A Manual of the Short Story Art

Once upon a time...the Blood Sorcerer vanquished the kingdom of Elden. To save their children, the queen scattered them to safety and the king filled them with vengeance. Only a magical timepiece connects the four royal heirs...and time is running out.... Nicolai the vampire was renowned for his virility, but in a twist of fate, "the Dark Seducer" had become a sex slave in the kingdom of Delfina—stripped of his precious timepiece and his memory. All that remained was a primal need for freedom, revenge...and Jane Parker, the only woman who could help him rediscover his destiny.

Lectures on New Testament Theology

In Weak and Widespread, modernity stands as a contrasting operative practice when compared to that of the 20th century, which was based on finding definitive solutions to old and new problems of industrial society. Today's architecture and urban planning tends to operate through reversible solutions, taking their references from models that are incomplete, imperfect and elastic. Precisely for this reason they are capable of withstanding the continuous processes of innovation. In this book Branzi examines how transformations in the concept of

modernity have changed project strategy following new territorial and social developments. He puts this into relation to his own projects and research from the mid-1960's with the radical experience of the Archizoom group until the present.

Kenneth R. Westphal presents an original interpretation of Hume's and Kant's moral philosophies, the differences between which are prominent in current philosophical accounts. Westphal argues that focussing on these differences, however, occludes a decisive, shared achievement: a distinctive constructivist method to identify basic moral principles and to justify their strict objectivity, without invoking moral realism nor moral anti-realism or irrealism. Their constructivism is based on Hume's key insight that 'though the laws of justice are artificial, they are not arbitrary'. Arbitrariness in basic moral principles is avoided by starting with fundamental problems of social coördination which concern outward behaviour and physiological needs; basic principles of justice are artificial because solving those problems does not require appeal to moral realism (nor to moral anti-realism). Instead, moral cognitivism is preserved by identifying sufficient justifying reasons, which can be addressed to all parties, for the minimum sufficient legitimate principles and institutions required to provide and protect basic forms of social coördination (including verbal behaviour). Hume first develops this kind of constructivism for basic property rights and for government. Kant greatly refines Hume's construction of justice within his 'metaphysical principles of justice', whilst preserving the core model of Hume's innovative constructivism. Hume's and Kant's constructivism avoids the conventionalist and relativist tendencies latent if not explicit in contemporary forms of moral constructivism.

Balancing Liberty and Security

Initially dominated by simple renditions of East Coast architecture, Milwaukee developed from three pioneer settlements, those of Solomon Juneau, Byron Kilbourn, and George Walker—three hubs from which three villages radiated outward into one city. Following the Civil War, Milwaukee's growth at the onset of the Industrial Era afforded the city a fanciful array of Victorian streetscapes. The 1890s followed with an era of ethnic architecture in which bold interpretations of German Renaissance Revival and Baroque designs paid homage to Milwaukee's overwhelming German population. At the turn of the century, Milwaukee's proximity to Chicago influenced the streetscape with classicized civic structures and skyscrapers designed by Chicago architects. World War I and the ensuing anti-German sentiment, as well as Prohibition, inevitably had adverse effects on "Brew City." By the 1920s, Milwaukee's architecture had assimilated to the national aesthetic, suburban development was on the rise, and architectural growth would soon be stunted by the Great Depression.

This volume, the first of it's kind, examines the role of women paleontologists and archaeologists in a field traditionally dominated by men. Women researchers in this field, have questioned many of the assumptions and developmental scenarios advanced by male scientists. As a result of such efforts, women have forged a

more central role in models of human development and have radically altered the way in which human evolution is perceived. This history of the feminist critique of science, is of profound significance and will be of interest to all those who work in the fields of anthropology, archaeology, paleontology, and human biology.

This book highlights recent findings in industrial, manufacturing and mechanical engineering, and provides an overview of the state of the art in these fields, mainly in Russia and Eastern Europe. A broad range of topics and issues in modern engineering are discussed, including the dynamics of machines and working processes, friction, wear and lubrication in machines, surface transport and technological machines, manufacturing engineering of industrial facilities, materials engineering, metallurgy, control systems and their industrial applications, industrial mechatronics, automation and robotics. The book gathers selected papers presented at the 4th International Conference on Industrial Engineering (ICIE), held in Moscow, Russia in May 2018. The authors are experts in various fields of engineering, and all papers have been carefully reviewed. Given its scope, the book will be of interest to a wide readership, including mechanical and production engineers, lecturers in engineering disciplines, and engineering graduates.

After disassembling and gutting your car, it is easy to feel that you're in way over your head when it comes to the upholstery. This is why so many do-it-yourself restorers outsource the work, at considerable expense, to an experienced upholstery shop. Taking the time to acquire the skills for upholstery restoration may feel like a daunting task, but what if an experienced upholsterer presented every skill you needed to restore upholstery yourself? Starting with a list of necessary tools, author Fred Mattson guides you through all the required tasks, including seat restoration; door panel removal, patterning, assembly, and installation; headliner removal and installation; carpet cutting; and even convertible top restoration. The easy-to-follow step-by-step presentation allows for a thorough understanding of all the processes. Every photo in this book provides a hands-on approach that shows you how to repair and restore a car's interior to concours, show-quality specifications. Other restoration books may show you beautifully restored interiors, but they don't show you how to produce them. This book helps you develop the skills needed with instruction from a professional upholsterer, saving you thousands of dollars over outsourcing the restoration. If you are interested in saving money, doing a complete restoration yourself, or simply want to know how it's done, this book is a handy addition to your automotive library.

