180 Days of Writing is an easy-to-use resource that provides first-grade students with practice in writing argument/opinion, informative/explanatory, and narratives pieces while also strengthening their language and grammar skills. Centered on high-interest themes, each two-week unit is aligned to one writing standard. Students interact with mentor texts during the first week and then apply their learning the next week by practicing the steps of the writing process: prewriting, drafting, revising, editing, and publishing. Daily practice pages make activities easy to prepare and implement as part of a classroom morning routine, at the beginning of each writing lesson, or as homework. Genre-specific rubrics and data-analysis tools provide authentic assessments that help teachers differentiate instruction. Develop enthusiastic and efficient writers through these standards-based activities correlated to College and Career Readiness and other state standards.

Take just one minute a day to quickly assess student progress in basic math skills. This book features 100 quick reproducible drill sheets to help students increase speed in math operations and strengthen problem-solving skills. The 10 problems on each sheet can be done in one or two minutes and are a great warm-up to the daily math lesson. The quick, one-minute format combined with instant feedback makes this a challenging and motivational assignment students will look forward to each day. Students become active learners as they discover mathematical relationships and apply acquired understanding to complex situations and to the solution of realistic problems in each minute. An answer key is included. Note that this book is produced in the United States and may contain some US-based standards.

Algebra 1 covers all the topics in a first-year algebra course and builds the algebraic foundation essential for all students to solve increasingly complex problems. Higher order thinking skills use real-world applications, reasoning and justification to make connections to math strands. Algebra 1 focuses on algebraic thinking and multiple representations -- verbal, numeric, symbolic, and graphical. Graphing calculator labs model mathematical situations. - Publisher.

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data
