The Monocle Guide to Good Business follows up on the success of The Monocle Guide to Better Living. The book offers multifaceted perspectives on the world of work today and in the future--from compelling business ideas to inspiring company cultures. Ever since the launch of Monocle in 2007 this highly successful global magazine and media brand has championed a clear and new take on the world of work. It has encouraged its readers to start their own businesses, do the thing that makes them feel fulfilled (even if it means ditching a comfortable corporate salary), and find places to build their HQ that deliver a good quality of life too. The magazine's belief in making things (and making them well), using your hands, doing an apprenticeship, and keeping things small and tight has linked perfectly with a community of entrepreneurs who are determined to find their own way in the world --and know that this will allow them to run their lives in new and fresh ways. These developments are also expressed in the maker movement, new shared spaces, and unusual business schools. So it was a natural step for the magazine's team to create The Monocle Guide to Good Business. This guide is not your traditional business book, but it does give advice on how to go from clever fledgling idea to success story and introduces people with inspiring stories. The Monocle Guide to Good Business is also a picture-rich journey for anyone who runs a company, wants to run a company, or wishes their boss had some new ideas. It will even tell you why you need an office dog. From the best business neighborhoods to the sturdiest desks, this book will have you planning a new career --or at least fixing your office. It's a book that should be thumbed and used.

This book is the fourth edition of a highly practical guide to the leading cases in European Competition Law. It explores the application of Article 101 TFEU, Article 102 TFEU and the European Merger Regulation, as well as the public and private enforcement of Competition Law. In addition, it reviews the intersection between

Competition Law and Intellectual Property Rights and the application of Competition Law to State action. Each chapter outlines the relevant laws, regulations and guidelines for each topic. Within this framework, cases are reviewed in summary form, accompanied by analysis and commentary. "This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decision but also some of the leading cases from the US and European Member States." Ali Nikpay, Gibson, Dunn & Crutcher "The study of EU Competition law requires the analysis and understanding of a number of increasingly complex and lengthy European Commission and European Court decisions. Through the provision of case summaries, excerpts from the important passages and concise commentary linking these decisions to other key case law and Commission documents, this unique and impressive book provides the student and practitioner of EU competition law with an extremely clear and useful introduction to these leading decisions." Dr Kathryn McMahan, Associate Professor, School of Law, University of Warwick "The Guide is an invaluable tool for both students and practitioners. It provides a compact overview on the fundamental cases and highlights the essential problems in a clear and sharp analysis." Dr Christoph Voelk, Antitrust Practice Group, McDermott, Will & Emery LLP, Brussels "This edition will be especially valuable to competition law specialists abroad who are interested in the jurisprudence and policy of the European Union

and its member states. Familiarity with the European regime is essential for proficiency in competition law today, and this volume provides an excellent foundation." William E Kovacic, Global Competition Professor of Law and Policy, George Washington University Law School, Former Chairman, US Federal Trade Commission "A perfect reference for students of competition law, giving them a kick start when searching for EU case law on a specific subject." Magnus Strand, University of Uppsala, Sweden

In recent decades, the importance of sound for remembering the past and for

creating a sense of belonging has been increasingly acknowledged. We keep "sound souvenirs" such as cassette tapes and long play albums in our attics because we want to be able to recreate the music and everyday sounds we once cherished. Artists and ordinary listeners deploy the newest digital audio technologies to recycle past sounds into present tunes. Sound and memory are inextricably intertwined, not just through the commercially exploited nostalgia on oldies radio stations, but through the exchange of valued songs by means of pristine recordings and cultural practices such as collecting, archiving and listing. This book explores several types of cultural practices involving the remembrance and restoration of past sounds. At the same time, it theorizes the cultural meaning of collecting, recycling, reciting, and remembering sound and music.

Generations of coin collectors have grown up with the Lincoln cent. In the second edition of *A Guide Book of Lincoln Cents*, Q. David Bowers provides a detailed study of this great American classic. "Lincoln cents are among the most fascinating coins in the entire American series," writes Bowers. "Believe it or not, they also offer some of the greatest challenges." In this single volume you'll absorb the history of the coin's two classic reverse designs, take an inside look at the minting process, and learn how to grade your collection, including Proofs. Bowers shares tips on becoming a smarter buyer. The U.S. Mint's 2009 redesign is also covered.

Despite the continuing inter-government cooperation over the regulation of

international commerce, significant cross-country differences persist in areas such as merger control, notification to authorities, and remedies deemed appropriate for antitrust enforcement. Accordingly, companies must be aware of the rules that apply in the countries in which they do business. This fourth edition of the Kintner-Joelson classic *International Antitrust Primer* provides a thorough update of the status of competition regulation in a number of key jurisdictions, including up-to-date case law involving the technology giants Google, Microsoft, Amazon, Apple, and Facebook. Coverage focuses on the European Union and the United States — which continue to be foremost in the enforcement and refinement of comprehensive competition laws — but also takes into account the vast strides that are being made elsewhere, with chapters on South Korea, Japan, and India, as well as a chapter on the United Kingdom with a section on the post-Brexit implications. The book provides essential guidance on such issues of concern to business persons and their counsel as the following:

- intellectual property rights;
- extent and kind of criminal sanctions;
- extraterritorial reach;
- mergers and acquisitions;
- level and type of enforcement activity;
- effects of national foreign or domestic policy;
- permissible cooperation among competitors; and
- public procurement.

Business persons, government officials, students, lawyers, and others who have been relying on this preeminent resource for years will greatly appreciate this thoroughly updated edition. There is nothing else that so lucidly and helpfully explains competition law for those who require a working knowledge of the subject to proceed confidently in their day-to-day work.

This book explores the internationalization of Turkish multinationals by examining a set of firms from various industries and providing eleven detailed case studies. The authors aim to discover the reasons behind the drive for internationalization within the firms, and how their internationalization processes work. By focusing on a medium-sized emerging country, which is strategically located at the intersection of European, Asian and African markets, Turkish Multinationals provide a

significant contribution to research on multinational firms in emerging countries. Topics discussed include: strategic motives for and drivers of internationalization at multiple levels (firm, industry and institutional); the location, ownership and entry modes of multinational firms; and their market entry and post-acquisition strategies, which are critical to the evolution of the internationalization process. This innovative book will offer an alternative perspective to current debate on emerging markets, and will be of great interest to both academics of global strategy and international business, and policy-makers.
