Innovations in Multi-Agent Systems and Application - 1

A unique interdisciplinary study of the relationships between climate, hydrology and human society from 20,000 years ago to the present day within the Jordan Valley. It describes how state-of-the-art models can simulate the past, present and future climates of the Near East, reviews and provides new evidence for environmental change from geological deposits, builds hydrological models for the River Jordan and associated wadis and explains how present day urban and rural communities manage their water supply. The volume provides a new approach and new methods that can be applied for exploring the relationships between climate, hydrology and human society in arid and semi-arid regions throughout the world. It is an invaluable reference for researchers and advanced students concerned with the impacts of climate change and hydrology on human society, especially in the Near East.

"60 Years of Holden" builds on the success of its predecessors (45 and 50 Years of Holden), bringing together vast amounts of technical information and specifications on the 100 model series that Holden has produced since it began manufacturing. Beginning with Holden's pre-1948 history, this book charts Holden's course in Australia, with

Water, Life and Civilisation

Two men born with different backgrounds who were destined to collide in Dallas, Texas. One man came from a family of great wealth and power, while the other man came from a family who struggled for everything they ever had. One stood for peace while the other man stood for confusion and deceit. President John F. Kennedy had a dangerous goal in mind: end the Cold War in his lifetime. Lee Harvey Oswald was a pawn used by his employers, the Central Intelligence Agency, to stop President Kennedy from reaching his goal. This is a fictional re-telling of the events which led up to President Kennedy's Assassination. It tells how President Kennedy fought to spread his message of world peace, and how the CIA stopped him at every turn.

"School boards, school administrators and school board attorneys are fortunate to have such a wonderful resource authored by one of the state's leading public employment attorneys. This authoritative treatise on public school employment

law provides school personnel with information they need to ensure school system personnel practices and decisions are consistent with legal requirements. I know that I will use this book often and that it will provide to be invaluable in my work with school systems."-Allison Schafer, Legal Counsel/Director of Policy, North Carolina School Boards Association "The most comprehensive book on education law in North Carolina. A must for attorneys and others who work in this area."-Tom Stern, Attorneys for the North Carolina Association of Educators "For years, school administrators have asked for a single source summarizing the various state and federal laws and State Board policies that govern employment in North Carolina's schools. Well, it has finally arrived, and its author is Bob Joyce: often quoted, highly respected, and one of the North Carolina's favorite experts in this area. The Law of Employment in North Carolina's Public Schools is a complete source of vital information presented in clear, understandable language. This volume is an absolute necessity for every school administrator who wants accurate information about benefits and employment close at hand!"-Linda Suggs, North Carolina Association of School Administrators A reference guide for school personnel administrators, school attorneys, and school employees, this book explains both the employment powers and responsibilities of school employers and the rights of school employees. It covers aspects of federal law, North Carolina statutory and common law, state board of education regulations, local board of education policies, and policy for specific positions.

World Bank Technical Paper No. 239. Efficient use and effective conservation of available water resources are priorities for policymakers. This paper reviews World Bank strategies for assisting developing countries in the comprehensive management of their water resources. It focuses mainly on the Bank's role in international water affairs and recommends a more proactive approach to promote dialogue, improve databases and analysis, and assist governments to manage their water resources more effectively. The study suggests that the Bank should strengthen its capacity to respond to requests for assistance in an objective, competent, and effective manner. Sustainable development should be the primary objective for its interventions.

'Glory Box' is a biography of Charles Edward Mills, written by his daughter Margaret Patricia Coralie Mills. Charles Mills was possibly the youngest soldier to be wounded at war. He was not yet 15 when he lied about his age to enlist. He went on to serve at the frontline in both World Wars. Margaret was born on 25 February 1935 in Adelaide, where she has spent all of her life. She is a retired civil construction site secretary. Margaret married twice, has three married daughters and five grandchildren. She enjoys daily reading, classical music and two glasses of white and one red every evening with her husband. The best South Australian bottled wine, naturally. Margaret believes she has the perfect stress-free lifestyle of living five days per week at the beach, enjoying daily walks and swims, then two days a week in the Adelaide Hills with her youngest daughter and family in their Granny flat. Margaret wrote 'Glory Box' at the age of sixty-eight years. 'Glory Box' is written in a loving, caring tone. There are recipes throughout, which give the reader a homely feeling. It is the story of a war hero and his loyal wife told by their loving daughter.

This book provides an overview of multi-agent systems and several applications that have been developed for real-world problems. Multi-agent systems is an area of distributed artificial intelligence that emphasizes the joint behaviors of agents with some degree of autonomy and the complexities arising from their interactions. Multi-agent systems allow the subproblems of a constraint satisfaction problem to be subcontracted to different problem solving agents with their own interest and goals. This increases the speed, creates parallelism and reduces the risk of system collapse on a single point of failure. Different multi-agent architectures, that are tailor-made for a specific application are possible. They are able to synergistically combine the various computational intelligent techniques for attaining a superior performance. This gives an opportunity for bringing the advantages of various techniques into a single framework. It also provides the freedom to model the behavior of the system to be as competitive or coordinating, each having its own advantages and disadvantages.

