Californium-252 is a neutron emitter with a high specific activity, making it useful in a variety of applications, the most spectacular of which is in brachytherapy for cancer patients. Radiation oncology has exhausted nearly every option for treating radioresistant tumors by photon brachytherapy, and therefore new types of radiation need to be studied to improve the curability of cancer. Audience: Californium brachytherapy is used in only a few radiation therapy centers in the world, so the book will be highly instructive for radiation oncologists, medical physicists and radiobiologists. The nuclear techniques used in clinical applications may also interest nuclear physicists and engineers.

The Natural Religion describes the reality of our lives. It explains contradictions such as; why we are selfish, but also gain great satisfaction from helping others; why most of the sex we have is not intended to result in pregnancy; and, should we reject technology that sustains billions because some of its by-products are lethal? Have you ever asked yourself what life actually is, and whether our own existence has any

meaning? In *The Natural Religion*, Brendan Connolly explains in plain, everyday language just how amazing life really is, the purpose of our existence, why death is as important as birth, and how our emotions influence our decisions. His explanations, unlike traditional religions, do not involve any spiritual beliefs, just our knowledge of ourselves. Tackling the crunch-points of human life, *The Natural Religion* faces up to the reality of providing extra food for the 100 million people that are added to our world population each year, and considers why alleviating poverty is in the interest of the rich as well as the poor. Backed up by more than 10 years of painstaking research, Dr. Connolly suggests a new religion based on the realities of life. The book provides answers to the great questions that traditional religions either did not discuss at all, or for which they could only guess the answer. *The Natural Religion* heralds a new dawn in the understanding of religions and, while respectful of other viewpoints, it is realistic and can be taken more seriously than traditional religions. The book encourages discussion of different opinions rather than demanding unquestioning acceptance. Its main aim is to improve the quality of life for us humans, the most amazing animal species on Earth.

Homol'ovi III is the smallest of the seven primary villages comprising the Homol'ovi cluster. The work by Arizona State Museum in the late 1980s that is summarized in this volume was the first since J. Walter Fewkes spent a few days excavating in 1896. Homol'ovi III provides a unique perspective on the development of the Homol'ovi settlement cluster in the late 1200s and through most of the 1300s. Founded by immigrants as a small settlement of six or seven families between 1280 and 1290 on the floodplain of the Little Colorado River, it grew to a community of perhaps 75 people occupying 40-50

rooms by the late 1290s. Abandonment of Homol'ovi III shortly after 1300 correlates with increased stream flow that made its location on the floodplain untenable. In all likelihood, the inhabitants moved upstream 5 km to join occupants of Homol'ovi I. However, the use history of the village was just beginning. In the 1330s and 1340s, Homol'ovi III was used as a fieldhouse, probably by its former occupants, developing into a small farming village of 2-4 families from the 1350s to the 1370s. In conjunction with these seasonal occupations, many parts of the village were remodeled, the small plaza area was constantly in use, and even a small kiva was built. The latest occupation also witnessed use of the plaza as a bird cemetery. The complex history of Homol'ovi III informs us about the details of life along the Little Colorado River over a century of use by ancestral Hopi people. The volume focuses on an in-depth narrative of architecture, environment, and material culture analyses from five years of excavations by the Arizona State Museum and provides detailed information for students of latepueblo prehistory.

The Impotent Giant has nothing to do with being a Democrat or Republican. It has everything to do with what it means to be an American. Alarmed about who and what the United States of America represents,

author Dr. H. John Lyke articulates how citizens can help to regain the moral and political leadership. Using psychological principles, he provides a discussion of why our country is in the fix it's in and how to return it to its former greatness. Dr. Lyke's research on the issues began with a re-examination of the lives of outstanding leaders, especially George Washington and Abraham Lincoln, two men who led the United States toward the attainment of American ideals. Studying the principles, courage, and actions of these men offers a model for effective leadership and rekindles one's pride in being an American, a pride that for many has shrunk drastically during the past ten years. The Impotent Giant examines where the country stands among other nations and how the citizens of the United States and those of the rest of the world perceive its leaders. It encourages citizens to elect the right leaders, discuss the right issues, and act for the right reasons.
