The casual publication in 1877 of *The Tar Baby*, by Joel Chandler Harris found Harris his literary vocation. In the following years he developed his own plantation mythology in a series of volumes, narrated by Uncle Remus' telling colloquial tales of the wily hero Brer Rabbit and his clashes with the villain Brer Fox. *Tar Baby* is a collection of some of the finest of these often surreal and grotesque stories, and is presented as a classic of American literature for both adult readers and children of all ages.'

\* Pages of 8.5x11 are beautiful. English learning book for kids from 4-12 years  
Product details: 25 coloring pages for Egyptian pharaohs kings (civilization 7000 years) for children aged 4 to 12 years! For a child who loves history and ancient civilization, this book will help him. Ancient Egypt is an ancient civilization in the northeast of Africa. The civilization of the ancient Egyptians (1) was concentrated on the banks of the Nile in what is now the Arab Republic of Egypt. Egyptian civilization began around the year 3150 BC, when King Mina (Narmer) combined southern and northern Egypt together, and subsequently developed over the next three millennia. It historically contained a series of politically stable kingdoms, interspersed with periods of relative instability called intermediate periods. Ancient Egypt reached the height of its civilization in the era of the modern state, after which it entered the country in a period of slow decline. Egypt was attacked at that time by many foreign powers, and the rule of the Pharaohs officially ended when the Roman Empire invaded Egypt and made it one of its provinces. This coloring book is a great non-screen activity to stimulate a child's creativity and imagination. It makes a perfect gift! About a coloring book for the Egyptian kings of the Pharaohs\* Contains 25 completely unique coloring pages. There are no duplicate pictures in this book. Pages are one-sided to prevent liquefaction, so pages can be removed and displayed without losing an image on the back.\* We carefully designed each page to be fun and suitable for children ages 4 to 12. We have avoided designs that are too sophisticated as well as simplified. We think kids of this age love the fun coloring scenes that evoke their imagination, not a book full of simple shapes.

Sophie Germain, the first and only woman in history to make a substantial contribution to the proof of Fermat's Last Theorem, grew up during the most turbulent years of the French Revolution. Her mathematical genius was discovered by Lagrange around 1797. Published research about Germain focuses on her achievements, noting that she assumed a man's name at the *École Polytechnique* in Paris, to submit her own work to Lagrange. Yet, no biography has explained how Germain learned mathematics before that time to become so sure of her analytical skills to carry out such a daring act. *Sophie's Diary* is an attempt to answer this question: How did Germain learn enough mathematics to enter the world of Lagrange's analysis in the first place? In *Sophie's Diary*, Germain comes to life through a fictionalized journal that intertwines mathematics with history of mathematics plus historically-accurate accounts of the brutal events that took place in Paris between 1789 and 1793. This format provides a plausible perspective of how a young Sophie could have learned mathematics on her own—both fascinated by numbers and eager to master tough subjects without a tutor's guidance. Her passion for mathematics is integrated into her personal life

as an escape from societal outrage. Sophie's Diary is suitable for a variety of readers?both students and teachers, mathematicians and novices?who will be inspired and enlightened on a field of study made easy as is told through the intellectual and personal struggles of an exceptional young woman.
