Jack and the Giant Killer

Artificial Intelligence for Drug Development, Precision Medicine, and Healthcare covers exciting developments at the intersection of computer science and statistics. While much of machine-learning is statistics-based, achievements in deep learning for image and language processing rely on computer science's use of big data. Aimed at those with a statistical background who want to use their strengths in pursuing AI research, the book:

- Covers broad AI topics in drug development, precision medicine, and healthcare.
- Elaborates on supervised, unsupervised, reinforcement, and evolutionary learning methods.
- Introduces the similarity principle and related AI methods for both big and small data problems.
- Offers a balance of statistical and algorithm-based approaches to AI.
- Provides examples and real-world applications with hands-on R code.
- Suggests the path forward for AI in medicine and artificial general intelligence.

As well as covering the history of AI and the innovative ideas, methodologies and software implementation of the field, the book offers a comprehensive review of AI applications in medical sciences. In addition, readers will benefit from hands on exercises, with included R code.

Pure of Heart

Can anyone speak a language he or she has not learned normally, in childhood or later? Claims to have accomplished this are made from time to time, but only rarely do they receive support when carefully examined. In this volume, Dr. Stevenson presents detailed reports of two cases that seem authentic. Authentic instances of speaking a language that has not been learned normally (responsive xenoglossy) suggest that another personality (perhaps one of a previous life) had learned the language. Cases of responsive xenoglossy thus add to the evidence concerning the survival of human personality after death.

The Billionaire's Wake-up-call Girl

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Girl in Snow

Can you name five military leaders who were transgendered? Twelve cases of involuntary human experimentation by the U.S. government? How about the four porn novels written by famous authors, 11 books left out of the Bible and over 50 side effects of NutraSweet that have been reported to the FDA? In 1977, David Wallechinsky, Irving Wallace and Amy Wallace published The Book of Lists, causing an immediate sensation. Not only did it lead to three direct sequels (in 1980, 1983 and 1993), it also created a new genre. Soon, shelves were lined with The First Original Unexpurgated Authentic Canadian Book of Lists (1978), The Book of Sports Lists (1979) and Meredith's Book of Bible Lists (1980), among many others. Using this popular, enduring format, Russ Kick's Disinformation Book of Lists delves into the murkier aspects of politics, current events, business, history, science, art and literature, sex, drugs, death and more. Despite such unusual subject matter, this book presents hard, substantiated facts with full references. The Girl Who Lived

European Cases of the Reincarnation Type

"A perfectly paced and tautly plotted thriller...and an incredibly accomplished debut" (Paula Hawkins, #1 New York Times bestselling author of *The Girl on the Train* and *Into the Water*), about a beloved high schooler found murdered in her sleepy Colorado suburb and the secret lives of three people connected to her. How can you love someone who's done something horribly, horribly wrong? When a beloved high schooler named Lucinda Hayes is found murdered, no one in her community is untouched—not the boy who loved her too much; not the girl who wanted her perfect life; not the officer assigned to investigate her murder. In the aftermath of the tragedy, these three indelible characters—Cameron, Jade, and Russ—must each confront their darkest secrets in an effort to find solace, the truth, or both. In crystalline prose, Danya Kukafka offers a brilliant exploration of identity and of the razor-sharp line between love and obsession, between watching and seeing, between truth and memory. "A sensational debut—great characters, mysteries within mysteries, and page-turning pace. Highly recommended" (Lee Child, #1 New York Times bestselling author of the *Jack Reacher* novels). Hailed as "Gillian Flynn of 2017" (Yahoo! Style), compulsively readable and powerfully moving, *Girl in Snow* is "engagingly told... its endearing characters' struggles linger in memory after this affecting work is done" (The Wall Street Journal).

The Acharnians

The authors begin with compelling evidence of psychic abilities gathered in Targ's remote-viewing experiments for the Stanford Research Institute. Targ reveals how the experiments were conducted and how subjects were able to describe remote locations with precise detail. Targ also presents the results of recently declassified, covertly funded CIA experiments in remote spying during the Cold War, published here for the first time. After surveying the scientific evidence of the mind's nonlocal powers, Targ and Katra apply this evidence to the field of healing. Incorporating ancient Eastern teachings and modern scientific evidence published in the most prestigious scientific journals, Targ and Katra explain the process of spiritual healing, which they describe as a quieting of the mind to open it to the community of spirit. The book stays with you long after you put it down. It can change the way you view the world — and yourself.

