### Word Problems, Grade 6

Take just one minute a day to quickly assess student progress in basic math skills. This book features 100 quick reproducible drill sheets to help students increase speed in math operations and strengthen problem-solving skills. The 10 problems on each sheet can be done in one or two minutes and are a great warm-up to the daily math lesson. The quick, one-minute format combined with instant feedback makes this a challenging and motivational assignment students will look forward to each day. Students become active learners as they discover mathematical relationships and apply acquired understanding to complex situations and to the solution of realistic problems in each minute. An answer key is included. Note that this book is produced in the United States and may contain some US-based standards.

In *Innovate Inside the Box*, George Couros and Katie Novak provide informed insight on creating purposeful learning opportunities for all students. By combining the power of the Innovator's Mindset and Universal Design for Learning (UDL), they empower educators to create opportunities that will benefit every learner.

### Word Problems, Grade 4

Kumon's research has discovered that children learn more easily when they tackle one skill at a time. That's why Kumon Focus on Workbooks shine a spotlight on one challenging maths topic per book and help children improve these essential

skills and gain confidence in their abilities. Each workbook utilises the Kumon Method - a step-by-step, incremental approach that helps children learn at their own pace and without anxiety. By rigorously practising each skill, the child will be proficient in the mathematics that is crucial for future learning.

Jump Math was founded in the belief that all children, even those who have traditionally struggled at school, can learn mathematics. The JUMP Math student assessment & practice books are meant to be used in conjunction with the extensive

teacher resources to enable students to practice and explore subtle variations on the lessons and to enable teachers to rapidly assess progress. For each lesson, there is a clear and highly effective lesson plan, which enables teachers to accomplish the seemingly impossible task of teaching to the whole class while tailoring to individual needs. Each lesson is carefully designed to generate deep, subtle, transferable mastery of key concepts. Lesson plans include ideas for contextualizing the math, questions and tasks that allow students to discover mathematical concepts, games, activities, and innovative extension questions that keep "fast" students engaged and learning while teachers help others to master the key objectives.
