Get the Grade: Edexcel AS/A2 Chemistry is the essential revision guide for the Edexcel specification. Written by George Facer, a Chair of Examiners and author of Edexcel AS Chemistry (2nd Edition) and Edexcel A2 Chemistry (2nd Edition), this accessible book will give students revising for AS and A2 Edexcel Chemistry the confidence needed to achieve the very best grades. Get the Grade breaks down each of the topics in the Edexcel specification into clear, manageable sections designed to increase knowledge and understanding of chemistry. It is a comprehensive tool, ideal for revising for each of the Unit Tests. It is also a valuable revision aid if you are studying other AS and A2 chemistry courses. These are some of the features you will find in the book: - A user-friendly format, dividing topics into easy-to-follow sections - Up-to-date examination questions - Advice on preparing for your Unit Tests - Questions for each topic to test your knowledge and understanding throughout the course - Unit Test style papers at the end of each Unit to help you prepare thoroughly for your exams - Answers to all questions set in the book to help you check your own understanding - Invaluable examiner's comments on the answers - Checklists to help you cover all key points during revision

One for the keeper shelf! Rediscover the heart-stopping thrills of this classic romantic suspense, only from New York Times bestselling author Heather Graham. It was the most dangerous role of her career...and possibly the last. Playing a malicious diva on a popular daytime soap, actress Kelly Trent has garnered more than her fair share of hate mail. She doesn't believe anyone would really confuse her with her character, but when an accident on the set hits too close for the producers' comfort, Kelly is unceremoniously put on hiatus. At her agent's suggestion, she agrees to appear in a music video, thinking the time away filming in the Florida Keys might be just the thing to put her life in perspective. But with two left feet, Kelly only hopes dance instructor Doug O'Casey can work miracles. A former Miami cop, Doug still has a lawman's instinct for trouble, and the continued threats made against Kelly tell him that she is in danger. Now, as a deranged fan closes in, Doug realizes that someone close to Kelly wants more than her character killed off the show—someone wants her stone-cold dead. Originally published in 2005

Complete Mathematics for Cambridge IGCSE®

"YOU HAVE CHANGED MY LIFE" is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. "I walk with a new spring in my step and I look at life through physics-colored eyes," wrote one such fan. When Lewin's lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, "Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube's greatest hits." For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. "I introduce people to their own world,"

writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.” Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

Psychology is full of agreements and disagreements! Here Richard Gross pairs up 30 studies to show you how the classic theories in Psychology are constantly revisited by modern researchers. In a new focus for this 6th edition, the emphasis is on how these classic and contemporary studies relate. From the differences and similarities between them you'll understand not just the studies themselves, but develop the study skills you need to write about Psychology in exams and essays. The aim is to help you understand how specific research and issues fit into the science of Psychology as a whole, and where that science is going. Key Studies in Psychology 6th Edition is a life-saver in the sea of Psychological research - grab onto it!

Biology for the IB Diploma Exam Preparation Guide

#1 New York Times Bestseller “SignificantThe book is both instructive and surprisingly moving.” —The New York Times Ray Dalio, one of the world’s most successful investors and entrepreneurs, shares the unconventional principles that he’s developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine’s list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater’s exceptionally effective culture, which he describes as “an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency.” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he’s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book’s hundreds of practical lessons, which are built around his cornerstones of “radical truth” and “radical transparency,” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that

Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.
