These lively stories follow Rey Castaneda from sixth through eighth grade in Nuevo Penitas, Texas. One side of Rey's family lives nearby in Mexico, the other half in Texas, and Rey fits in on both sides of the border. In Nuevo Penitas, he enjoys fooling around with his pals in the barrio; at school, he's one of the "A list" kids. As Rey begins to cross the border from childhood into manhood, he turns from jokes and games to sense the meaning of work, love, poverty, and grief, and what it means to be a proud Chicano—moments that sometimes propel him to show feelings un hombre should never express. It's a new territory where Rey longs to follow the example his hardworking, loving father has set for him.

Sibert Medalist, National Book Award Honoree, and New York Times best-selling author Sy Montgomery turns her formidable talents to the story of California condors and the scientists who have fought against their extinction in this installment in the award-winning Scientists in the Field series. In April of 1987 the last wild California condor was captured and taken to live in captivity like the other twenty-six remaining birds of its kind. Many thought that the days were over of of this remarkable, distinguished bird that had roamed the skies of North and Central American for thousands of years. Sy Montgomery employs her skill for on-the-ground reporting, shrewd observation, and stunning narrative prose to detail the efforts of scientists, volunteers, and everyday citizens to get California condors back in the wild. In particular, Montgomery profiles employees at the Santa Barbara Zoo who have worked tirelessly to raise abandoned chicks, nurse sick birds back to health, and conduct research that can support legislation to ban what is probably the largest threat to the existence of the wild condor: lead bullets. In turns affectionate and frustrated, hopeful and heartbreaking, Montgomery's powerful prose does justice to these ancient, sociable, and elegant creatures. Complete with world-class, full-color photography and helpful sidebars that provide details such as the history of the bird's fight back from extinction, the dangers of lead poisoning, and the relationship of condors to the Chumash nation, Condor Comeback is an inspiring story of groundbreaking science, perseverance, and cooperation.

book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. --Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe
