### **Enticed by His Forgotten Lover**

Written in collaboration with Cornelius Castoriadis and Grace Lee, James examines the practical process of social revolution in the modern world. Inspired by the October 1956 Hungarian workers' revolution against Stalinist oppression, as well as the wildcat strikes of U.S. workers (against Capital and the union bureaucracies), James and his co-authors looked ahead to the rise of new mass emancipatory

movements by African Americans and anti-colonialist/anti-imperialist currents in Africa and Asia. Virtually alone among the radical texts of the time, *Facing Reality*, first published in 1958 by Marty Glaberman, rejected modern society's mania for "conquering nature," and welcomed women's struggles "for new relations between the sexes." A true masterpiece, and still one of the finest expositions of workers' self-emancipation around. This new 21st-century edition includes a new introduction by James's longtime friend, John H Bracey, situating the book in its 1950s/60s context, and accentuating its continued relevance in our time.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural

barriers that need to be overcome.
