"Drawing upon the archives of the George Eastman House Collection, 500 Cameras takes a unique approach to the fascinating story of photography. Tracing the medium's history through some of the most important equipment ever used by professionals and amateurs, this remarkable survey presents 500 cameras, all beautifully illustrated in spectacular images."--P. [2] of cover.

## **Sweat Today Smile Tomorrow**

Since the introduction of photography by commercial studio photographers and the colonial state in Kenya, this global medium has been intensely debated and contested among Muslims on the cosmopolitan East African coast. This book does not only explore the making, circulation, and consumption of popular photographs, but also the other side, their rejection and obliteration, an essential aspect of a medium's history that should not be neglected. It deals with various »social spaces

of refusal« in the local Muslim milieu and in that of »traditional« spirit mediums in which (gendered) visibility was (and is) contested in various and creative ways. It focuses on the »aesthetics of withdrawal«: the various ways and techniques that process the photographic act as well as the photographic image to theatricalize the surface of the image in new ways by veiling, masking, and concealing. In a fragmented historical perspective, Heike Behrend seeks to complement, decenter, and counter the history of photography as it has been told by the West and to narrate another history beginning with preceding local media such as textiles and spirit possession.

A discussion of stone construction and the nature of stone as a material. Aimed at practising architects and students, this study describes the new technologies that make the new stone forms possible. This is followed by 33 case studies from around the world.

### **III-Nitride Semiconductors and Their Modern Devices**

"The limitations of the Modernist palette have long been recognized and contemporary architects are looking to the ancient values of stone to give new

expression to their ideas. Its permanence is increasingly used to express a sense of civic stability or ground the fluid forms of contemporary architecture. This paperback version of the book *New Stone Architecture*, originally published in 2003, explores the special role of stone in a timely reassessment of the ideas that underpin today's stone renaissance. The introduction uncovers the expressive possibilities of stone, describes the new technologies which make the new forms possible and offers an interpretation based on the author's technical and theoretical understanding of material themes. This is followed by 33 case studies from around the world. Architects featured include Michael Hopkins, Kengo Kuma and Renzo Piano."--Publisher's website.

The New York-based architectural firm LOT/EK (pronounced "low-tech") has made a distinctive mark on the architectural landscape through a series of seemingly whimsical projects that make a point of using prefabricated industrial materials in unexpected ways. In their hands, a shipping container can be transformed into a mobile working unit, a museum, or a restaurant. In the process, they question our relation to the industrial environment and the artificiality of the urban landscape. LOT/EK: Urban Scan, the first and only monograph on the firm, is organized categorically and alphabetically. Twenty-three projects are presented in detail, including American Diner (a restaurant in a container), the InspiroTrainer (created for the Museum of Modern Art), Mixer (a cement mixer-cum-video immersion unit), the Meltzer Gallery, the Boon boutique, the MDU (Mobule Dwelling Unit), and the Goree Memorial and Museum. It also includes more than 1,000 photographs of infrastructural objects--everything from air conditioners to water tanks--that serve as the raw material and inspiration for this creative practice.

### **Derek's Notebook**

Weaves ancient myth into modern celebrity and consumerist culture to expose the absurdity and occasional insanity of twenty-first-century society, economy, and politics. Despite a proclaimed respect for scientific reason, humans are still as intrigued by myth as their remote ancestors. Laptops and smartphones are sold under a logo that invokes the forbidden fruit of the Garden of Eden; skimpily clad classical nymphs cavort in TV reality shows; Narcissus makes a comeback whenever we snap a selfie. Mythical creatures such as handsome vampires abound in best-selling novels. Myth has also invaded the political realm, now that terrorists brandish black flags and recite theological mantras as they martyr themselves. In twenty-seven self-contained entries, Conrad illuminates in his own remarkable way subjects from the British Queen to the Kardashians, via Banksy, vaping, and the inception of the Large Hadron Collider. In Judge Judy, he shows a matronly Roman goddess dispensing justice with a fly swatter. In the metamorphosis of Caitlyn Jenner from Olympic athlete and paterfamilias into idealized female form, he finds parallels to the transformations of the residents of Mount Olympus. Myths used to tell us where we came from. Now, alarmed but also elated by the pace of change in our society, we need them to tell us where we are going.

The founder of Spiratone, a company that once supplied photographic accessories, S.F. (Fred) Spira is also well known for his extensive collection of photographic equipment. This volume, which includes Spira's writings and is coauthored by his son, Jonathan, and Lothrop, a former president of the American Photographic Historical Society, provides a history of photographic processes with a focus on consumer-oriented picture taking. It includes thorough discussions on film and camera history, color photography, photo reproduction, stereo photography, and motion pictures and an especially good chapter on digital photography. Photo

illustrations are taken from the more than 20,000 objects in Spira's collection. A chapter on photography and humor seems out of place, but in general the book supplies understandable explanations of photographic devices and methods and is a good supplement to more general histories, such as Naomi Rosenblum's *A World History of Photography*.

Few inventions have had as powerful an influence as the camera, and few modes of expression have enjoyed the enduring artistic, scientific, and popular appeal of photography. We are so focused on the products of the camera, the indelible images marking our lives and times, that it's easy to forget the instrument itself has a history. Now that history has been comprehensively traced for photography buffs and amateurs alike by Todd Gustavson, Curator of Technology at George Eastman House. In this stunning volume, hundreds of new and archival images from George Eastman House bring the story to life and provide an unmatched reference source. Vast in its scope, this groundbreaking book is an in-depth visual and narrative look at the camera, and consequently photography itself, as never before seen. - Jacket.

Updated, expanded, and covering the latest software, this new edition of the bestselling Digital Landscape Photography brings the amazing techniques pioneered by Ansel Adams and his contemporaries to every digital photographer. Ansel Adams' imagery - especially his iconic vision of the American National Parks - is widely published and instantly recognisable. Many photographers will have heard of his renowned Zone System, but that is just the tip of the iceberg; his unparalleled attention to detail, which once required hours in the darkroom with specialist tools, is finally accessible to all. Michael Frye's own photography provides many stunning examples of the results that can be achieved, and as one of Adams' natural successors in the field, he is well placed to analyse the many inspirational shots from the great masters of landscape photography. Combining the cutting edge of today's digital work with some of the best-known photos ever taken, this book a must-read for any landscape or nature photographer.
