The Ghost of Cutler Creek

Among all information systems that are nowadays available, web sites are definitely the ones having the widest potential audience and the most significant impact on the everyday life of people. Web sites contribute largely to the information society: they provide visitors with a large array of services and information and allow them to perform various tasks without prior assumptions about their computer literacy. Web sites are assumed to be accessible and usable to the widest possible audience. Consequently, usability has been recognized as a critical success factor for web sites of every kind. Beyond this universal recognition, usability still remains a notion that is hard to grasp. Summative evaluation methods have been introduced to identify potential usability problems to assess the quality of web sites. However, summative evaluation remains limited in impact as it does not necessarily deliver constructive comments to web site designers and developers on how to solve the usability problems. Formative evaluation methods have been introduced to address this issue. Evaluation remains a process that is hard to drive and perform, while its potential impact is probably maximal for the benefit of the final user. This complexity is exacerbated when web sites are very large, potentially up to several hundreds of thousands of pages, thus leading to a situation where evaluating the web site is almost impossible to conduct manually. Therefore, many attempts have been made to support evaluation with:

- Models that capture some characteristics of the web site of interest.

Lady Bianca Marlowe has a reputation for being beautiful, bold, and bad. She shocks the delicate matrons of London society at balls and tea parties with her outspoken opinions and turns the head of every red-blooded male in London with her daring fashion choices and flirtatious ways. When she is admitted into the prestigious May Flowers ladies' political society, it seems as though no one will be safe from her audacity. There is only one man who can tame her wild ways. Jack Craig's climb up from his birth in a brothel in Seven Dials to become a Chief Inspector at Scotland Yard was a long and arduous one, but after a series of high-profile arrests, his reputation as one of London's most powerful law enforcement officers is firmly established. His advancement within the Metropolitan Police, and even a knighthood, seem inevitable. Jack has just one weakness—his passion for Lady Bianca. Their attachment is as unsuitable as it is fiery, and neither are willing to listen to reason and stay away from each other. Especially once Bianca helps Jack uncover a plot to attack the Houses of Parliament that would make Guy Fawkes look like an amateur. But when the inevitable results of their affair turn them both into social outcasts and pit them against each other, they must either discover the true love that has burned beneath their passion or risk an explosion that could put more than their own lives at risk. PLEASE BE ADVISED: Steam level - very spicy! THE MAY FLOWERS series is a continuation of THE SILVER FOXES OF WESTMINSTER series, involving the younger generation. It consists of: A LADY'S FIRST SCANDAL IT'S ONLY A SCANDAL IF YOU'RE CAUGHT THE SCANDAL OF A PERFECT KISS THE EARL'S SCANDALOUS BARGAIN

For Paul Ferrini, there was a time when the very thought of Jesus left him cold. Instead of embodying the truth of Jesus' teaching, Christianity seemed to harbor the fearful thoughts and actions of people who were more committed to self-interest than to unconditional love. So when Ferrini felt Jesus' voice inside him saying, "I want you to acknowledge me," he resisted. In time, however, he came to realize that it was not Jesus he was rejecting but the untruths that had become attached to Christian teaching. Responding to the inner voice did not mean merely acknowledging Jesus as some great teacher who lived in the past, but also meant that he was opening himself up to a living presence within his own awareness. Once Ferrini reached this reconciliation, powerful words of spiritual truth began to flow through him. Reflections of the Christ Mind presents the most important teachings the author has received through his spiritual awakening. Here at last is a gospel devoted solely to Jesus' teachings of love, healing, and forgiveness. The teacher readers meet in these pages is both compassionate and open-minded—he is the Jesus Christians know in their hearts. Repudiating religious hypocrisy,

intolerance, and spiritual pride, Ferrini rejects the dogmatic position of the Church, offering instead words of hope and healing that form the new gospel for today.