Award-winning nature author Jerry Dennis reveals the splendor and beauty of North America's Great Lakes in this "masterwork"* history and memoir of the essential environmental and economical region shared by the United States and Canada. No bodies of water compare to the Great Lakes. Superior is the largest lake on earth, and together all five contain a fifth of the world's supply of standing fresh water. Their ten thousand miles of shoreline border eight states and a Canadian province and are longer than the entire Atlantic and Pacific coasts of the United States. Their surface area of 95,000 square miles is greater than New York, New Jersey, Connecticut, Massachusetts, Vermont, New Hampshire, and Rhode Island combined. People who have never visited them—who have never seen a squall roar across Superior or the horizon stretch unbroken across Michigan or Huron—have no idea how big they are. They are so vast that they dominate much of the geography, climate, and history of North America, affecting the lives of tens of millions of people. *The Living Great Lakes: Searching for the Heart of the Inland Seas* is the definitive book about the history, nature, and science of these remarkable lakes at the heart of North America. From the geological forces that formed them and the industrial atrocities that nearly destroyed them, to the greatest environmental success stories of our time, Superior, Michigan, Huron, Erie, and Ontario are portrayed in all their complexity. A Michigan native, Jerry Dennis also shares his memories of a lifetime on or near the lakes, including a six-week voyage as a crewmember on a tallmasted schooner. On his travels, he collected more stories of the lakes through the eyes of biologists, fishermen, sailors, and others he befriended while hiking the area's beaches and islands. Through storms and fog, on remote shores and city waterfronts, Dennis explores the five Great Lakes in all seasons and moods and discovers that they and their connecting waters—including the Erie Canal, the Hudson River, and the East Coast from New York to Maine—offer a surprising and bountiful view of America. The result is a meditation on nature and our place in the world, a discussion and cautionary tale about the future of water resources, and a celebration of a place that is both fragile and robust, diverse, rich in history and wildlife, often misunderstood, and worthy of our attention. "This is history at its best and adventure richly described."—*Doug Stanton, author of *In Harm's Way: The Sinking of the U.S.S. Indianapolis and the Extraordinary Story of Its Survivors* and *12 Strong: The Declassified True Story of the Horse Soldiers Sigurd Olson Nature Writing Award Winner Winner of Best Book of 2003 by the Outdoor Writers Association of America*

John Galt's novel *The Provost* details the rise to power of James Pawkie, an aspiring businessman and politician who becomes a big-time mover and shaker in the Scottish town of Irvine. Galt uses Pawkie's ascendance to comment on the perils of acquiring influence rapidly, as well as the all-too-keen temptation to misuse it for personal gain.

The Decline of the Ancient World

One of the enduring ironies of medieval history is the fact that a group of Italian lay penitents, begging in sackcloths, led by a man who called himself simple and ignorant, turned in a short time into a very popular and respectable order, featuring cardinals and university professors among its ranks. Within a century of its foundation, the Order of Friars Minor could claim hundreds of permanent houses, schools, and libraries across Europe; indeed, alongside the Dominicans, they attracted the best minds and produced many outstanding scholars who were at the forefront of Western philosophical and religious thought. In *The Poor and the Perfect*, Neslihan Şenocak provides a grand narrative of this fascinating story in which the quintessential Franciscan virtue of simplicity gradually lost its place to learning, while studying came to be considered an integral part of evangelical perfection. Not surprisingly, turmoil accompanied this rise of learning in Francis's order. Şenocak shows how a constant emphasis on humility was unable to prevent the creation within the Order of a culture that increasingly saw education as a means to acquire prestige and domination. The damage to the diversity and equality among the early Franciscan community proved to be irreparable. But the consequences of this transformation went far beyond the Order: it contributed to a paradigm shift in the relationship between the clergy and the schools and eventually led to the association of learning with sanctity in the medieval world. As Şenocak demonstrates, this episode of Franciscan history is a microhistory of the rise of learning in the West.

Weak and Diffuse Modernity

Ferdinand Christian Baur (1792-1860), one of the great innovators in the study of the New Testament, argued that each of its books reflects the interests and tendencies of its author in a particular religio-historical milieu. A critique of the writings must precede any judgments about the historical validity of individual stories about Jesus in the Gospels. Thus Baur could move beyond the impasse created by Strauss's Life of Jesus. Baur demonstrated that the Gospel of John is not a historical document comparable to the Synoptic Gospels and cannot be used to reconstruct the teaching of Jesus, and that the Synoptic Gospels must be read critically and selectively. He applied the same principles to the Epistles, arguing that only four are genuinely Pauline (Galatians, 1 and 2 Corinthians, and Romans). Baur's Lectures on New Testament Theology, delivered in Tübingen during the 1850s, summarize thirty years of his research. The lectures begin with an Introduction on the concept, history, and organization of New Testament theology. Part One is devoted to the teaching of Jesus, which Baur finds most reliably in Matthew. Part Two contains the teaching of the Apostles in three chronological periods. The first period presents the theological frameworks of the Apostle Paul and the Book of Revelation; the second period, the frameworks of Hebrews, the Deutero-Pauline Epistles, James and Peter, the Synoptic Gospels and Acts; and the third period, those of the Pastoral Epistles and the Gospel of John.
