Ernest Abernathy is a writer who wanders in and about historic haunted mansions in the Maritimes with a partner who has gifted capabilities of her own. The pair meet ghosts of the past who have been earthbound and seek release to join their comrades in either Heaven or Hell depending on their deeds while on earth. The second story is about another Abernathy, also from the eastern part of Canada. His name is Ahab and like the sailor of old he is a sea captain. His ship the Mary Jane and his crew of divers are after sunken treasure and dive on relics that sank back when Spain was taking gold and silver from the Americas.

THE NEW MONTHLY MAGAZINE. VOL.137

When Will returns to Medicine River, he thinks he is simply attending his mother's funeral. He doesn't count on Harlen Bigbear and his unique brand of community planning. Harlen tries to sell Will on the idea of returning to Medicine River to open shop as the town's only Native photographer. Somehow, that's exactly what happens. Through Will's gentle and humorous narrative, we come to know Medicine River, a small Albertan town bordering a Blackfoot reserve. And we meet its people: the basketball team; Louise Heavyman and her daughter, South Wing;

Martha Oldcrow, the marriage doctor; Joe Bigbear, Harlen's world-travelling, storytelling brother; Bertha Morley, who has a short fling with a Calgary dating service; and David Plume, who went to Wounded Knee. At the centre of it all is Harlen, advising and pestering, annoying and entertaining, gossiping and benevolently interfering in the lives of his friends and neighbours.

Engineering News

"Over the past decade, the impacts of demographic trends on international security and on peaceful relations between and within states have come to the fore in ways not seen since the aftermath of World War II. An evolving and more complex set of changes in the size, distribution, and composition of populations has become the basis for a new look at the security effects of changes in the size, distribution, and composition of populations. This book is an attempt to lay out the new look, to take issue with some of the prevailing views on the political consequences of population change and to suggest where the concerns are realistic and where they are not." (From the Preface) This book not only offers a magisterial analysis of the political effects of the dramatic population changes that are taking place in countries all around the world, it also represents the testimony of one of the most distinguished scholars in the field of migration and population studies.

Dudley Pound served for longer on the Chiefs of Staff Committee in wartime than any other serviceman in either of the two World Wars. He was the professional head of the Royal Navy from July 1939 until his resignation, shortly before his death, in August 1943. He had to cope with the problems of Hitler by day and Churchill by night, of trying to make the old ships of the Royal Navy face the challenge of the modern navies of Germany, Italy and Japan. Pound had to run the operational HQ of the Admiralty while also chairing the Chiefs of Staff Committee. As such he was involved in some of the most controversial decisions in the Naval War in Norway 1940, the sinking of the French Fleet, the despatch of The Prince of Wales and Repulse to Singapore, the scattering of convoy PQ17 while, all the while, courageously fighting failing health and enduring huge strain. However by the time of his death the Battle of the Atlantic had been won and the Mediterranean cleared. Churchill's Anchor aims to put Dudley Pound's achievements into context. He held a succession of key commands from a battleship at Jutland to the Mediterranean fleet for four years, alternating with key appointments at the Admiralty. He was at the centre of naval affairs from 1914 until his death in 1943.
