Focus on Personal Finance is a brief, 14-chapter book, covering the critical topics in Personal Finance courses. This 4-color, paperback text is designed and written to appeal to a range of ages, life situations, and levels of financial literacy. A unique aspect of this text is its active approach. This text will not only get your students thinking about their current situation and financial goals, but also encourage them to put these in writing to use as a guide and revise over the course of their lives. New for this edition, sections are oriented around specific action-items for students. The more a student involves themselves in the assessments, exercises and worksheets provided, the more they will discover about their current habits and how to improve them for greater financial freedom. Students have many different financial goals, but none are more important than having a basic understanding of financial issues and peace of mind with regard to their decisions. The ultimate goal of Focus on Personal Finance is to get students to this point as a first step to achieving the many financial goals they have set for themselves.

The programs demonstrate in graphical form what data structures look like and how they operate. In the second edition, the program is rewritten to improve operation and clarify the algorithms, the example programs are revised to work with the latest version of the Java JDK, and questions and exercises will be added at the end of each chapter making the book even more useful. How the Immune System Works

ECIC2014-Proceedings of the 6th European Conference on Intellectual Capital

Five lectures George Soros recently delivered at the Central European University in Budapest - which he founded in 1991 - distill a lifetime of thinking on finance, capitalism and open society. In a series of lectures delivered at the Central European University in October 2009, George Soros provided a broad overview of his thoughts on economics and politics. The lectures are the culmination of a lifetime of practical and philosophical reflection. In the first and second lecture, Soros discusses his general theory of reflexivity and its application to financial markets, providing insight into the recent financial crisis. The third and fourth lectures examine the concept of open society, which has guided Soros' global philanthropy, as well as the potential for conflict between capitalism and open society. The closing lecture focuses on the way ahead, closely examining the increasingly important economic and political role that China will play in the future. "The Budapest Lectures" presents these five seminal talks into one volume, which offers a condensed and highly readable summary of Soros' world view.

Case Studies in Finance

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Fundamentals of Corporate Finance

Brealey, Principles of Corporate Finance 13e describes the theory and practice of corporate finance. We hardly need to explain why financial managers must master the practical aspects of their job, but we should spell out why down-to-earth managers need to bother with theory. Throughout this edition, the authors demonstrate how managers use financial theory to solve practical problems. They also explore what financial managers should do to increase company value. Some of the biggest changes in this edition were prompted by the tax changes enacted in the U.S. Tax Cuts and Jobs Act passed in December 2017.
