Zadie Smith's brilliant tragi-comic NW follows four Londoners - Leah, Natalie, Felix and Nathan - after they've left their childhood council estate, grown up and moved on to different lives. From private houses to public parks, at work and at play, their city is brutal, beautiful and complicated. Yet after a chance encounter they each find that the choices they've made, the people they once were and are now, can

suddenly, rapidly unravel. A portrait of modern urban life, NW is funny, sad and urgent - as brimming with vitality as the city itself. A Granta Best Young British Novelist 2013 'Intensely funny, richly varied, always unexpected. A joyous, optimistic, angry masterpiece. No better English novel will be published this year.' Philip Hensher, Daily Telegraph 'Astonishing, dazzling. Really - without exaggeration - not since Dickens has there been a better observer of London scenes. Zadie Smith is a genius. It's hard to imagine a better novel this year - or this decade.' A. N. Wilson 'Absolutely brilliant. So electrically authentic.' Time 'Captivating. Funny, sexy, weird, full of acute social comedy. She's up there with the best around.' Evening Standard 'Marvellous . . . crackles with reflections on race, music and migration. A lyrical fiction for our times.' The Celtic World is a detailed and comprehensive study of the Celts from the first evidence of them in the archaeological and historical record to the early post-Roman period. The strength of this volume lies in its breadth - it looks at archaeology, language, literature, towns, warfare, rural life, art, religion and myth, trade and industry, political organisations, society and technology. The Celtic World draws together material from all over pagan Celtic Europe and includes contributions from British, European and American scholars. Much of the material is new research which is previously unpublished. The book addresses some important issues - Who were the ancient Celts? Can we speak of them as the first Europeans? In what form does the Celtic identity exist today and how does this relate to the ancient Celts? For anyone interested in the Celts, and for students and academics alike, The Celtic World will be a valuable resource and a fascinating read.

The coming winter was going to be a hard one and not because of the weather. As England descends into economic chaos, sixteen-year-old Barry Mortimer's life turns upside-down when, without warning, his father moves the family from their cozy home in the city to a grim brick mansion on the outskirts of town. Strange and mysterious events follow. Why does Father evict their friend and long-time lodger? Why isn't anyone allowed to visit the Mortimers' new home? What is Father doing in the basement and why is he keeping it a secret? As rumors of skyrocketing prices and food shortages become reality, Barry's world begins to crumble. Can his family hold together as a nation collapses around them? Terrifying because it could happen tomorrow]]

Channel 4 had been a matter of controversy for years even before it came on the air in November 1982. There were lengthy debates about what its role would be and the part to be played by the ITV companies and the growing number of independent television producers. There was also political controversy over the profile of the new channel, some wishing to see it as "their" channel in response to the apparent political hegemony of Margaret Thatcher. The result was sharp conflicts, not only over programming but, as the channel became established, over its relationships with the ITV companies and its regulatory body, the IBA. These controversies in the making of Channel 4 are revisited in this volume. The

opening article by Edmund Dell, the channel's first chairman, describes and explains his sometimes stormy relationship with Jeremy Isaacs, the chief executive, while the witness seminar and the other articles offer the views of Channel 4 commissioning editors and representatives from the IBA, the ITV companies, the independent producers, the Home Office and the BBC.

A superb standalone novel from the awesome imagination of Iain M. Banks, a master of modern science fiction. It is 4034 AD. Humanity has made it to the stars. Fassin Taak, a Slow Seer at the Court of the Nasqueron Dwellers, will be fortunate if he makes it to the end of the year. The Nasqueron Dwellers inhabit a gas giant on the outskirts of the galaxy, in a system awaiting its wormhole connection to the rest of civilisation. In the meantime, they are dismissed as decadents living in a state of highly developed barbarism, hoarding data without order, hunting their own young and fighting pointless formal wars. Seconded to a military-religious order he's barely heard of - part of the baroque hierarchy of the Mercatoria, the latest galactic hegemony - Fassin Taak has to travel again amongst the Dwellers. He is in search of a secret hidden for half a billion years. But with each day that passes a war draws closer - a war that threatens to overwhelm everything and everyone he's ever known. As complex, turbulent and spectacular as the gas giant on which it is set, this novel from Iain M. Banks is space opera on a truly

