### **The AMA Handbook of Business Writing**

One bleak, late winter's day, Julie Myerson finds herself in a graveyard, looking for traces of a young woman who died nearly two centuries before. As a child in Regency England, Mary Yelloly painted an exquisite album of watercolours that uniquely reflected the world she lived in. But Mary died at the age of twenty-one, and when Julie comes across this album, she is haunted by the potential never realised, the barely-lived life cut short. And most of all, she is reminded of her own child. Because only days earlier, Julie and her husband locked their eldest son out of the family home. He was just seventeen. How could it have come to this? After a happy growing-up, it had taken only a matter of months for this bright, sweet, good-humoured boy to completely lose his way and propel his family into daily chaos. He had discovered cannabis and was now smoking it everyday - and nothing they could say or do, no help they could offer, seemed to reach him. And Julie - whose emotionally fragile relationship with her own father had left her determined to love her children better - had to accept that she was, for the moment at least, powerless to bring back the boy she had known. Honest, warm and often profoundly upsetting, this is the parallel story of a girl and a boy separated by centuries. The circumstances are very different, but the questions remain terrifyingly the same. What happens when a child disappears from a family? What will survive of any of us in memory or in history? And how is a mother to cope when love - however absolute, however unconditional - is not enough to save her child?

A revolutionary process based on the four chambers of the heart and rooted in Toltec wisdom that brings emotional clarity, healing, and freedom The Warrior Heart Practice is a powerful new method to reconnect with our sense of authenticity and inner-knowing and realign with our true nature. Author of the bestselling book Warrior Goddess Training, HeatherAsh Amara has trained extensively in the Toltec tradition under the tutelage of don Miguel Ruiz, author of The Four Agreements. The Warrior Heart Practice is a revolutionary system based on the four chambered structure of the human heart. Walking through each of the four chambers—Feeling, Story, Truth, and Intent—readers learn to take stock of their current emotional and mental state and reframe their situation in a new healing light. The process begins in the Feeling chamber as readers accept the emotions they are currently experiencing without fighting or judging them. It then continues into the next chamber as readers witness the Story that they are telling themselves. In the Truth chamber, they learn to thoughtfully and objectively evaluate the reality of the situation. In the final chamber, they learn to define and focus their Intent. The last phase of the practice is the most profound—taking the knowledge they have gathered from the four chambers, readers then walk backwards through each of the four chambers, refocusing their Intent, Truth, Story, and Feelings based on what they've learned during the process. The Warrior Heart Practice leads to deep insights as readers learn to step outside of their preconceptions to realign with their true purposes and goals.

### **Administrative Assistant's and Secretary's Handbook**

Thomas Edison stunned America in 1879 by unveiling a world-changing invention--the light bulb--and then launching the electrification of America's cities. A decade later, despite having been an avowed opponent of the death penalty, Edison

threw his laboratory resources and reputation behind the creation of a very different sort of device--the electric chair. Deftly exploring this startling chapter in American history, *Edison & the Electric Chair* delivers both a vivid portrait of a nation on the cusp of modernity and a provocative new examination of Edison himself. Edison championed the electric chair for reasons that remain controversial to this day. Was Edison genuinely concerned about the suffering of the condemned? Was he waging a campaign to smear his rival George Westinghouse's alternating current and boost his own system? Or was he warning the public of real dangers posed by the high-voltage alternating wires that looped above hundreds of America's streets? Plumbing the fascinating history of electricity, Mark Essig explores America's love of technology and its fascination with violent death, capturing an era when the public was mesmerized and terrified by an invisible force that produced blazing light, powered streetcars, carried telephone conversations--and killed.