As voters articulate their judgments of the parties and leaders in their fifth democratic election, *Election 2014 South Africa: The Campaigns, Results & Future Prospects* provides a platform for in-depth discussion and analysis of party campaigns, voting patterns, and election results of the 2014 general elections. Following the tradition of previous volumes that cover South Africa's national and provincial elections since 1994, this book draws on the expertise of renowned authors to cover important aspects of the election, including the major political party campaigns, the media's coverage of the campaigns, the latest trends in political participation and party fortunes, gender dynamics, the black middle class, as well as insights into the voter and public opinion on the eve of the election. Readers are presented with more than a mere study of a single election; they are also presented with a contemporary understanding of electoral politics and democracy in South Africa over two democratic decades and reflections on how elections strengthen the quality and prospects for democracy.

The Constitutional attorney's memoir offers "fascinating and horrifying" accounts of over a dozen historic legal cases—from Watergate to Iran/Contra (Foresight). In this captivating memoir, attorney Daniel Sheehan recounts his path to becoming a public defense lawyer and takes you behind the scenes of more than a dozen historically significant American legal cases, all of which he litigated. The remarkable cases covered in this book include: * The Pentagon Papers Case * The Watergate Burglary Case * The Karen Silkwood Case, which revealed that the C.I.A.'s Israeli Desk had been smuggling 98% bomb-grade plutonium to the State of Israel and to Iran. * The American Sanctuary Movement Case, establishing the right of American church workers to aid Central American political refugees fleeing Guatemalan and Salvadorian "death squads." * The Iran/Contra Federal Civil Racketeering Case against the Reagan/Bush Administration, which Sheehan investigated, initiated, filed, and then litigated. The People's Advocate is the "real story" of these and many other historic American cases, told from the unique point of view of a central lawyer. "[Sheehan's] memories are both fascinating and horrifying. Fascinating because Sheehan places you directly inside the halls of power, and horrifying for the same reason . . . This memoir takes us directly inside Sheehan's fearless mind." —Foresight "Sheehan's recounting of his battles against wrong-doing, both in the courtroom and behind-the-scenes, is never less than enthralling to read." —Daniel Ellsberg, Pentagon Papers leaker and founding member of Freedom of the Press Foundation

#1 New York Times bestselling author Nora Roberts begins a new trilogy of adventure, romance, and magick in *The Awakening*. In the realm of Talamh, a teenage warrior named Keegan emerges from a lake holding a sword—representing both power and the terrifying responsibility to protect the Fey. In another realm known as Philadelphia, a young woman has just discovered she possesses a treasure of her own. When Breen Kelly was a girl, her father would tell her stories of magical places. Now she's an anxious twentysomething mired in student debt and working a job she hates. But one day she stumbles upon a shocking discovery: her mother has been hiding an investment account in her name. It has been funded by her long-lost father—and it's worth nearly four million dollars. This newfound fortune would be life-changing for anyone. But little does Breen know that when she uses some of the money to journey to Ireland, it will unlock mysteries she couldn't have imagined. Here, she will begin to understand why she kept seeing that silver-haired, elusive man, why she imagined his voice in her head saying *Come home, Breen Siobhan. It's time you came home. Why she dreamed of dragons. And where her true destiny lies—through a portal in Galway that takes her to a land of faeries and mermaids, to a man named Keegan, and to the courage in her own heart that will guide her through a powerful, dangerous destiny*

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as *Auto Repair For Dummies, 2nd Edition (9780764599026)*. While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the *Los Angeles Times* and has been interviewed on the *Today* show, *NBC Nightly News*, and other television programs.

Emily Riddle has lived her entire life inside a patriarchal commune led by her father. There are many rules, but the most important one, 'keep it in the commune', is the most difficult for her to follow especially since the only people willing to champion her cause live on the outside. When Emily learns her father has promised her to Lorenzo, a perverted man who has plans for her that extend well

beyond marriage and kids, she rebels. Regardless of the consequences, she refuses to marry someone who'd rather beat her than caress her. A day of hooky that starts out as a tiny act of defiance - sneaking out of the commune for a swim - turns into a day filled with hope. After spending time with Levi, a man camping near the lake, she finds what true romance looks like and catches a glimpse into a future that's filled with love and admiration rather than hate and submission. That tiny peek is enough to change the course of Emily's existence and makes it nearly impossible for her to go back to the commune and pretend she'll ever be able to tolerate the life chosen for her instead of the life she longs for. One that includes Levi. Fighting to escape the commune, its leaders, and her fiance proves to be more dangerous than Emily expected. The secrets she knows, as the leader's daughter, will either follow her to the grave or send her - and Levi - there.

Dreams and Dream Stories

Cold and ultracold collisions occupy a strategic position at the intersection of several powerful themes of current research in chemical physics, in atomic, molecular and optical physics, and even in condensed matter. The nature of these collisions has important consequences for optical manipulation of inelastic and

reactive processes, precision measurement of molecular and atomic properties, matter-wave coherences and quantum-statistical condensates of dilute, weakly interacting atoms. This crucial position explains the wide interest and explosive growth of the field since its inception in 1987. The author reviews elements of the quantum theory of scattering theory, collisions taking place in the presence of one or more light fields, and collisions in the dark, below the photon recoil limit imposed by the presence of any light field. Finally, it reviews the essential properties of these mesoscopic quantum systems and describes the key importance of the scattering length to condensate stability.