A Pushcart at the Curb

The shape of drops and bubbles is the centre of interest for many interfacial scientists. This book describes the most recent accomplishments to make use of drops and bubbles in fundamental research and application. After a general introduction into the mechanics of liquid menisci, chapters are dedicated to methods based on drops or bubbles. The chapters about the three main drop experiments provide the theoretical basis, a description of experimental set-ups, specific advantages and disadvantages, correction and calibration problems, experimental examples and their interpretation: pendent and sessile drop, drop volume, and spinning drop technique. The chapter about capillary pressure methods summarises different techniques and gives examples of applications, for instance measurements under microgravity. The maximum bubble pressure technique as a particular capillary pressure method is described, with emphasis on the most recent developments which made this technique applicable to extremely short adsorption times, down to the range of milliseconds and less. Problems connected with aerodynamics and hydrodynamics are discussed and used to show the limits of this widely used standard method. The oscillating bubble technique provides information not available by other techniques, for example about the dilational rheology of adsorption layers and relaxation processes at the interface. The description of rising bubbles in surfactant solutions will contain the hydrodynamic basis as well as the theoretical description of the effect of interfacial layers on the movement of bubbles. Besides the theoretical basis experimental data, such as water purification, flotation processes etc. and the relevance for practical applications will be presented. The chapter about lung alveols demonstrates how important bubbles built by biological membranes are in everyday life. The relevance for medicine and biology as well as model studies is discussed. An important example for the application of drops is metallurgy, where the surface tension of metals and alloys is an important parameter for many applications. The chapters on drop shape analysis by using fibre technique and on force measurements between emulsion droplets are of much practical relevance. Lists of references and symbols are given separately at the end of each chapter while a common subject index is given at the end of the book.

For thirty years the director of the Wiener Library in London--the leading institute for the study of anti-Semitism--Walter Laqueur here offers both a comprehensive history of anti-Semitism as well as an illuminating look at the newest wave of this phenomenon. Laqueur begins with an invaluable historical account of this pernicious problem, tracing the evolution from a predominantly religious anti-Semitism--stretching back to the middle ages--to a racial anti-Semitism that developed in the late 19th and early 20th centuries. The author then uses this historical account as backdrop to a brilliant analysis of the newest species of anti-Semitism, explaining its origins and rationale, how it manifests itself, in what ways and why it is different from anti-Semitism in past ages, and what forms it may take in the future. The book reveals that what was historically a preoccupation of Christian and right-wing movements has become in our time even more frequent among Muslims and left-wing groups. Moreover, Laqueur argues that we can't simply equate this new anti-Semitism with anti-Zionism and write it off as merely anti-Israel sentiments. If Israel alone is singled out for heated condemnation, is the root of this reaction simply anti-Zionism or is it anti-Semitism? Here is both a summing up of the entire trajectory of anti-Semitism--the first comprehensive history of its kind--and an exploration of the new wave of anti-Semitism. "Walter Laqueur provides us with powerful new insights into an age-old problem. Distinguished scholarship and an authoritative moral voice are the hallmarks of this important book. Anyone wanting to understand the history and persistence of anti-Jewish hatred should read it." --Abraham H. Foxman, National Director, Anti-Defamation League

Villa Victoria

For decades now, scholars and politicians alike have argued that the concentration of poverty in city housing projects would produce distrust, alienation, apathy, and social isolation—the disappearance of what sociologists call social capital. But relatively few have examined precisely how such poverty affects social capital or have considered for what reasons living in a poor neighborhood results in such undesirable effects. This book examines a neglected Puerto Rican enclave in Boston to consider the pros and cons of social scientific thinking about the true nature of ghettos in America. Mario Luis Small dismantles the theory that poor urban neighborhoods are inevitably deprived of social capital. He shows that the conditions specified in this theory are vaguely defined and variable among poor communities. According to Small, structural conditions such as unemployment or a failed system of familial relations must be acknowledged as affecting the urban poor, but individual motivations and the importance of timing must be considered as well. Brimming with fresh theoretical insights, Villa Victoria is an elegant work of sociology that will be essential to students of urban poverty.

Rider: Both on and off the ice, I'm known as the Wingman. When it comes to my teammates, I'm the ice breaker, happy to help them look good with the ladies, and once I set the play in motion, my job is to disappear. I have zero problems fading into the background. Hell, being invisible saved my ass more than once in foster care. Now, a hot little nurse has asked me to be her wingman, but the uncertainty in her big, brown eyes slay me. I know that feeling—the fear of rejection—all too well, and for once, watching from the sideline is a no go. Jules: When it comes to relationships, I need all the help I can get. When Rider agrees to be my buffer, I happily put myself in his capable hands. It isn't his fault my date goes south, but the tough as nails hockey player takes it personal. Under his wing, I find the freedom to let go, and the joy of having it accepted. But can two people, one afraid he's unlovable and the other afraid to love, trust in themselves enough to realize this could be their shot at happily ever after?