In light of the tremendous changes that have come to the island of Borneo in recent decades, this volume takes a detailed historical look at the Borneo environment from native, colonial and national perspectives. It examines change and continuity in the economic, political and social dimensions of human-environment interactions. Reflecting the increasingly multidisciplinary nature of environmental history, the book brings together an international group of historians, anthropologists, geographers and social foresters, all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak, and the Indonesian province of Kalimantan and Brunei. Drawing on extensive archival research and fieldwork, these ten original contributions encompass eleven centuries of history on Borneo, examining interrelated topics that include long-distance trade, conservation, land tenure, resource access, property rights, perceptions of the environment, migration, and development policy and practice. The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on "Environmental change in native and colonial histories of Borneo: Lessons from the past, prospects for the future" held in Leiden under the auspices of the International Institute for Asian Studies.

thousand grammar and style questions to the Q&A page at The Chicago Manual of Style Online. Some are arcane, some simply hilarious—and one editor, Carol Fisher Saller, reads every single one of them. All too often she notes a classic author-editor standoff, wherein both parties refuse to compromise on the "rights" and "wrongs" of prose styling: "This author is giving me a fit." "I wish that I could just DEMAND the use of the serial comma at all times." "My author wants his preface to come at the end of the book. This just seems ridiculous to me. I mean, it's not a post-face." In *The Subversive Copy Editor*, Saller casts aside this adversarial view and suggests new strategies for keeping the peace. Emphasizing habits of carefulness, transparency, and flexibility, she shows copy editors how to build an environment of trust and cooperation. One chapter takes on the difficult author; another speaks to writers themselves. Throughout, the focus is on serving the reader, even if it means breaking "rules" along the way. Saller's own foibles and misadventures provide ample material: "I mess up all the time," she confesses. "It's how I know things." Writers, Saller acknowledges, are only half the challenge, as copy editors can also make trouble for themselves. (Does any other book have an index entry that says "terrorists. See copy editors"?) The book includes helpful sections on e-mail etiquette, work-flow management, prioritizing, and organizing computer files. One chapter even addresses the special concerns of freelance editors. Saller's emphasis on negotiation and flexibility will surprise many copy editors who have absorbed, along with the dos and don'ts of their stylebooks, an attitude that their way is the right way. In encouraging copy editors

to banish their ignorance and disorganization, insecurities and compulsions, the Chicago Q&A presents itself as a kind of alter ego to the comparatively staid Manual of Style. In The Subversive Copy Editor, Saller continues her mission with audacity and good humor.

Following the huge success of Britain's Lost Cricket Grounds, Chris Arnot goes in search of the boundary

ropes from around the country - from Essex at Southend to Wellingborough School - to relive the time when the greats of the international game including Glenn McGrath and Ian Botham lit up summer's afternoons at the summer cricket festivals. The cricket festival - when one of the county cricket clubs takes a week or so of games out of its home ground to a club ground somewhere else in the county, often at the seaside, and attracts a large and festive crowd to a bucolic arena fringed with white marquees, beer tents and deckchairs - is a declining phenomenon. Nowadays many counties don't venture beyond their Test match-standard stadia all season, and other, once peripatetic counties like Essex, who used to play at Southend, Colchester, Chelmsford, Clacton, Westcliff and Leyton during a single season, now only leave the County Ground once a season at most. Visiting 30 lost festival grounds from Bournemouth to Abergavenny, Weston-super-Mare to Harrogate, and talking to former players, ground staff, club secretaries and spectators to re-live the days when the world's finest players, from Denis Compton to Barry Richards, came to town for one week only, packed the beer tent and thrilled the crowds. Published in time for the start of the cricket festival season with Kent at Tunbridge Wells and Sussex at Horsham, this book is armchair cricket at its best, and another perfect gift for every cricket fan.