Industrial Magic

Jack Knife is the story of my journey as a fully operational police officer working at some for the busiest and hardest police stations within the State of New South Wales (NSW) in which I had the privilege of being both an apprentice and a leader. I discuss my career from beginning to end and the failing of the system which I trusted and believed in as a result of the lessons learned and instilled in us whilst at the police academy. Jack Knife is about trust. It is about loyalty. It is about mateship. It is about courage and determination. It is about trusting others with your life and others trusting you with theirs. Jack Knife not only discusses integrity and human rights, but raises questions relating to 'normal standards' within our society, and debates them from a logistical aspect and environment in which I was subjected to. Jack Knife contains a range of operational police stories varying between saving peoples lives through to almost losing my own and an array of stories in between. My story gives the reader an insight into my life as a policeman and my demise thereafter. I discuss issues that I personally have lived through and been apart of, and in many cases most people have only seen on television. Ultimately Jack Knife has been written to educate, not only serving police officers and their families, but the general public. This book is the TRUTH as to what really goes on behind the front line of the policing world. I have written this book with the intention of assisting those that have been diagnosed with PTSD. In addition I wish to put positive pressure on every Police Force within Australia to change their ways so that the engine room of the force is looked after the way in which they deserve to be looked after and treated with respect, just as the management expect our police to treat members of the public. After all police are human too and deserve to be treated like human beings as opposed to the robots we are publicly at times made out to be by police management and the media. Jack Knife is an all inspiring book about, not only the NSW Police Force, but a policeman with two arms, two legs and a heartbeat. In other words a regular human being just doing his best to serve his State the only way he knew how.

And Then She Was Gone

A mentally ill woman is accused of killing her mother in this classic Mike Shayne novel from the legendary detective author. Mike Shayne has just poured himself a drink when Phyllis Brighton tries to throw herself out the window of his downtown apartment. Luckily, he blocks her just before she can launch herself over the sill. She tried to warn him she was crazy, but he didn't listen. Her doctor and her new stepfather, on the other hand, both believe Phyllis is suffering from a kind of Electra complex— a fixation with her mother that is so intense that Phyllis would rather kill her than share her with anyone else. Shayne agrees to do whatever he can to keep Phyllis from killing her mother, but that doesn't ensure that the woman will live. When Mrs. Brighton is found with a knife buried in her back, all signs point to the Phyllis's guilt. But this hard-boiled private investigator didn't stop someone from jumping out a window just to send her to the electric chair. And it doesn't take a degree in psychology to find a killer—it takes brains, eyes, and two strong fists. Mike Shayne is just the man for the job. Dividend on Death is the 1st book in the Mike Shayne Mysteries, but you may enjoy reading the series in any order.

Hive Succinctly

Jack Stratton is heading south for some fun in the sun. Already nervous about

introducing his girlfriend, Alice, to his parents, the last thing Jack needed was for the dog-sitter to cancel, forcing him to bring Lady, their one-hundred-and-twenty-pound King Shepherd, on the plane with them. The dog holds Jack responsible and wants payback. On top of everything, Jack is still waiting for Alice's answer to his marriage proposal. When his mother and the members of her neighborhood book club ask him to catch the "Orange Blossom Cove Bandit," a small-time thief who's stealing garden gnomes and peace of mind from their quiet retirement community, how can Jack refuse? The peculiar mystery proves to be more than it appears, and things take a deadly turn. Now, Jack finds it's up to him to stop a crazed killer, save his parents, and win the hand of the girl he loves--but if he survives, will it be Jack who ends up with a broken heart?

Jack of Hearts

All Jack Stratton wants to do is get married to the woman he loves. It seems like he is getting his wish until he responds to a police distress call and finds his old partner unconscious in an abandoned house. Sketches of women cover the walls, and among them is a sketch of Alice, pinned up beside an invitation to a very special wedding-his own.

The Skeptic Encyclopedia of Pseudoscience

Many cultures accept that a person may die and then come back to life in another form, but Westerners have traditionally rejected the idea. Recently, however, surveys conducted in Europe indicate a substantial increase in the number of Europeans who believe in reincarnation, and numerous claims of reincarnation have been reported. This book examines particular cases in Europe that are suggestive of reincarnation. The first section provides a brief history of the belief in reincarnation among Europeans. The second section considers eight cases from the first third of the twentieth century that were not independently investigated, but were reported and sometimes published by the persons concerned. The third section covers 32 cases from the second half of the twentieth century that were investigated by the author. Many of these cases involved either children who exhibited unusual behavior attributed to a previous life, or adults who experienced recurrent or vivid dreams attributed to a previous life. In the fourth section, the author compares European cases suggestive of reincarnation with those of other countries and cultures.

Of course, the farmers fought back with guns; the kids with clubs. This happened just about the time of the Irish canal worker infighting; those boys attacked one another with everything they had. Oh, and there are the unexplained

monster sightings and things of that nature. But really, it's not all bizarre. After all, Wabash was the first electrically lighted city, and there are scores of heroes and important businesses. Now I'm a Detective Constable and a trainee wizard, the first apprentice in fifty years, and my world has become somewhat more complicated: nests of vampires in Purley, negotiating a truce between the warring god and goddess of the Thames, and digging up graves in Covent Garden and there's something festering at the heart of the city I love, a malicious vengeful spirit that takes ordinary Londoners and twists them into grotesque mannequins to act out its drama of violence and despair.
