative suggestions of relatives, friends and others). 4- A harmonious agreement with one or more persons, able to lead someone to go forward with the plan and with the goal. These four steps are essential for success in all areas of life. These are the steps with which you can control your economic destiny. These are the steps that lead to freedom and independence of thought, that convert dreams into reality. These are the steps that lead to the domination of fear, discouragement and indifference. I do not know the situation you are facing currently, maybe you are in a wheelchair, or in a hospital bed and without any hope of survival, maybe you're on the verge of divorce, or you are unable to complete your schooling or university, or find a job. You can now be crawling like a snake or you have broken wings preventing you from being able to fly like an eagle, but one thing is certain, regardless of your economic, family, health situation you can have a better life, develop your potential and fly as high as the eagle above any obstacles or constraints you are facing right now. Of course, this will be possible if you apply the principles to be taught in this book. I testify to you with all my heart that this book has the power to transform the lives of people from nothing to excellence, from the dust of the ground to the top of success. I promise you if you read it, and put the principles into practice, your life will be completely blessed!

## **The Big Spark**

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very

simple -- if they win, they rule, if they lose, they must suffer the consequences.

### **The Art of Strategic Non-Action**

Each of us was given a specific assignment to achieve in this lifetime. It was handed to us before we were born. As children, we were connected to that authentic purpose, expressing ourselves in our own unique ways. Most of us lose touch with who and what we truly wanted to be by the time we become adults. In Victory is Vision, Carey Conley takes you on a journey to discover who you were always meant to be. Through the activities provided you'll identify what's held you back from living your purpose and passion and how to move beyond those walls to

create a vision that is bigger than any obstacle you might encounter. As co-creator of the inspired community Infinite Nation Conley has carved out a niche helping others identify their desires and define their goals through vision building. She has helped hundreds of entrepreneurs turn their visions into victories.

## **Scalable Planning**

With over a million copies sold, *Economics in One Lesson* is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the “Austrian School,” which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One Lesson*. Hazlitt’s focus on non-governmental solutions, strong — and strongly reasoned — anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make *Economics in One Lesson* every bit as relevant and valuable today as it has been since publication.

## **Action!**

### **Satir Family Therapy in Action**

Since Maria Gomori first met and studied with Virginia Satir in 1968, she has worked tirelessly around the world to fulfill Satir's dream of changing the world "one family at a time." In *Satir Family Therapy in Action*, Maria presents five varied and impactful cases from a family therapy teaching project conducted in China in 2011 and 2012. Testament to the universality of underlying issues in cultures across the globe, the sessions will be inspirational both to parents and families and to practitioners and students. They are masterclasses in the art of family therapy, demonstrating Maria's firm belief that change in families is always possible. *Satir Family Therapy in Action* also contains two personal essays, one on the life and pioneering work of Virginia Satir, another on Maria's own involvement in the development of Satir's work in North America, Asia, and around the world.