From Schrodinger's cat to Heisenberg's uncertainty principle, this book untangles the weirdness of the quantum world. Quantum mechanics underpins modern science and provides us with a blueprint for reality itself. And yet it has been said that if you're not shocked by it, you don't understand it. But is quantum physics really so unknowable? Is reality really so strange? And just how can cats be half-alive and half-dead at the same time? Our journey into the quantum begins with nature's own conjuring trick, in which we discover that atoms -- contrary to the rules of everyday experience -- can exist in two locations at once. To understand this we travel back to the dawn of the twentieth century and witness the birth of quantum theory, which over the next one hundred years was to overthrow so many of our deeply held notions about the nature of our universe. Scientists and philosophers have been left grappling with its implications every since.

10 Buildings that Changed America tells the stories of ten influential works of architecture, the people who imagined them, and the way these landmarks ushered in innovative cultural shifts throughout our society. The book takes readers on a journey across the country and inside these groundbreaking works of art and engineering. The buildings featured are remarkable not only for aesthetic and structural reasons, but also because their creators instilled in them a sense of purpose and personality that became reflected in an overarching sense the American identity. Edited by the staff of WTTW, the Chicago PBS affiliate that is the most-watched public television station in the country, 10 Buildings will be released alongside the national broadcast of an hour-long special by the same name. This television event will be promoted over digital media, on-ground events, and educational initiatives in schools, and the book will be a significant component to all of these elements. 10 Buildings retells the shocking, funny, and even sad stories of how these buildings came to be. It offers a peek inside the imaginations of ten daring architects who set out to change the way we

## Where To Download Humax Freesat Hd Manual

live, work, and play. From American architectural stalwarts like Louis Sullivan and Frank Lloyd Wright, to modern revolutionaries like Frank Gehry and Robert Venturi, this book examines the most prominent buildings designed by the most noteworthy architects of our time. Also profiled are Americans less noted for their architectural acumen, but no less significant for their contributions to the field. Thomas Jefferson, a self-taught architect, is profiled for designing the iconic Virginia State Capitol. Taking its inspiration from ancient Rome, America's first major public building forged a philosophical link between America and the world's earliest democracies. Similarly, Henry Ford employed Albert Kahn to design a state-of-the-art, innovative factory for Ford's groundbreaking assembly line. Reinforced concrete supported massive, open rooms without any interior dividing walls, which yields the uninterrupted space that was essential for Ford's sprawling continuous production setups. What's more, Kahn considered the needs of workers by including astonishingly modern large windows and louvers for fresh air. The design of each of these ten buildings was completely monumental and prodigious in its time because of the architect's stylistic or functional innovations. Each was also highly influential, inspiring a generation or more of architects, who in turn made a lasting impact on the American landscape. We see the legacy of architects like Mies van der Rohe or H.H. Richardson all around us: in the homes where we live, the offices where we work, our public buildings, and our houses of worship. All have been shaped in one way or another by a handful of imaginative, audacious, and sometimes even arrogant individuals throughout

history whose bold ideas have been copied far and wide. 10 Buildings is the ideal collection to detail the flashes of inspiration from these architects who dared to strike out on their own and design radical new types of buildings that permanently altered our environmental and cultural landscape.

In his close encounters with society's underbelly Kemp endures several near-death experiences, including being shot at in Rio de Janeiro and set fire to in Russia. Without judging or glamorising the people he meets, Kemp infiltrates these secret organisations, whether they consist of Californian neo Nazi skinheads or Maori gang members in New Zealand, by tracking them down, befriending them and gaining their trust. The result is a fascinating exploration of what makes the world's most violent gangs tick, and what is being done to control them.
