### **Teen Guide to Personal Financial Management**

Managed care and government-led initiatives to control health care costs have decreased physician compensation. Physicians must now carefully plan their practices and seek financial security in a manner that is markedly different from other professionals. To do so, physicians and their advisors must be well informed about the growing range of financial planning options to choose the course that balances risk, cost, time horizon, outcome and their own personal economic style. This innovative guide confronts the reality that personal financial planning for physicians is decidedly more complex than it is in other professions. *Financial Planning for Physicians and Advisors* describes a personal financial planning program to help doctors avoid the perils of harsh economic sacrifice. It outlines how to select a knowledgeable financial advisor and develop a comprehensive personal financial plan, and includes important sections on: insurance and risk management, asset diversification and modern portfolio construction, income tax and retirement planning, and succession and estate planning. When fully implemented with a professional's assistance, this book will help physicians and

their financial advisors develop an effective long-term financial plan.

### **The ABC's of Personal Finance**

Bankruptcy Law: Principles, Policies, and Practice puts bankruptcy law in context, illuminating the evolution of the Bankruptcy Code with an exploration of current and historical non-bankruptcy remedies. The book continually approaches each topic through the goals of creditors and debtors, exploring how each is served in various parts of the Code. Extensive questions and numerous problems focus student attention on the mechanics of the bankruptcy process. But they do so through the lens of history and policy, and they explain why the law is the way it is. The Third Edition has been revised extensively throughout to reflect changes in the law and its underlying philosophy, as well as significant new case law developments. In addition, a new chapter adds coverage of bankruptcy jurisdiction. The authors' aim in designing the casebook was to provide a very accessible medium for introducing students to bankruptcy law in a sophisticated manner. As the title indicates, the emphasis is on the relationship between the core principles essential to an understanding of the law, the policies animating those principles, and the challenges presented by the effectuation of those principles and policies in bankruptcy practice. In its methodology, Bankruptcy Law: Principles, Policies, and Practice relies on a variety of expository tools--textual discussion, comprehension questions, problems, cases and thought / discussion questions--all with a careful

eye toward building upon previous materials and concepts. This eBook features links to Lexis Advance for further legal research options.

ESSENTIALS OF PERSONAL FINANCIAL PLANNING Essentials of Personal Financial Planning was written to challenge the status quo by promoting personal financial planning (PFP) as a profession, not as a sales tool to gather assets under management or facilitate sales of insurance products. The book takes a comprehensive and integrated approach to PFP for accounting students, allowing them to view the profession through the lens of a CPA - with integrity and objectivity. This book systematically introduces the essentials of all the major PFP topics (estate, retirement, investments, insurance, and tax), as well as: The PFP process, concepts and regulatory environment. Professional responsibilities of a CPA personal financial planner and the requirements of the Statement on Standards in PFP Services. Time value of money concepts. The book then builds on

these foundational concepts, showing their interconnectivity and professional opportunities, to provide a deeper understanding of PFP and its application. After reading this book, students will be able to apply the knowledge and skills gained from this course to have an immediate and long-term positive impact for themselves and for the clients they serve.