Drops and Bubbles in Interfacial Research

The modeling of item response data is governed by item response theory, also referred to as modern test theory. The field of inquiry of item response theory has become very large and shows the enormous progress that has been made. The mainstream literature is focused on frequentist statistical methods for estimating model parameters and evaluating model fit. However, the Bayesian methodology has shown great potential, particularly for making further improvements in the statistical modeling process. The Bayesian approach has two important features that make it attractive for modeling item response data. First, it enables the possibility of incorporating nondata information beyond the observed responses into the analysis. The Bayesian methodology is also very clear about how additional information can be used. Second, the Bayesian

approach comes with powerful simulation-based estimation methods. These methods make it possible to handle all kinds of priors and data-generating models. One of my motives for writing this book is to give an introduction to the Bayesian methodology for modeling and analyzing item response data. A Bayesian counterpart is presented to the many popular item response theory books (e.g., Baker and Kim 2004; De Boeck and Wilson, 2004; Hambleton and Swaminathan, 1985; van der Linden and Hambleton, 1997) that are mainly or completely focused on frequentist methods. The usefulness of the Bayesian methodology is illustrated by discussing and applying a range of Bayesian item response models.

The text is designed for undergraduate Mechanical Engineering courses in Kinematics and Dynamics of Machinery. It is a tool for professors who wish to develop the ability of students to formulate and solve problems involving linkages, cams, gears, robotic manipulators and other mechanisms. There is an emphasis on understanding and utilizing the implications of computed results. Students are expected to explore questions like "What do the results mean?" and "How can you improve the design?"

Regional Action Plan for the Tobacco Free Initiative in the Western Pacific (2015 2019)

Networking Infrastructure for Pervasive Computing: Enabling Technologies & Systems is a comprehensive guide to tomorrow's world of ubiquitous computing where users can access and manipulate information from everywhere at all times. The emphasis is on networking, systems and standards rather than detailed physical implementation. Addressed are many technical obstacles, such as, connectivity, levels of service, performance, and reliability and fairness. The authors also describe the existing enabling off-the-shelf technologies and its underlying infrastructure known as pervasive

networking (PervNet). PervNet ties different sets of smart nodes together enabling them to communicate with each other to provide pervasive computing services to users. Throughout the book, important issues related to scalability, transparency, security, energy management, QoS provisioning, fault tolerance, and disconnected operations are discussed. This work provides a research and development perspective to the field of PervNet and will serve as an essential reference for network designers, operators and developers.

Reflections of the Christ Mind

Refreshing and revealing in equal measure, this innovative volume conducts a critical/self-critical exploration of the impact of culture on the ill-fated Oslo peace process. The authors negotiators and scholars alike demolish stereotypes as they construct an unusually subtle and sophisticated understanding of how culture influences negotiating styles. Culture, they argue, did not cause the Oslo breakdown but it did play an influential, intervening role at several levels: coloring the thinking of political leaders, shaping domestic politics on both sides, and affecting each side's evaluation of the other's beliefs and intentions. After an overview by William Quandt of the history of the Oslo process and the impact of international factors such as U.S. mediation, the volume presents a detailed analysis of first Palestinian, and then Israeli negotiating styles between 1993 and 2001. Omar Dajani, a former legal advisor to the Palestinian team, explains how elements of Palestinian identity and national development have hobbled the Palestinians ability to negotiate effectively. Aharon Klieman, a distinguished Israeli analyst, traces a long-standing clash between diplomatic and security subcultures within the Israeli political elite and reveals how Israeli identity has helped create a negotiating style that opts for short-term gains while undermining the prospects for a lasting agreement. Drawing on these insights, Tamara Wittes concludes the volume by offering not only a fresh appreciation of culture's influence on interethnic negotiations but also lessons for future negotiators in the Israeli-Palestinian conflict. Read the review from Foreign Affairs."

Bodybuilding, Drugs and Risk

In this third novel in her acclaimed Tears of Artamon saga, Sarah Ash once again transports readers to a realm where sorcery collides with political intrigue . . . and where one man haunted by a dark legacy is locked in a fierce struggle between the forces of good and evil battling for supremacy within him. . . . Gavril Nagarian is believed dead—perished in the heat of battle. But the Lord Drakhaon of Azhkendir lives on. Now he is entrusted with a sacred mission: to rescue the aged Magus, who has been kidnapped and in whose possession are the five priceless rubies that compose the fabled Tears of Artamon. Ancient law decrees that whoever possesses the coveted stones has the power to impose his rule over the five princedoms in the Empire of New Rossiya. But the task exacts a cost. The Drakhaoul that destroyed his forebears has penetrated Gavril's psyche and is gaining power over his soul. With the dark forces inside him seeking immortality, Gavril

must feed on the blood of innocents—or die. Toppled by the loss of the Tears of Artamon, Emperor Eugene of Tielen is tormented by his own daemon. Now he must defend his lands against King Enguerrand of Francia, who claims ownership of the Tears. But both men share a common goal: to destroy Gavril Nagarian and the Drakhaoul that lives within him once and for all. Ingenious and unforgettable, *Children of the Serpent Gate* delivers a thrilling conclusion to the epic trials of a man of honor in a world run amok—a calamity that can be laid to rest only by an Emperor's Tears.

Is Life Like This?

Current popular interest in bodies, fitness, sport and active lifestyles, has made bodybuilding more visible and acceptable within mainstream society than ever before. However, the association between bodybuilding, drugs and risk has contributed to a negative image of an activity which many people find puzzling. Using data obtained from participant observation and interviews, this book explores bodybuilding subculture from the perspective of the bodybuilder. It looks at:

- * How bodybuilders try to maintain competent social identities
- * How they manage the risks of using steroids and other physique-enhancing drugs
- * How they understand the alleged steroid-violence link
- * How they 'see' the muscular body.

Through systematic exploration it becomes apparent that previous attempts to explain bodybuilding in terms of 'masculinity-in-crisis' or gender insecurity are open to question. Different and valuable insights into what sustains and legitimizes potentially dangerous drug-taking activities are provided by this detailed picture of a huge underground subculture.

New Materials for Next-Generation Commercial Transports

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.

In this in depth look at hymns, Brian Wren explores the theological significance of congregational song, asks how music has meaning for its singers, and considers the importance of contemporary worship music. He argues that a hymn is a complex art form, deserving of recognition and study for its contributions to worship, education, and pastoral care.

To find out, read on' - Fiona Williams, University of Leeds, UK 'Universalism in social policy is politically challenged and normatively contested. This book examines how the principle of universalism can be understood and how it has been put into practice in various national contexts. Universalism is contrasted with the idea of diversity which has gained strength as a result of growing affluent middle classes and of multiculturalism in highly developed welfare states. The book deals with varieties of universalism and inspires a re-thinking of the normative basis of the welfare state.' - Stein Kuhnle, University of Bergen, Norway and Hertie School of Governance, Berlin, Germany Welfare State, Universalism and Diversity is a thought-provoking book dealing with key ideas, values and principles of social policies and asking what exactly is meant by universal benefits and policies? Is the time of post-war universalism over? Are universalism and diversity contradictory policy and theory framings? Well-known scholars from different countries and fields of expertise provide a historically informative and comprehensive view on the making of universal social policies. Universalism is defined and implemented differently in the British and Scandinavian social policies. Service universalism is different from universalism in pensions. The book underlines the multiple and transformative nature of universalism and the challenge of diversity. There certainly is need for a greater diversity in meeting citizen's needs. Yet, universalism remains a principle essential for planning and implementing sustainable and legitimate policies in times characterized by complex interdependences and contradictory political aims. This impressive book is an attempt to untangle the multiple meanings of universalism and clarify the concept's relevance to contemporary policy debates. It will prove invaluable for students, researchers and practitioners in social policy, public policy, social administration, social welfare, social history, social work, sociology and political sciences. Policymakers and administrators involved with social and public policies, social services, social welfare, and social work will also find this book groundbreaking.

The Western Pacific Region is home to 26% of the world's population but 36% of the world's tobacco users. Two people die per minute in the Region from tobacco-related diseases. Globally, tobacco stands to kill 1 billion lives in the 21st century-

unless we act to curb the epidemic. To guide Member States in accelerating implementation of the WHO FCTC with support from WHO, the Regional Committee for the Western Pacific endorsed the Regional Action Plan for the Tobacco Free Initiative in the Western Pacific (2015-2019) at its sixty-fifth session in October 2014. Building on our experiences, the new regional action plan is structured around three pillars: strengthening sustainable institutional capacity; developing comprehensive legislation and regulation; and facilitating consistent enforcement through a whole-of-society approach. For each of these strategic outcomes, the regional action plan identifies clear objectives and critical steps to be taken by countries and WHO.
